***The English-vernacular Divide Nov 12 2020 This book offers a critical exploration of the role of English in postcolonial communities such as India. Specifically, it focuses on some local ways in which the language falls along the lines of a class-based divide (with ancillary ones of gender and caste as well). The book argues that issues of inequality, subordination and unequal value seem to revolve directly around the general positioning of English in relation to vernacular languages. The author was raised and schooled in the Indian educational system.***

**Language Policies and (Dis)Citizenship Oct 12 2020 This volume explores the concept of ‘citizenship’, and argues that it should be understood both as a process of becoming and the ability to participate fully, rather than as a status that can be inherited, acquired, or achieved. From a courtroom in Bulawayo to a nursery in Birmingham, the authors use local contexts to foreground how the vulnerable, particularly those from minority language backgrounds, continue to be excluded, whilst offering a powerful demonstration of the potential for change offered by individual agency, resistance and struggle. In addressing questions such as ‘under what local conditions does “dis-citizenship” happen?’; ‘what role do language policies and pedagogic practices play?’ and ‘what kinds of margins and borders keep humans from fully participating’? The chapters in this volume shift the debate away from visas and passports to more uncertain and contested spaces of interpretation.**

**The No Nonsense Guide to Minority Rights in South Asia Jun 27 2019 The No Nonsense Guide to Minority Rights in South Asia is a practical primer on issues related to minority rights in South Asian countries. It delves into all major concepts and cutting edge theories that constitute the evolving minority rights discourse. The ‘minority’ in South Asia is typically characterized by ‘non-domination’ and powerlessness, two major markers apart from language, culture, religion and ethnicity. This book explores the process of this kind of ‘minoritization’ in the region, evaluating the weaknesses of constitutional and legal frameworks that contribute to it. In doing so, it examines in detail the State’s role in the socio-political recognition, protection and exclusion of minorities. By taking a rights-based approach, the book argues that nation-building in South Asia has been devoid of the commitment to expand the democracy and equality agenda and has instead been dominated by majoritarian and authoritarian policies. While elaborating on such politics of recognition and inequality, the author goes on to explore and analyze the ethnic composition of each South Asian country—India, Pakistan, Nepal, Bangladesh,**

**Sri Lanka and Bhutan. She also highlights the role of minority agencies in resisting injustice and exclusion, thus providing a comparative and holistic understanding of the minority discourse in the region. This book is an important reference resource for students and academics working in the areas of politics and international relations, especially on human rights, minority rights and state-building. It will also be a useful guide for activists.**

**Teaching English from Classes to Masses Dec 26 2021 This volume brings together articles based on experimental and theoretical research from teachers working in diverse teaching backgrounds with varying experience, from research scholars to school teachers, from college and university teachers in India to a British native teaching in China. The contributions here provide a mix of global and local teaching scenarios, addressing the need for diagnostic tests, developing need-based material, using the mother tongue to ensure active participation of the masses, and re-examining the language policies in Asian countries. The papers collected here also explore the implementation of Task-based Language Teaching, the integration of technology in developing language skills, and the use of games and activities to engage the interest of low level learners while teaching both literature and language, further linking them with their culture and society. The book offers a reflection of the changes that have taken place in the teaching environment in the last two decades, with the introduction of Communicative Language Teaching, and, as such, will be of immense help for policy framers and educators in South-Asian countries and in countries where English is a second or foreign language. Furthermore, the volume offers valuable information for researchers working in the field of English Language Teaching (ELT), which can be used for reviewing literature and exploring the directions in which the new teaching methods and approaches are leading, and establishing the validity of research.**

**Framing Languages and Literacies Aug 10 2020** In this seminal volume leading language and literacy scholars clearly articulate and explicate major social perspectives and approaches in the fields of language and literacy studies. Each approach draws on distinct bodies of literature and traditions and uses distinct identifiers, labels, and constellations of concepts; each has been taken up across diverse global contexts and is used as rationale and guide for the design of research and of educational policies and practices. Authors discuss the genesis and historical trajectory of the approach with which they are associated; offer their unique perspectives, rationales, and engagements; and investigate implications for understanding language and literacy use in and out of schools. The premise of the book is that understanding concepts,

**perspectives, and approaches requires knowing the context in which they were created, the rationale or purpose in creating them, and how they have been taken up and applied in communities of practice. Accessible yet theoretically rich, this volume is indispensable for researchers, students, and professionals across the fields of language and literacy studies.**

**E-Pedagogy for the Digital Age May 07 2020 Adult learners have more options for enrolling in postsecondary education than ever before, and they are able to use their learning style preference in deciding which program best meets their needs. For some of these students, those programs are fully online, and for others, there is minimal use of technology. As technology grows and become more integrated into individual lives, the unique learning styles and preferences of adults need to learn to be incorporated into instructional design. Drawing on a regional sample of US colleges, 545 adult learners in a graduate programs were surveyed about how to effectively build community in their online classes. Results indicated some agreement with these instructional tools. Mature adult learners, however, were found to have stronger agreement with strategies that included work outside of the formal online class. These results suggest perhaps a greater comfort for adults in working in spaces where there is less likelihood of being judged or graded, and that they might value relational work with other students in different ways than younger adults.**

**Independent Directors in Asia Mar 05 2020 The rise of the independent director in Asia is an issue of global consequence that has been largely overlooked until recently. Less than two decades ago, independent directors were oddities in Asia's boardrooms. Today, they are ubiquitous. Independent Directors in Asia undertakes the first detailed analysis of this phenomenon. It provides in-depth historical, contextual and comparative perspectives on the law and practice of independent directors in seven core Asian jurisdictions (China, Hong Kong, India, Japan, Singapore, South Korea, Taiwan) and Australia. These case studies reveal the varieties of independent directors in Asia, none of which conform to its original American concept. The authors develop a taxonomy of these varieties, which provides a powerful analytical tool for more accurately understanding and effectively researching independent directors in Asia. This new approach challenges foundational aspects of comparative corporate governance practice and suggests a new path for comparative corporate governance scholarship and reform.**

**Communalism Condemned, Gujarat Genocide 2002 Oct 04 2022 "Few events in contemporary India have shaken the conscience of the nation as deeply as the Gujarat carnage of 2002. It is indeed a defining event in the biography of the Indian nation. India has witnessed many riots in the past, but never before have the foundational principles of Indian society been so comprehensively threatened. Never before has the complicity of the political and bureaucratic establishment been so pitifully obvious. Never before have the riots been so genocidal in character. In a word, the Gujarat carnage stands apart from the rest as a class by itself.... The purpose of this collection is not merely to anatomize violence or to catalogue events that have disgraced the nation. Instead it seeks to go beyond events and attempts to capture multiple voices of reason that defiantly refused to give in."--Book jacket.**
