Langford's Advanced Photography Mar 02 2020 Langford's Advanced Photography is the only advanced photography guide a serious student or aspiring professional will ever need. In this eighth edition, Efthimia Bilissi continues in the footsteps of Michael Langford by combining an unrivalled level of technical detail with a straightforward

writing style while simultaneously bringing the text firmly in to the digital era. This book covers the entire photographic process from a technical standpoint - not only detailing the 'how' but also explaining the 'why' that is so often missing from photography texts. From the workings of cameras, lenses, digital imaging sensors and software to new hot topics such as HDR imaging, digital asset management, and even running your own photography business, everything a serious photographer could need to extend their art into professional realms is covered. The book also benefits from a full glossary, charts and inspirational full color images throughout, with summaries and projects at the end of each chapter to reinforce the theory.

The Passive Eye Jun 04 2020 The Passive Eye is a revolutionary and historically rich account of Berkeley's theory of vision. In this formidable work, the author considers the theory of the embodied subject and its passions in light of a highly dynamic conception of infinity. Arsic shows the profound affinities between Berkeley and Spinoza, and offers a highly textual reading of Berkeley on the concept of an "exhausted subjectivity." The author begins by following the Renaissance universe of vision, particularly the paradoxical elusive nature of mirrors, then shows how this conception of vision was translated into the optical devices and in what way the various ways of deception could be conceived. Reading Berkeley against the backdrop of competing theories, in relation to Leibniz, Spinoza, Newton, Malebranche, Hume, Locke, Molyneux and others, this book gives a meticulous historic reconstruction of Berkeley's theory. This excellent scholarly work presents Berkeley's theory in a new and radical light. The book, presented in three parts, begins by presenting the conceptions of vision prior to Berkeley's intervention. In the second part, the author moves through a careful study of Descartes' theory of vision to arrive at Berkeley. The third part addresses the author's version of Berkeley in which the eye and the image become inseparable due to the collapse of the universe of representation. The problem of vision becomes not that of representation, but of presentation. Through an erudite historic reading of Berkeley's theory and astute comparative assessments, the author uncovers Berkeley's place as a contemporary theoretician, corresponding with such thinkers as Deleuze, Lacan, Foucault, and Derrida.

The Institutional Dynamics of Culture, Volumes I and II Mar 26 2022 These two volumes present the most important recent developments in the institutional theory of culture and demonstrate their practical applications. Sometimes called 'grid-group analysis' or 'cultural theory', they derive from the work of Durkheim in the 1880s and 1900s and develop the insights of the anthropologist Mary Douglas and her followers from the 1960s on. First redefined within social and cultural anthropology, the theory's influence is shown in recent years to have permeated all the main disciplines of social science with substantial implications for politics, history, business, work and organizations, the environment, technology and risk, and crime and consumption. Today, the institutional theory of culture now rivals the rational choice, Weberian and postmodern outlooks in influence across the social sciences.

Moving Environments May 04 2020 In Moving Environments: Affect, Emotion, Ecology, and Film, international scholars investigate how films portray human emotional relationships with the more-than-human world and how such films act upon their viewers' emotions. Emotion and affect are the basic mechanisms that connect us to our environment, shape our knowledge, and motivate our actions. Contributors explore how film represents and shapes human emotion in relation to different environments and what role time, place, and genre play in these affective processes. Individual essays resituate well-researched environmental films such as An Inconvenient Truth and March of the Penguins by paying close attention to their emotionalizing strategies, and bring to our attention the affective qualities of films that have so far received little attention from ecocritics, such as Stan Brakhage's Dog Star Man. The collection opens a new discursive space at the disciplinary intersection of film studies, affect studies, and a growing body of ecocritical scholarship. It will be of interest not only to scholars and students working in the field of ecocriticism and the environmental humanities, but for everyone with an interest in our emotional responses to film.

The Race Problem in the South Apr 26 2022 LeConte was the son of a former slave-owner in Georgia and president of the Society for the Advancement of Science. In response to the question of what is to be done with freed slaves, LeConte argues for the separation of Blacks and whites in the South and a restricted franchise for all on the basis of education and property; eventually he feels the race problem will solve itself and disappear naturally. In a counter presentation, one James Skilton says he doubts if a race problem really exists, and he argues that former slaves require economic freedom if they are to attain real political and social freedom in the U.S.

American Detox Jul 06 2020 **An Amazon Editor's Pick in Best Nonfiction** "An intimate, honest, accountable, and thorough invitation into healing" -- adrienne maree brown, author of Pleasure Activism "This book is a powerhouse." -- Ashley Judd The

myth of wellness is a lie. And until we learn to confront and dismantle its toxic systems, we can't ever be well. Better, stronger, healthier, whole--the wellness industry promises us that with enough intention, investment, and positive thinking, we'll unlock our best selves and find meaning and purpose in a chaotic and confusing world. The problem? It's a lie. The industry soars upwards of $650 billion a year, but we're still isolated, insecure, and inequitable. "Wellness" isn't making us well; it's making us worse. It diverts our attention and holds us back from asking the questions that do help us heal: Who gets to be well in America? Who's harmed--and who's left out? And what's the real-life cost of our obsession with self-improvement? To be truly well, we don't need juice fasts or yoga fads. We need to detox from a culture rooted in perfectionism, white supremacy, and individualism--and move toward a model that embodies mutual responsibility and extends beyond self-help to collective care. In American Detox, organizer, yoga activist, wellness disruptor, and CTZNWELL founder Kerri Kelly sounds the wake-up call. It's time to commit to the radical work of unlearning the toxic messages we've been fed--to resist, disrupt, and dream better futures of what wellness really means.

Urban Poverty and the Underclass Oct 01 2022 Over the last two decades "poverty" has moved centrestage as an issue within the social sciences. This volume, edited by one of Europe's foremost sociologists, aims to assess the debates surrounding poverty and the responses to it, exploring the ways in which the various socio-political systems and welfarist regimes are being radically transformed. The essays examine how such change is effected by failing welfare programmes and enervating social structures such as family and community which once would have provided mechanisms of social stability. The first part of the book provides reflections on urban poverty; the second part discusses the widely debated idea of an "underclass" and its meanings in Europe and in the USA, and the final part draws on concrete empirical analyses to examine the patterns of poverty thoughout Western Europe. This volume will be of first-rate importance to all serious students of politics, sociology, geography, public policy, youth and community studies, social policy and American studies.

Agile Processes, in Software Engineering, and Extreme Programming Oct 21 2021 This book contains the refereed proceedings of the 17th International Conference on Agile Software Development, XP 2016, held in Edinburgh, UK, in May 2016. While agile development has already become mainstream in industry, this field is still constantly evolving and continues to spur an enormous interest both in industry and academia. To this end, the XP conference attracts a large number of software practitioners and researchers, providing a rare opportunity for interaction between the two communities. The 14 full papers accepted for XP 2016 were selected from 42 submissions. Additionally, 11 experience reports (from 25 submissions) 5 empirical studies (out of 12 submitted) and 5 doctoral papers (from 6 papers submitted) were selected, and in each case the authors were shepherded by an experienced researcher. Generally, all of the submitted papers went through a rigorous peer-review process.
