Presentations are rigorously peer-reviewed and are published in an archival proceedings volume. PSB 2012 will be held on January 3 - 7, 2012 in Kohala Coast, Hawaii. Tutorials and workshops will be offered prior to the start of the conference. PSB 2012 will bring together top researchers from the US, the Asian Pacific nations, and countries around the world to exchange research results and address open issues in all aspects of computational biology. It is a forum for the presentation of work in databases, algorithms, interfaces, visualization, modeling, and other computational methods as applied to biological problems, with emphasis on the applications in the data-rich areas of molecular biology. The PSB has been designed to be responsive to the need for critical mass in sub-disciplines within biocomputing. [Six Against the Stars](#) Jun 01 2020 As the self-proclaimed biggest coward in the galaxy, Horatio has it easy on what passes for 40th century America. A much-favoured sycophant in the court of the King of Earth, Horatio lives in a genetically engineered paradise where there's a vat-grown slave waiting around every marble column with a bunch of grapes to drop into his oh-so-perfectly designed mouth. Unfortunately for Horatio, the artificial intelligence that rules the great mass of humanity spread across the

stars has other plans for this feckless seducer. So, if you ever wonder how the galaxy's biggest coward finds himself actually trying to save it, you're not alone... but then, unfortunately, neither is our hero! His misadventures are abetted by a psychotic Martian warrior, a robot who thinks it's related to Sherlock Holmes, a beautiful genetically enhanced assassin, a scientist with a computer for a brain, and a millennia-old clone who was alive when the last U.S. President was executed by a firing squad. It's six against the galaxy. Six against the stars. They'll save the universe... but they might damage it first.
