**The Handbook of Peer Production** Nov 20 2021 The definitive reference work with comprehensive analysis and review of peer production Peer production is no longer the sole domain of small groups of technical or academic elites. The internet has enabled millions of people to collectively produce, revise, and distribute everything from computer operating systems and applications to encyclopedia articles and film and television databases. Today, peer production has branched out to include wireless networks, online currencies, biohacking, and peer-to-peer urbanism, amongst others. The Handbook of Peer Production outlines central concepts, examines current and emerging areas of application, and analyzes the forms and principles of cooperation that continue to impact multiple areas of production and sociality. Featuring contributions from an international team of experts in the field, this landmark work maps the origins and manifestations of peer production, discusses the factors and conditions that are enabling, advancing, and co-opting peer production, and considers its current impact and potential consequences for the social order. Detailed chapters address the governance, political economy, and cultures of peer production, user motivations, social rules and norms, the role of peer production in social change and activism, and much more. Filling a gap in available literature as the only extensive overview of peer production's modes of generating

informational goods and services, this groundbreaking volume: Offers accessible, up-to-date information to both specialists and non-specialists across academia, industry, journalism, and public advocacy Includes interviews with leading practitioners discussing the future of peer production Discusses the history, traditions, key debates, and pioneers of peer production Explores technologies for peer production, openness and licensing, peer learning, open design and manufacturing, and free and open-source software The Handbook of Peer Production is an indispensable resource for students, instructors, researchers, and professionals working in fields including communication studies, science and technology studies, sociology, and management studies, as well as those interested in the network information economy, the public domain, and new forms of organization and networking.

*House of Commons - Foreign Affairs Committee: the FCO's Human Rights Work in 2012 - HC 267* Aug 25 2019 The FCO was timid and inconsistent in the discussions which led to the decision to award to Sri Lanka the right to host the 2013 CHOGM. It should have taken a more robust approach since, in the light of continuing human rights abuses in the country. In 2009 the FCO objected to Sri Lanka hosting the 2011 CHOGM but did not obstruct a proposal that it might do so in 2013, nor did it insist that Sri Lanka's right to host in 2013 should be conditional on

improvements in human rights. The Committee took evidence from the BBC World Service on jamming and denial of access to its broadcast and internet services, particularly in Iran and China. The Committee calls on the BBC to recognise in future funding plans the need to provide the resources necessary to afford protection. All providers of satellite services have a commercial interest in defeating jamming. The report considers Government policy on human rights in Burma and concludes that the EU's decision to lift economic sanctions in April 2013 was the right one, given the remarkable progress made in Burma. But it warns that the UK should be prepared to advocate re-imposition of sanctions if undertakings on human rights are not followed through. The Government should also urge condemnation of those responsible for violence in Rakhine State in 2012. The Committee does not support suggestions that the 2014 Winter Olympic and Paralympic Games should be boycotted in protest against human rights abuses in Russia

**Freedom of Speech and Islam** Jun 27 2022 Freedom of speech and expression is considered in the West a high public good and an important social value, underpinned by legislative and ethical norms. Its importance is not shared to the same extent by conservative and devout Muslims, who read Islamic doctrines in ways seemingly incompatible with Western notions of freedom of speech. Since the Salman Rushdie affair in the 1980s there has been growing recognition in the West that its cherished value of free speech and associated freedoms relating to arts, the press and media, literature, academia, critical satire etc. episodically clash with conservative Islamic values that limit this freedom for the sake of holding religious issues sacrosanct. Recent controversies - such as the Danish cartoons, the Charlie Hebdo affair, Quran burnings, and the internet film 'The Innocence of Muslims' which have stirred violent reactions in the Muslim world - have made the West aware of the fact that Muslims' religious sensitivities have to be taken into account in exercising traditional Western freedoms of speech. Featuring experts across a spectrum of fields within Islamic studies, Freedom of Speech and Islam considers Islamic concepts of blasphemy, apostasy and heresy and their applicability in the modern world.

E-thesis repositories in the world Jul 05 2020 Doctoral Thesis / Dissertation from the year 2014 in the subject Library Science, Information- / Documentation Science, grade: 10.0, Savitribai Phule Pune University, formerly University of Pune, language: English, abstract: The present research work deals with the Electronic Thesis

Repositories which are a major form of grey literature of any organization. There are various benefits of ETDs like they help in increasing the citation count of the author and the institution, minimum time required for dissemination of scholarly information, various file formats can be incorporated in the electronic form which is not possible in the print theses and dissertations and they provide a solution of long term preservation of theses and dissertations. In spite of the benefits of ETDs, authors hesitate in depositing their research work in electronic format mainly due to fear of plagiarism. There are various concepts in the whole process of setting up of an ETD Program. The present research work aims to study the various concepts of ETDs by analyzing the E-thesis Repositories in the world and collecting data from the Repository administrators through Web Questionnaire. The fourteen research objectives are divided into nine sections of Background Information of E-thesis Repository; Repository Materials; Hardware & Software; Ways of Providing Access to ETDs; Budget & Human Resource; Metadata & Interoperability Standards; Preservation Policies; Copyright Issues; Language Compatibility, Linkages with various National and International ETD Projects & Currency of Information. The Review of Literature was conducted exhaustively using various keywords belonging to the area of research from print and non-print sources of information. The major trend observed in the international literature emphasized on importance of ETDs in academic libraries, world wide open access initiatives, overview of country specific ETD Projects, copyright and preservation issues related to ETDs, selection of software and Policy Guidelines framed by international organizations. Trend observed in ETD literature published in India highlight on contribution of UGC, NKC and INFLIBNET towards Open Access and ETDs, selection of software, copyright and IPR issues, developments in open access initiative in India and development of ETD projects in various institutions across India.

**Encyclopedia of Evolutionary Biology** Jan 11 2021 Encyclopedia of Evolutionary Biology is the definitive go-to reference in the field of evolutionary biology. It provides a fully comprehensive review of the field in an easy to search structure. Under the collective leadership of fifteen distinguished section editors, it is comprised of articles written by leading experts in the field, providing a full review of the current status of each topic. The articles are up-to-date and fully illustrated with in-text references that allow readers to easily access primary literature. While all entries are authoritative and valuable to those with advanced understanding of evolutionary biology, they are also

intended to be accessible to both advanced undergraduate and graduate students. Broad topics include the history of evolutionary biology, population genetics, quantitative genetics; speciation, life history evolution, evolution of sex and mating systems, evolutionary biogeography, evolutionary developmental biology, molecular and genome evolution, coevolution, phylogenetic methods, microbial evolution, diversification of plants and fungi, diversification of animals, and applied evolution. Presents fully comprehensive content, allowing easy access to fundamental information and links to primary research. Contains concise articles by leading experts in the field that ensures current coverage of each topic. **International Perspectives on Value Creation and Sustainability Through Social Entrepreneurship** Jun 23

2019 Social entrepreneurship is construed an innovative activity that addresses or mitigates social issues based on self-sufficiency and financial stability. It offers the potential to shift civil society through innovative social ventures that pursue profit and purpose. It is gaining international attention due to the intent of social entrepreneurs to change and to see the world as it can be, not as it is. These changemakers blend lessons from business with the diversity and complexity of social values and in the process pursue opportunities for change. *International Perspectives on Value Creation and Sustainability Through Social Entrepreneurship* explores various issues and ideas about social entrepreneurship through the lens of theoretical, practical, and empirical research. It provides an international outlook of social entrepreneurship, focusing primarily on value creation and sustainability. Covering topics such as entrepreneurship education, post-COVID perspectives, and private wealth, this premier reference source is an essential resource for entrepreneurs, business leaders, managers, government officials, policymakers, libraries, students and faculty of higher education, researchers, and academicians.

**The Palgrave Handbook of Critical Social Psychology** May 15 2021 This handbook is the first to bring together the latest theory and research on critical approaches to social psychological challenges. Edited by a leading authority in the field, this volume further establishes critical social psychology as a discipline of study, distinct from mainstream social psychology. The handbook explains how critical approaches to social processes and phenomena are essential to fully understanding them, and covers the main research topics in basic and applied social

psychology, including social cognition, identity and social relations, alongside overviews of the main theories and methodologies that underpin critical approaches. This volume features a range of leading authors working on key social psychological issues, and highlights a commitment to a social psychology which shuns psychologisation, reductionism and neutrality. It provides invaluable insight into many of the most pressing and distressing issues we face in modern society, including the migrant and refugee crises affecting Europe; the devaluing of black lives in the USA; and the poverty, ill-health, and poor mental well-being that has resulted from ever-increasing austerity efforts in the UK. Including sections on critical perspectives, critical methodologies, and critical applications, this volume also focuses on issues within social cognition, self and identity. This one-stop handbook is an indispensable resource for a range of academics, students and researchers in the fields of psychology and sociology, and particularly those with an interest in social identity, power relations, and critical interventions.

**Advances in Questionnaire Design, Development, Evaluation and Testing** Nov 01 2022 A new and updated definitive resource for survey questionnaire testing and evaluation Building on the success of the first Questionnaire Development, Evaluation, and Testing (QDET) conference in 2002, this book brings together leading papers from the Second International Conference on Questionnaire Design, Development, Evaluation, and Testing (QDET2) held in 2016. The volume assesses the current state of the art and science of QDET; examines the importance of methodological attention to the questionnaire in the present world of information collection; and ponders how the QDET field can anticipate new trends and directions as information needs and data collection methods continue to evolve. Featuring contributions from international experts in survey methodology, *Advances in Questionnaire Design, Development, Evaluation and Testing* includes latest insights on question characteristics, usability testing, web probing, and other pretesting approaches, as well as: Recent developments in the design and evaluation of digital and self-administered surveys Strategies for comparing and combining questionnaire evaluation methods Approaches for cross-cultural and cross-national questionnaire development New data sources and methodological

innovations during the last 15 years Case studies and practical applications Advances in Questionnaire Design, Development, Evaluation and Testing serves as a forum to prepare researchers to meet the next generation of challenges, making it an excellent resource for researchers and practitioners in government, academia, and the private sector.

*Jesus in the Theology of Rowan Williams* Oct 08 2020 Brett Gray traces the portrayal of Christ that emerges throughout Williams' diverse writings, including in his engagements with literature and philosophy. What emerges is a vision of Jesus that grows from the roots of the Christian tradition, but is pronounced in a contemporary idiom and sensitive to modern concerns. Although attentive to the broad sweep of the Christian tradition, Williams' Christology is also seen in this book to be a particular British artefact, shaped in dialogue with thinkers such as Donald MacKinnon and Gillian Rose. What is ultimately brought to the surface in this work is the profoundly hopeful, if frequently under-pronounced, eschatology underlying Williams' Christology. Jesus is the “last word”, changing creation's possibilities and summoning it into an endless and vivifying journey.

Language-Based Approaches to Support Reading Comprehension Dec 30 2019 In this book, Falk-Ross and the contributing authors offer their different perspectives on supporting English language learners through specific strategies for assessment and instruction. It presents specific issues and challenges, supportive research and up-to-date information, classroom implications and strategies, and case study applications.

**In Dialogue with the Mahābhārata** Mar 13 2021 The Mahābhārata has been explored extensively as a work of mythology, epic poetry, and religious literature, but the text's philosophical dimensions have largely been under-

appreciated by Western scholars. This book explores the philosophical implications of the Mahābhārata by paying attention to the centrality of dialogue, both as the text's prevailing literary expression and its organising structure. Focusing on five sets of dialogues about controversial moral problems in the central story, this book shows that philosophical deliberation is an integral part of the narrative. Black argues that by paying attention to how characters make arguments and how dialogues unfold, we can better appreciate the Mahābhārata's philosophical significance and its potential contribution to debates in comparative philosophy today. This is a fresh perspective on the Mahābhārata that will be of great interest to any scholar working in religious studies, Indian/South Asian religions, comparative philosophy, and world literature.

**How to spot a lie. Response conflict, sensory details and other theory-based approaches to memory and deception detection** Jul 29 2022 Essay from the year 2017 in the subject Psychology - Forensic Psychology, Penal System, grade: nicht benotet, Ernst Moritz Arndt University of Greifswald, language: English, abstract: Early psychophysiological approaches were based on the assumption that anxiety in the situation of an examination discriminates between deceptive and truthful testimonies. Since then, different procedures have been developed that aim at detecting deception. The theoretical underpinnings of these procedures are diverse and differ in precision. This paper will propose a framework for deception research based on established psychological theories. This work begins with a brief review of the most important psychophysiological procedures used to detect memory and deception as well as their respective theoretical foundations. Then an attempt is made to build a conceptual framework for deception research based on established psychological theories. In this endeavour, the complex process of deception versus truthful memory-based reporting will be broken down into the simpler mental processes that can be theoretically expected to be involved. The theoretical assumptions on the mental processes behind lying will be linked to relevant neuropsychological and psychophysiological findings, while taking into consideration the typical restraints given in the context of applied deception detection.

**Routledge International Handbook of Consumer Psychology** Apr 13 2021 This unique handbook maps the growing field of consumer psychology in its increasingly global context. With contributions from over 70 scholars across four continents, the book reflects the cross-cultural and multidisciplinary character of the field. Chapters

relate the key consumer concepts to the progressive globalization of markets in which consumers act and consumption takes place. The book is divided into seven sections, offering a truly comprehensive reference work that covers: The historical foundations of the discipline and the rise of globalization The role of cognition and multisensory perception in consumers' judgements The social self, identity and well-being, including their relation to advertising Social and cultural influences on consumption, including politics and religion Decision making, attitudes and behaviorally based research Sustainable consumption and the role of branding The particularities of online settings in framing and affecting behavior The Routledge International Handbook of Consumer Psychology will be essential reading for anyone interested in how the perceptions, feelings and values of consumers interact with the decisions they make in relation to products and services in a global context. It will also be key reading for students and researchers across psychology and marketing, as well as professionals interested in a deeper understanding of the field.

*100 Questions about Women and Politics* Nov 08 2020 Both yesterday's suffragists and today's feminists have battled for women to vote and hold office, and their successes have made it possible for countries such as Argentina, Brazil, Germany, Iceland, Liberia, and the United Kingdom to have female heads of state. Despite these notable advances, women are still largely underrepresented in parliaments and governments around the world. Why, after so many years of feminist struggle, are women still obstructed from full political citizenship by a glass ceiling? Manon Tremblay's *100 Questions about Women and Politics* discusses electoral politics in Canada and abroad, focusing on women's rights to vote and run for office in legislative elections, political parties, voting systems, electoral quotas for women, and participation in parliaments and governments. Against a background of observations taken from academic research, Tremblay uses an innovative approach by dividing her book into 100 questions and answers to address a range of important issues. Are electorates sexist or lesbophobic? Are family responsibilities a real obstacle to women's engagement in politics? What strategies are available to increase the number of female politicians? Are gender quotas democratic? Once elected to office, do women represent women? How does women's political citizenship in Canada compare to that in other countries? A timely book on the unfinished work of representative democracy, *100 Questions about Women and Politics* takes a comprehensive yet concise approach to demystifying

the major issues dominating the study of gender and government.

Nutrition in Public Health Sep 18 2021 This second edition of a bestseller, Nutrition in Public Health: Principles, Policies, and Practice focuses on the role of the federal government in determining nutrition policy and influencing practice. Beginning with an overview of public health principles, the book examines the application of nutritional policy to dietary guidance, health promotion, and the practice of public health nutrition. Highlights of New Coverage in the Second Edition: Legislation such as Healthy, Hunger-Free Kids Act of 2010; Agricultural Act of 2014 (Farm Bill); and proposals for the next Farm Bill Discussions of study designs, the SEED-SCALE model for health promotion, health disparities and health equity, worksite wellness, Let's Move!, and other initiatives Impact of the ACA on menu labeling policies, the Ryan White HIV/AIDS Act, and legislation regarding breastfeeding Examination of health disparities, demographic trends, and health literacy; sexual orientation, gender identity, and gender expression; and the role of social media in tailored health communications 2010 Dietary Guidelines with analysis of potential upcoming changes in 2015 Dietary Guidelines, Healthy Eating Index 2010, MyPlate, and Harvard Healthy Eating Plate Best Bones Forever! Campaign, text messaging for tailored health communication, and 4 Day Throw Away study assessing the use of social media for education regarding food safety The book explores the importance of nutrition as a component of the broad field of public health. The authors review the principles of public health nutrition, examining nutritional epidemiology and programs that deal with health disparities, weight control challenges, and the needs of special populations. The text addresses the practice of public health nutrition through tools for conducting a food and nutrition assessment of a community, designing and

carrying out a social marketing campaign, and developing large and small grant proposals. Nutrition in Public Health provides an integrated view of nutrition needs and the policies and political mechanisms that affect the delivery of quality food and nutrition services. It gives students a thorough understanding of the federal government's role in determining nutrition policy and influencing practice.

**Testing Lecture Comprehension Through Listening-to-summarize Cloze Tasks** Dec 10 2020 This book explores the effectiveness of listen-to-summarize tasks as a tool to assess lecture comprehension ability. It especially focuses on listen-to-summarize tasks that represent listeners' meaning building and the discourse construction of the lecture for listening assessment purposes. It discusses in depth the nature of lecture comprehension and introduces the approaches to assessing it. It also presents teachers' and students' perceptions of listen-to-summarize task demands and their respective implications. By observing interactions between test-takers' cognitive processes and the task itself, the book explores the effectiveness of these tasks. It also examines the discrepancy in cognitive processes between different language competence levels in detail, shedding light upon current research on lecture comprehension assessment and offering insights into listening comprehension instruction.

**Closing the Feedback Loop** Oct 20 2021 Enhanced transparency, accountability, and government or donor responsiveness to people needs are imperative to achieve better and more sustainable development results on the ground. The rapid spread of new technologies is transforming the daily lives of millions of poor people around the world and has the potential to be a real game changer for development. Improved accountability and responsiveness are critical for reaching the goals of eliminating extreme poverty and promoting shared prosperity with a focus on improving the well-being of the most vulnerable and marginalized groups in society. Within the broader political economy context, many questions remain unanswered about the role that new technologies can play to act as an accelerator for closing the accountability gap. Within this context, this report brings together new evidence from leading academics and practitioners on the effects of technology-enabled citizen engagement. The report aims to address the following four main questions: how do new technologies empower communities through participation, transparency, and accountability?; are technologies an accelerator for closing the accountability gap - the space

between supply (governments, service providers) and demand (citizens, communities, civil society organizations) that must be bridged for open and collaborative governance?; under what conditions does this occur?; and what are the experiences and lessons learned from existing grassroots innovators and donor-supported citizen engagement and crowdsourcing programs, and how can these programs be replicated or scaled up?. The report presents a theoretical framework about the linkages between new technologies, participation, empowerment, and the improvement of poor people's human well-being based on Amartya Sen's capability approach. The book provides rich case studies about the different factors that influence whether or not information and communication technology (ICT)-enabled citizen engagement programs can improve the delivery and quality of public services to poor communities. The report analyzes in depth both the factors and process of using new technologies to enhance the delivery of primary health services to pregnant women in Karnataka, India, and of several community mapping and crowdsourcing programs in Guinea, Haiti, Kenya, Libya, Sudan, and other countries.

**Psychobiographical Illustrations on Meaning and Identity in Sociocultural Contexts** Mar 01 2020 This book explores psychobiography with focus on meaning making and identity development in the life and works of extraordinary individuals. Meaning-making and identity development are existential constructs influencing psychological development, mental health and wellbeing across the lifecourse. The chapters illustrate through the eyes of 25 international psychobiographers various theoretical and methodological approaches to psychobiography. They explore how individuals, such as Angela Merkel, Karl Lagerfeld, Henri Nouwen, Vivian Maier, Charles Baudelaire, W.E.B. du Bois, Loránt Hegedüs, Kim Philby, Zoltan Paul Dienes, Albertina Sisulu, Ruth First, Sokrates, and Jesus construct their lives to make meaning, develop their identities and grow as individuals within their sociocultural contexts. The texts provide deep insight into life's development.

Integrating Timing Considerations to Improve Testing Practices May 27 2022 Integrating Timing Considerations to Improve Testing Practices synthesizes a wealth of theory and research on time issues in assessment into actionable advice for test development, administration, and scoring. One of the major advantages of computer-based testing is the capability to passively record test-taking metadata—including how examinees use time and how time affects testing outcomes. This has opened many questions for testing administrators. Is there a trade-off between speed and

accuracy in test taking? What considerations should influence equitable decisions about extended-time accommodations? How can test administrators use timing data to balance the costs and resulting validity of tests administered at commercial testing centers? In this comprehensive volume, experts in the field discuss the impact of timing considerations, constraints, and policies on valid score interpretations; administrative accommodations, test construction, and examinees' experiences and behaviors; and how to implement the findings into practice. These 12 chapters provide invaluable resources for testing professionals to better understand the inextricable links between effective time allocation and the purposes of high-stakes testing. The Open Access version of this book, available at <http://www.taylorfrancis.com>, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

**Bureaucracy and Self-Government** Jul 17 2021 The second edition includes reviews of Jeffersonian impacts on administrative theory and practice and Jacksonian developments in national administrative structures and functions, a look at the administrative theorizing that presaged progressive reforms in civil service, and insight into the confounding complexities that characterize public thinking about administration in a postmodern political order.

Handbook of Research on Mixed Methods Research in Information Science Apr 25 2022 Mixed methods research is becoming prevalent in many fields, yet little has been done to elevate mixed methods research in information science. A comprehensive picture of information science and its problems is needed to further understand and address the issues associated with it as well as how mixed methods research can be adapted and used. The Handbook of Research on Mixed Methods Research in Information Science discusses the quality of mixed methods studies and methodological transparency, sampling in mixed methods research, and the application of theory in mixed methods research throughout various contexts. Covering topics such as the issues and potential directions for further research in mixed methods, this comprehensive major reference work is ideal for researchers, policymakers, academicians, librarians, practitioners, instructors, and students.

**Massive Open Online Courses and Higher Education** Feb 09 2021 Since the first MOOC was launched at the University of Manitoba in 2008, this new form of the massification of higher education has been a rollercoaster ride for the university sector. The New York Times famously declared 2012 to be the year of the MOOC. However, by

2014, the number of academic leaders who believed the model was unsustainable doubled to more than 50%. While the MOOC hype has somewhat subsided, the attitudes and anxieties of this peak time can still be seen influencing universities and their administrations. This is the first volume that addresses Massive Open Online Courses from a post-MOOC perspective. We move beyond the initial hype and revolutionary promises of the peak-MOOC period and take a sober look at what endures in an area that is still rapidly growing, albeit without the headlines. This book explores the future of the MOOC in higher education by examining what went right, what went wrong and where to next for the massification of higher education and online learning and teaching. The chapters in this collection address these questions from a wide variety of different backgrounds, methodologies and regional perspectives. They explore learner experiences, the move towards course for credit, innovative design, transformations and implications of the MOOC in turn. This book is valuable reading for students and academics interested in education, eLearning, globalisation and information services.

**Crisis Standards of Care** May 03 2020 Disasters and public health emergencies can stress health care systems to the breaking point and disrupt delivery of vital medical services. During such crises, hospitals and long-term care facilities may be without power; trained staff, ambulances, medical supplies and beds could be in short supply; and alternate care facilities may need to be used. Planning for these situations is necessary to provide the best possible health care during a crisis and, if needed, equitably allocate scarce resources. **Crisis Standards of Care: A Toolkit for Indicators and Triggers** examines indicators and triggers that guide the implementation of crisis standards of care and provides a discussion toolkit to help stakeholders establish indicators and triggers for their own communities. Together, indicators and triggers help guide operational decision making about providing care during public health and medical emergencies and disasters. Indicators and triggers represent the information and actions taken at specific thresholds that guide incident recognition, response, and recovery. This report discusses indicators and triggers for both a slow onset scenario, such as pandemic influenza, and a no-notice scenario, such as an earthquake. **Crisis Standards of Care** features discussion toolkits customized to help various stakeholders develop indicators and triggers for their own organizations, agencies, and jurisdictions. The toolkit contains scenarios, key questions, and

examples of indicators, triggers, and tactics to help promote discussion. In addition to common elements designed to facilitate integrated planning, the toolkit contains chapters specifically customized for emergency management, public health, emergency medical services, hospital and acute care, and out-of-hospital care.

Green Finance, Sustainable Development and the Belt and Road Initiative Jun 15 2021 Can China's Belt and Road Initiative (BRI) promote sustainable development, alongside its primary aims of increasing commercial connectivity with China's partners? In discussions of the BRI the focus has tended to be on the implications for infrastructure construction, connectivity, and economic diplomacy. Rather less attention has been paid to its potential impact on sustainability. The initiative has not only set principles to prevent climate change and promote sustainable development, but also pledged to align with the UN's environmental objectives. The contributors to this volume describe and evaluate the consequent policy coordination in the areas of green finance, green energy, and sustainable development in the Belt and Road regions. They examine both the challenges and opportunities of these projects, and the role that Hong Kong can play in supporting their assessment, finance, and implementation. With contributions from authors based in mainland China, Hong Kong, Australia, Qatar, the UK, and the US – with experience in corporate social responsibility, international finance, environmental policy, and international relations – this book presents a thorough and rigorous analysis of the green side of the BRI. A valuable resource for scholars of the BRI and its many implications for China, its partners, and the development of sustainable infrastructure.

Intimate Rivals Feb 21 2022 No country feels China's rise more deeply than Japan. Through intricate case studies of visits by Japanese politicians to the Yasukuni Shrine, conflicts over the boundaries of economic zones in the East China Sea, concerns about food safety, and strategies of island defense, Sheila A. Smith explores the policy issues testing the Japanese government as it tries to navigate its relationship with an advancing China. Smith finds that Japan's interactions with China extend far beyond the negotiations between diplomats and include a broad array of social actors intent on influencing the Sino-Japanese relationship. Some of the tensions complicating Japan's encounters with China, such as those surrounding the Yasukuni Shrine or territorial disputes, have deep roots in the postwar era, and political advocates seeking a stronger Japanese state organize themselves around these causes.

Other tensions manifest themselves during the institutional and regulatory reform of maritime boundary and food safety issues. Smith scrutinizes the role of the Japanese government in coping with contention as China's influence grows and Japanese citizens demand more protection. Underlying the government's efforts is Japan's insecurity about its own capacity for change and its waning status as the leading economy in Asia. For many, China's rise means Japan's decline, and Smith suggests how Japan can maintain its regional and global clout as confidence in its postwar diplomatic and security approach diminishes.

**United States of Jihad** Sep 26 2019 A riveting, panoramic look at “homegrown” Islamist terrorism from 9/11 to the present Since 9/11, more than three hundred Americans—born and raised in Minnesota, Alabama, New Jersey, and elsewhere—have been indicted or convicted of terrorism charges. Some have taken the fight abroad: an American was among those who planned the attacks in Mumbai, and more than eighty U.S. citizens have been charged with ISIS-related crimes. Others have acted on American soil, as with the attacks at Fort Hood, the Boston Marathon, and in San Bernardino. What motivates them, how are they trained, and what do we sacrifice in our efforts to track them? Paced like a detective story, *United States of Jihad* tells the entwined stories of the key actors on the American front. Among the perpetrators are Anwar al-Awlaki, the New Mexico-born radical cleric who became the first American citizen killed by a CIA drone and who mentored the Charlie Hebdo shooters; Samir Khan, whose Inspire webzine has rallied terrorists around the world, including the Tsarnaev brothers; and Omar Hammami, an Alabama native and hip hop fan who became a fixture in al Shabaab’s propaganda videos until fatally displeasing his superiors. Drawing on his extensive network of intelligence contacts, from the National Counterterrorism Center and the FBI to the NYPD, Peter Bergen also offers an inside look at the controversial tactics of the agencies tracking potential terrorists—from infiltrating mosques to massive surveillance; at the bias experienced by innocent observant Muslims at the hands of law enforcement; at the critics and defenders of U.S. policies on terrorism; and at how social media has revolutionized terrorism. Lucid and rigorously researched, *United States of Jihad* is an essential new analysis of the Americans who have embraced militant Islam both here and abroad. — Washington Post, Notable Non-Fiction Books in 2016

**Counselling Skills for Social Workers** Aug 18 2021 Counselling skills are very powerful. Really listening and providing compassionate empathy without judging is a core part of social work practice with service users. This book provides a theoretically informed understanding of the core skills required to provide counselling interventions that work. It provides detailed discussion of three core skills which are identified as: talking and responding, listening and observing and thinking. Over 11 chapters these core skills are described in terms of what they mean, how they can be learned and developed, how they can be used and misused and, most importantly, how specific skills can be employed in a coherent and evidence-informed counselling approach. Loughran also looks in detail at the skills required to deliver interventions consistent with three approaches: Motivational Interviewing, Solution-Focused Work and Group work. Illustrative case examples and exercises offer further opportunities for reflection and exploration of self-awareness as well as for practising and enhancing skills development, thus making the book required reading for all social work students, professionals looking to develop their counselling skills and those

working in the helping professions more generally. Terms such as social worker, therapist and counsellor will be included as they inform counselling skills in social work.
