Imitations of Life

Jul 01 2020 In the early 1920s, Fannie Hurst's enormous popularity made her the highest-paid writer in America. She conquered the literary scene at the same time the silent movie industry began to emerge as a tremendously profitable and popular form of entertainment. Abe C. Ravitz parallels Hurst's growing acclaim with the evolution of silent films, from which she borrowed ideas and techniques that furthered her career. Ravitz notes that Hurst was amazingly adept at anticipating what the public wanted. Sensing that the

national interest was shifting from rural to urban subjects, Hurst set her immigrant tales and her "woiking goil" tales in urban America. In her early stories, she tried to bridge the gap between Old World and New World citizens, each somewhat fearful and suspicious of the other. She wrote of love and ethnicity—bringing the Jewish Mother to prominence—of race relations and prejudice, of the woman alone in her quest for selfhood. Ravitz argues, in fact, that her socially oriented tales and her portraits of women in the city clearly identify her as a forerunner of contemporary

feminism. **D. Ravitz File**

brings to life the popular culture from 1910 through the 1920s, tracing the meteoric rise of Hurst and depicting the colorful cast of characters surrounding her. He reproduces for the first time the Hurst correspondence with Theodore Dreiser, Charles and Kathleen Norris, and Gertrude Atherton. Fellow writers Rex Beach and Vachel Lindsay also play important roles in Ravitz's portrait of Hurst, as does Zora Neale Hurston, who awakened Hurst's interest in the Harlem Renaissance and in race relations, as shown in Hurst's novel *Imitation of Life*.

The Purpose Economy: How Your Desire for Impact, Personal Growth and Community Is Changing the World

Sep 03 2020

A series of shifts are happening in our economy: Millennials are trading in conventional career paths to launch tech start-ups, start small businesses that are rooted in local communities, or freelance their expertise. We are sharing everything, from bikes and cars, to extra rooms in our homes. We now create, buy and sell handcrafted

products in our local communities with ease. Globally recognized entrepreneur, founder of Taproot Foundation and CEO of Imperative, Aaron Hurst, argues in his latest book that while these developments seem unrelated at first, taken together they reveal a powerful pattern that points to purpose as the new driver of the American economy. Like the Information Economy, which has driven innovation and economic growth until now, Hurst argues that our new economic era is driven by connecting people to their purpose. It's an economy

establishing purpose for employees and customers through serving needs greater than their own, enabling personal growth and building community. Based on interviews with thousands of entrepreneurs, Hurst shows this new era is already fueling demand for a whole host of products and services and transforming how millennials view their careers. A new breed of startups like Etsy, Zaarly, Tough Mudder, Kickstarter, and Airbnb are finding new ways to create value by connecting us with our local communities. At the same time, companies like

Tesla and Whole Foods are making the march from just appealing to affluent buyers to becoming mainstream brands. Hurst calls these companies, along with the pioneering entrepreneurs who founded them, the Purpose Economy's taste-makers. This book is at once a personal memoir of Aaron Hurst's own awakening as a purpose driven entrepreneur, when he left a well-paying tech job in 2001 to launch Taproot, creating a pathway for millions of professionals and Fortune 500 companies to volunteer for nonprofits. It's also a blueprint for a new economic era that is transforming companies, markets

and our careers to better serve people and the world.

Hob Hurst's House
Jul 25 2022 One sunny day an odd looking man, short in stature and over large in head, moves into a farm on the edge of a moorland village. Accompanied by his heavily pregnant young wife and disobedient maid he then scuttles off on business and leaves the women to their

own devices. Rumours abound as to the history and dealings of the strange little merchant, Hobart Hurst. These are the mid seventeen hundreds in Yorkshire, in the north of England. The drama is swept up in the landscape of the North Yorkshire Moors. In a time where farming, family and keeping going are key, enlightenment and discovery are breaking new boundaries whilst the old ways and folk beliefs still cling on in the background: tales of wise women, witches and most importantly, the old legends of hobgoblins.

Mastering Hurst Cycle Analysis Aug 26 2022 One of the best classical methods of technical analysis brought up to date This book offers a modern treatment of Hurst's original system of market cycle analysis. It will teach you how to get to the point where you can isolate cycles in any freely-traded financial instrument and make an assessment of their likely future course. Although Hurst's methodology can seem outwardly complex, the logic underpinning it is straightforward. With practice the skill needed to conduct a full cycle analysis quickly and effectively will become second nature. The

rewards for becoming adept are high conviction trades, tight risk management and mastery of a largely non-correlated system of analysis. In this extensive step-by-step guide you will find a full description of the principal tools and techniques taught by Hurst as well as over 120 colour charts, together with tables and diagrams. The *Update and TradeStation code* for all of the indicators shown is also included. *Annual Report of the Ohio State Board of Agriculture* Nov 05 2020 Reports for 1862-66 include reports of the Ohio Pomological Society.

Brownian Motion*

Feb 20 2022 This book is devoted to a number of stochastic models that display scale invariance. It primarily focuses on three issues: probabilistic properties, statistical estimation and simulation of the processes considered. It will be of interest to probability specialists, who will find here an uncomplicated presentation of statistics tools and to those statisticians who wants to tackle the most recent

theories in probability in order to develop Central Limit Theorems in this context; both groups will also benefit from the section on simulation. Algorithms are described in great detail, with a focus on procedures that is not usually found in mathematical treatises. The models studied are fractional Brownian motions and processes that derive from them through stochastic differential equations. Concerning the proofs of the limit theorems, the “Fourth Moment Theorem” is systematically used, as it produces rapid and helpful proofs that can serve as models for the

future. Readers will also find elegant and new proofs for almost sure convergence. The use of diffusion models driven by fractional noise has been popular for more than two decades now. This popularity is due both to the mathematics itself and to its fields of application. With regard to the latter, fractional models are useful for modeling real-life events such as value assets in financial markets, chaos in quantum physics, river flows through time, irregular images, weather events and contaminant diffusion problems.
