Religious Dynamics under the Impact of Imperialism and Colonialism Mar 25 2022 This edited volume on religious dynamics features source texts from all over Asia, the Middle East, and Europe, which show original authors' thoughts on religion as they the shared challenges of an age dominated by imperialism and colonialism.

The Soviet Scholar-Bureaucrat May 03 2020 Mikhail Nikolaevich bridges 19th- and 20th-century Russian culture as well as Leninism and Stalinism, and later became an instrument in Khrushchev's effort at de-Stalinization. Pokrovskii was born in Moscow in 1868. He described the years before 1905 as his time of "democratic illusions and economic materialism." His interest in legal Marxism began in the 1890's but it was only with the Revolution of 1905 that he stepped into the Marxist camp. Pokrovskii was a leader in the creation of the "historical front"—an organization of scholars authorized to work out a Marxist theory of the past. He formalized the bond between scholarship and politics through his belief that historians should assist party authorities in effecting a cultural revolution; thus he supported Stalin's collectivization of agriculture and leg a campaign to silence non-Marxist scholars, some of whom he had defended earlier. Yet his accommodation with Stalin was uneasy, and after Pokrovskii's death in 1932 his allegedly "abstract sociological schemes" were condemned and his career was dubbed pokrovshchina—era of the wicked deeds of Pokrovskii.

[The Political Discourse on International Aid](#) Aug 30 2022 Thesis (M.A.) from the year 2019 in the subject Politics - International Politics - Topic: International development, grade: 30 lode, , language: English, abstract: The goal of the study is to identify and analyse the concept of international aid and political discourse on it. It compares foreign aid with theory of neocolonialism. What does development aid have to do with the theory of neocolonialism? Is international aid a mean to conduct neocolonialism? Should international aid be called aid? Chapter 1 is introductory and describes multiple theories related to colonialism and neocolonialism, such as eurocentrism, orientalism, imperialism, globalisation post-colonialism and others. Chapter 2 presents a great array of speeches, interviews and other documents from recent years which raise the topic of international aid. Chapter 3 consists of 2 parts. Part one focuses of the concept of international aid. The second part explains what political discourse has to do with neocolonialism. It examines the words of politician in the light of neocolonial theories. It investigates if international aid is really an aid. At the end conclusions are drawn. The analysis of multiple speeches interviews and documents showed that there is a great amount of similarities in those to 2 concepts. Indeed, international aid might be a way to conduct neocolonialism.

Imperialism after the Neoliberal Turn Oct 08 2020 This book explores how imperialism has been evolving in the neoliberal era, with the aim of providing a systematic and integrative understanding of the inner dynamics and vulnerabilities of the contemporary imperialist system. Asking how it has been possible to sustain an imperialist system that fails to address the problems of unemployment, declining standards of living and globalizing conflicts, the author draws upon theoretical and empirical contributions from the current literature to further recent efforts at re-conceptualizing imperialism under the conditions of neoliberal globalization and advances a critique of the school of transnationalism in global political economy. The author puts forward that contemporary imperialism rests on a triangular structure composed of (a) economic imperialism, which is driven by a neoliberal logic of maximizing monopoly profits at massive societal costs; (b) military imperialism, which is shaped by the neoliberal transformation of the US military-industrial complex with the rise of private armies, the globalization of narcocapitalism, and the weaponization of Islamist terrorism and ethno-religious divides; and (c) cultural imperialism, which is led by the media- and nonprofit-corporate complexes, having weaponized the media and civil society in manufacturing popular consent. The book's arguments are also extended to the current challenges of imperialism embodied in the rise of the BRICS, post-hegemonic forms of regional cooperation, and global popular resistance. As such, it will appeal to scholars of politics and sociology with interests in globalization, imperialism, capitalism, and global power.

[Ecological Imperialism, Development, and the Capitalist World-System](#) Nov 08 2020 Two major trends are currently challenging the sustainability of human civilization: extreme inequality and the ecological crisis. This book argues that these are intrinsically linked by further exploring the complex relationships between global ecological crises, neoliberal globalization, orthodox development policies, and imperialism. Drawn from extensive theoretical, historical,

policy, and empirical research, as well as fieldwork in Africa and Asia, this book examines the crucial characteristics of the capitalist world-system and how it enables and drives ecological imperialism. Neoliberal globalization has allowed for capital's unfettered access to and exploitation of nature across the planet, and neoliberal development policies have reinforced a contemporary form of ecological imperialism where the environments of the Global South are enclosed and exploited and local communities are dispossessed of their land and livelihoods. Simultaneously, resources from the Global South are funnelled to the Global North in the form of consumer goods and ecologically unequal exchange, while the profits from those resources are siphoned away to transnational corporations, financiers and government elites. This work traces the historical development of free market policies, while also paying special attention to the role of Northern international financial institutions, emerging economies (the semi-periphery), and the often-hidden role of international finance, in ecological imperialism. This volume will be of keen interest to scholars and students of political economy, critical development studies, environmental sociology, and political ecology.

Governing Taiwan and Tibet Dec 22 2021 When it comes to talking about democracy in China, Chinese nationalists argue that it cannot solve China's problems, while Chinese liberals remain unduly silenced. But China is facing a national identity crisis, compounded by Tibet and Taiwan, where significant proportions of both populations do not identify with the Chinese nation-state. Could democracy realistically address the problems in China's national identity? Baogang He opens up a dialogue in which Chinese liberals can offer viable alternatives in defence of key democratic principles and governance. He upholds the search for a political space in which democratic governance in China can feasibly be developed.

Roman Imperialism Nov 01 2022 Across 800 years, the Romans established and maintained a Mediterranean-wide empire from Spain to Syria and from the North Sea to North Africa. This study analyzes the debate over Roman imperialism from ancient times to the present.

Fuzzy Techniques: Theory and Applications Jul 05 2020 This book describes the latest findings related to fuzzy techniques, discussing applications in control, economics, education, humor studies, industrial engineering, linguistics, management, marketing, medicine and public health, military engineering, robotics, ship design, sports, transportation, and many other areas. It also presents recent fuzzy-related algorithms and theoretical results that can be used in other application areas. Featuring selected papers from the Joint World Congress of the International Fuzzy Systems Association (IFSA) and the Annual Conference of the North American Fuzzy Information Processing Society (NAFIPS) IFSA-NAFIPS' 2019, held in Lafayette, Louisiana, USA, on June 18–21, 2019, the book is of interest to practitioners wanting to use fuzzy techniques to process imprecise expert knowledge. It is also a valuable resource for researchers wishing to extend the ideas from these papers to new application areas, for graduate students and for anyone else interested in problems involving fuzziness and uncertainty.

Marxist Theories of Imperialism Jul 25 2019 The last two hundred years have seen a massive increase in the size of the world economy and equally massive inequalities of wealth and power between different parts of the world. They have also witnessed the rise to dominance of the capitalist mode of production. Marxists, from Marx himself through to present day thinkers, have argued that these changes are profoundly interconnected. This book offers a unique account of Marxist theories of Imperialism. It has been fully updated and expanded to cover all the developments since its initial publication and will be essential reading for any student of Marxism.

Intelligent Information and Database Systems Jun 23 2019 The three-volume set LNAI 7196, LNAI 7197 and LNAI 7198 constitutes the refereed proceedings of the 4th Asian Conference on Intelligent Information and Database Systems, ACIIDS 2012, held in Kaohsiung, Taiwan in March 2012. The 161 revised papers presented were carefully reviewed and selected from more than 472 submissions. The papers included cover the following topics: intelligent database systems, data warehouses and data mining, natural language processing and computational linguistics, semantic Web, social networks and recommendation systems, collaborative systems and applications, e-business and e-commerce systems, e-learning systems, information modeling and requirements engineering, information retrieval systems, intelligent agents and multi-agent systems, intelligent information systems, intelligent internet systems, intelligent optimization techniques, object-relational DBMS, ontologies and knowledge sharing, semi-structured and XML database systems, unified modeling language and unified processes, Web services and semantic Web, computer networks and communication systems.

Seeking Imperialism's Embrace Feb 09 2021 In 1946, at a time when other French colonies were just beginning to break free of French imperial control, the people of the French Antilles-the Caribbean islands of Martinique and Guadeloupe-voted to join the French nation as departments (Départments d'outre mer, or DOMs). Eschewing independence in favor of complete integration with the metropole, the people of the French Antilles affirmed their Frenchness in an important decision that would define their citizenship and shape their politics for decades to come. For Antilleans, this novel path was the natural culmination of a centuries-long quest for recognition of their equality with the French and a means of overcoming the entrenched political and economic power of the islands' white minority. Disappointment with departmentalization quickly set in, Kristen Stromberg Childers shows in this work, as the promised equality was slow in coming and Antillean contributions to World War II went unrecognized. Champions of departmentalization such as Aimé Césaire argued that the "race-blind" Republic was far from universal and egalitarian. The French government struggled to stem unrest through economic development, tourism, and immigration to the metropole, where labor was in short supply. Antilleans fought against racial and gender stereotypes imposed on them by European French and sought to stem the tide of white metropolitan workers arriving in the Antilles. Although departmentalization has been criticized as a weak alternative to national independence, it was overwhelmingly popular among Antilleans at the time of the vote, and subsequent disappointment reflects the broken promises of assimilation more than the misguided nature of the decision. Contrasting with the wars of decolonization in Algeria and Vietnam, *Seeking Imperialism's Embrace* examines the Antilleans' more peaceful but perhaps equally vexing process of forging a national identity in the French empire.

Economics Made Fun Apr 01 2020 Best-selling books such as *Freakonomics* and *The Undercover Economist* have paved the way for the flourishing economics-made-fun genre. While books like these present economics as a strong and explanatory science, the ongoing economic crisis has exposed the shortcomings of economics to the general public. In the face of this crisis, many people, including well-known economists such as Paul Krugman, have started to express their doubts about whether economics is a success as a science. As well as academic papers, newspaper columns with a large audience have discussed the failure of economic to predict and explain ongoing trends. The emerging picture is somewhat confusing: economics-made-fun books present economics as a method of thinking that can successfully explain everyday and "freaky" phenomena. On the other hand, however, economics seems to fail in addressing and explaining the most pressing matters related to the field of economics itself. This book explores the confusion created by this contradictory picture of economics. Could a science that cannot answer its own core questions really be used to explain the logic of everyday life? This book was originally published as a special issue of the *Journal of Economic Methodology*.

Colonialism and Welfare Nov 20 2021 The British Empire is part covered three centuries, five continents and onequarter of the world's population. Its legacy continues, shaping the societies and welfare policies of much of the

modern world. In this book, for the first time, this legacy is explored and analysed. Colonialism and Welfare reveals that social welfare policies, often discriminatory, and challenging to those colonised were introduced and imposed by the 'mother country.' It highlights that there was great diversity in rationales and impacts across the empire, but past developments had a major impact on the development of much of the world's population. Contributions from every continent explore both the diversity and the common themes in the imperial experience. They examine the legacy of colonial welfare - a subject largely neglected by both historians of empire and social policy analysts. This original book shows that social welfare today cannot be understood without understanding the legacy of the British Empire. Academics, specialised students with an interest in comparative social policy, history of social policy, imperial history, colonialism, and contemporary third world social policy will find this book invaluable to their studies.

The Political Economy of Imperialism Mar 13 2021 From the British Empire to the WTO, imperialism and its political economy have turned the world upside down. This volume of original essays by internationally noted scholars traces the spread of imperialism and capitalism and demonstrates that globalization is not a New Millennium phenomenon, but rather one with classic roots as well as contemporary reverberations.

Liberal Imperialism in Germany Jun 27 2022 In a work based on new archival, press, and literary sources, the author revises the picture of German imperialism as being the brainchild of a Machiavellian Bismarck or the "conservative revolutionaries" of the twentieth century. Instead, Fitzpatrick argues for the liberal origins of German imperialism, by demonstrating the links between nationalism and expansionism in a study that surveys the half century of imperialist agitation and activity leading up to the official founding of Germany's colonial empire in 1884.

The Changing Face of Imperialism May 15 2021 This volume reiterates the relevance of imperialism in the present, as a continuous arrangement, from the early years of empire-colonies to the prevailing pattern of expropriation across the globe. While imperialism as an arrangement of exploitation has sustained over ages, measures deployed to achieve the goals have gone through variations, depending on the network of the prevailing power structure. Providing a historical as well as a conceptual account of imperialism in its 'classical' context, this collection brings to the fore an underlying unity which runs across the diverse pattern of imperialist order over time. Dealing with theory, the past and the contemporary, the study concludes by delving into the current conjuncture in Latin America, the United States and Asia. The Changing Face of Imperialism will provide fresh ideas for future research into the shifting patterns of expropriation - spanning the early years of sea-borne plunder and the empire-colonies of nineteenth-century to contemporary capitalism, which is rooted in neoliberalism, globalization and free market ideology. With contributions from major experts in the field, this book will be a significant intervention. It will be of interest to scholars and researchers of economics, politics, sociology and history, especially those dealing with imperial history and colonialism.

Iberian Imperialism and Language Evolution in Latin America Oct 20 2021 As rich as the development of the Spanish and Portuguese languages has been in Latin America, no single book has attempted to chart their complex history. Gathering essays by sociohistorical linguists working across the region, Salikoko S. Mufwene does just that in this book. Exploring the many different contact points between Iberian colonialism and indigenous cultures, the contributors identify the crucial parameters of language evolution that have led to today's state of linguistic diversity in Latin America. The essays approach language development through an ecological lens, exploring the effects of politics, economics, cultural contact, and natural resources on the indigenization of Spanish and Portuguese in a variety of local settings. They show how languages adapt to new environments, peoples, and practices, and the ramifications of this for the spread of colonial languages, the loss or survival of indigenous ones, and the way hybrid vernaculars get situated in larger political and cultural forces. The result is a sophisticated look at language as a natural phenomenon, one that meets a host of influences with remarkable plasticity.

The Political Economy of Imperialism Aug 06 2020 This book brings together important essays by distinguished scholars who have devoted past attention to the study of imperialism and development. It complements an anthology of previously published essays that brings together important theoretical perspectives around the issues and debates on these themes; this volume will be published by Humanity Press (forthcoming). Both projects relate to a lengthy chapter "Theories of Imperialism," which will be published in my book *Theories of Comparative Political Economy* (Forthcoming). These projects represent a culmination of many years of teaching in both economics and political science. During that time I taught two political science courses on development and underdevelopment, but I was unable to convince my colleagues of the usefulness of a course on imperialism that linked historical issues and debates with the more recent developmental literature. When in 1990 I was welcomed into economics, my colleagues endorsed a graduate seminar on the political economy of imperialism. Thus, this volume evolved out of that experience in an effort to encourage new analysis that reflects retrospectively on past contributions as well as the prospects for imperialism and development in the contemporary world.

The Greek Superpower Nov 28 2019 Greeks - in later times - saw Athens as 'the Hellas of Hellas', but in the classical period many Athenians thought otherwise. Athens might be a school of Hellas, but the school of Hellas was Sparta. Militarily and morally, Sparta was supreme. This book explores how Athenians - ordinary citizens as well as writers and politicians - thought about Sparta's superiority. Nine new studies from a distinguished international cast examine how Athenians might revere Sparta even as they fought her. This respect led to Plato's literary creation of fantasy cities (in the Republic and Laws) to imitate Spartan methods. And, after its military surrender in 404 BC, ruling Athenian politicians claimed that their city was to be remodelled as itself a New Sparta.

The Struggle against Imperialism Aug 25 2019 This concise and engaging text argues that the Cold War and anti-colonial movements should properly be studied and taught together, not as distinct developments, but rather as interwoven aspects of a complex global transformation. The authors provide a cogent and concise description of the post-World War II era and reveal connective dimensions of that era that remain hidden in books that focus primarily on either the Cold War or the struggles against imperial rule. It not only deals with anti-colonialism and Cold War together but also portrays the Cold War as a contest between "anti-imperialist empires," capped by the collapse of one of them—the multicultural trans-regional Soviet realm—in a work that is engaging and accessible to both students and general readers.

From Economics Imperialism to Freakonomics Aug 18 2021 Is or has economics ever been the imperial social science? Could or should it ever be so? These are the central concerns of this book. It involves a critical reflection on the process of how economics became the way it is, in terms of a narrow and intolerant orthodoxy, that has, nonetheless, increasingly directed its attention to appropriating the subject matter of other social sciences through the process termed "economics imperialism". In other words, the book addresses the shifting boundaries between economics and the other social sciences as seen from the confines of the dismal science, with some reflection on the responses to the economic imperialists by other disciplines. Significantly, an old economics imperialism is identified of the "as if market" style most closely associated with Gary Becker, the public choice theory of Buchanan and Tullock and cliometrics. But this has given way to a more "revolutionary" form of economics imperialism associated with the information-theoretic economics of Akerlof and Stiglitz, and the new institutional economics of Coase, Williamson and North. Embracing one "new" field after another, economics imperialism reaches its most extreme version in the form of "freakonomics", the economic theory of everything on the basis of the most shallow principles. By way of contrast and as a guiding critical thread, a thorough review is offered of the appropriate principles underpinning political economy and its relationship to social science, and how these have been and continue to be deployed. The case is made for political economy with an interdisciplinary character, able to bridge the gap between economics and other social sciences, and draw upon and interrogate the nature of contemporary capitalism.

An Analysis of John A. Hobson's Imperialism Apr 13 2021 English economist John Hobson's 1902 *Imperialism: A Study* was an epoch-making study of the politics and economics of imperialism that shook imperialist beliefs to their core. A committed liberal, Hobson was deeply sceptical about the aims and claims of imperialistic thought at a time when Britain's empire held sway over a vast portion of the globe. In order to critique what he saw as a falsely reasoned and immoral political view, Hobson's book took a cuttingly analytical approach to the idea of imperialism - setting out to dissect and understand the arguments for empire before subjecting them to withering evaluation - a process that led him to the key insight that the then widely-accepted claim that imperialism was essentially a question of nationalism was, in fact, quite weak. Instead, Hobson's close analysis of the implicit and hidden reasons for imperialist projects demonstrated that, at root, they were all products of capitalism. It became increasingly clear to him that imperialism was less a political ideology, and more the product of the urgent need to open up new markets

and remedy economic stagnation at home. Deeply provocative at the time, Hobson's book shows just how powerful the critical thinking skills of analysis and evaluation can be when applied to deconstruction of even the most widely accepted of ideas.

The Nature of German Imperialism Jun 15 2021 Today, the East African state of Tanzania is renowned for wildlife preserves such as the Serengeti National Park, the Ngorongoro Conservation Area, and the Selous Game Reserve. Yet few know that most of these initiatives emerged from decades of German colonial rule. This book gives the first full account of Tanzanian wildlife conservation up until World War I, focusing upon elephant hunting and the ivory trade as vital factors in a shift from exploitation to preservation that increasingly excluded indigenous Africans. Analyzing the formative interactions between colonial governance and the natural world, *The Nature of German Imperialism* situates East African wildlife policies within the global emergence of conservationist sensibilities around 1900.

Imperialism Jul 17 2021 The philosopher W.B. Gallie argued many years ago that there could be no simple definition of words such as 'freedom' because they embodied what he called 'essentially contested concepts'. They were words whose meaning had to be fought over and whose competing definitions arose out of political struggle and conflict. Imperialism, and its close ally, colonialism, are two such contested concepts. This set will give readers an insight in to the main lines of debate about the meanings of imperialism and colonialism over the last two centuries.

British Imperialism and 'The Tribal Question' Dec 10 2020 British Imperialism and 'The Tribal Question' reconstructs the history of Britain's presence in the deserts of the interwar Middle East, making the case for its significance to scholars of imperialism and of the region's past. It tells the story of what happened when the British Empire and Bedouin communities met on the desert frontiers between the Mediterranean Sea and the Persian Gulf. It traces the workings of the resulting practices of 'desert administration' from their origins in the wake of one World War to their eclipse after the next, as British officials, Bedouin shaykhs, and nationalist politicians jostled to influence desert affairs. Drawn to the commanding heights of political society in the region's towns and cities, historians have tended to afford frontier 'margins' merely marginal treatment. Instead, this volume combines the study of imperialism, nomads, and the desert itself to reveal the centrality of 'desert administration' to the working of Britain's empire, repositioning neglected frontier areas as nerve centres of imperial activity. British Imperialism and 'The Tribal Question' leads the shift in historians' attentions from the familiar, urban seats of power to the desert 'hinterlands' that have long been obscured.

Imperialism May 27 2022 Ever since the First World War, socialists have considered imperialism a calamity: responsible for militarism, economic stagnation, and assaults on democracy in the metropolitan countries, an impediment to economic and cultural development in the Third World. So widespread has this view become that it is shared, in its essentials, not only by Marxists but also by an entire school of liberal development economists. Bill Warren breaks with this traditional outlook, arguing that the theory of imperialism, one of Marxism's most influential concepts, is not only contradicted by the facts, but has diluted and distorted Marxism itself. In particular, Warren disputes the claim that "monopoly capitalism" represents the ultimate stage of senile capitalism and sets out to refute the notion that imperialism is a regressive force impeding or distorting economic development in the Third World. The book argues on the contrary that direct colonialism powerfully impelled social change in Asia and Africa, laying the foundation for a vibrant indigenous capitalism. Finally, it takes issue with the conventional view that postwar economic performance in the Third World has been disastrous, presenting a powerful empirical case that the gap between rich and poor countries is actually narrowing. Closely argued, clearly written, original and iconoclastic, *Imperialism: Pioneer of Capitalism* is a compelling challenge to one of the chief tenets of contemporary socialist politics.

Imperialism, Race and Resistance Dec 30 2019 *Imperialism, Race and Resistance* marks an important new development in the study of British and imperial interwar history. Focusing on Britain, West Africa and South Africa, *Imperialism, Race and Resistance* charts the growth of anti-colonial resistance and opposition to racism in the prelude to the 'post-colonial' era. The complex nature of imperial power is explored, as well as its impact on the lives and struggles of black men and women in Africa and the African diaspora. Barbara Bush argues that tensions between white dreams of power and black dreams of freedom were seminal in transforming Britain's relationship with Africa in an era bounded by global war and shaped by ideological conflict.

Empire as the Triumph of Theory Sep 26 2019 A key addition to our understanding of the Victorian-era British Empire, this book looks at the founders of the Colonial Society and the ideas that led them down the path to imperialism.

Latin America, Economic Imperialism and the State Sep 18 2021 Lewis and Able examine the economic relationship between Latin America and the 'advanced' countries since their independence from Spanish and Portuguese rule. They reinterpret the significance of Latin America's external connections through juxtaposing Latin America and the British scholars from different ideological and intellectual backgrounds. This work is of considerable importance in promoting comparative work in development studies of Latin America and the Third World.

Discourses of Education in the Age of New Imperialism Jul 29 2022 This fourth volume in the *Discourse, Power, Resistance* series takes the theme into new territory, setting educational thinking and practice firmly in its global political context. Drawing on schools of thought as diverse as Marxism and eco-feminist theology, the contributors to Part 1 (*Global Imperialism and Terror: The Theory and Practice of Othering*), led by Peter McLaren, examine the possibilities for critical thinking and transformative practice in the aftermath of 9/11 and the new age of cultural and political imperialism. In Part 2 (*Praxis: Thinking and Doing*) contributors draw on a range of critical perspectives to examine both the theory and practice of education, taking the reader from the self to the system and back again via dynamic systems theory, flow theory and a multiplicity of diverse (and often conflicting) practices of subversion. The book closes with two radical departures from the norm: a seriously playful transgression into the fields of pop art and film, and a searing poetic lament on the current state of educational policy and practice. As educators, we are all, in William Pinar's words, 'behind enemy lines', in a field which, despite our continued bids for autonomy, is increasingly hijacked by globalizing political forces. This book offers modes of resistance which are startling, unsettling and challenging. It will be of deep interest to students, tutors and researchers in education, policy studies and related fields, and to those who are involved in training, or becoming, the educators of the future. The contributors are Peter McLaren, William Pinar, Mike Cole, Lisa Isherwood, Elizabeth Atkinson, Tamsin Haggis, Sue Clegg, Gill Boag-Munroe, Ros Ollin, Victoria

Digitalizing the Global Text Oct 27 2019 A few years ago globalism seemed to be both a known and inexorable phenomenon. With the end of the Cold War, the opening of the Chinese economy, and the ascendancy of digital technology, the prospect of a unified flow of goods and services and of people and ideas seemed unstoppable. Political theorists such as Francis Fukuyama proclaimed that we had reached "the end of history." Yes, there were pockets of resistance and reaction, but these, we were told, would be swept away in a relentless tide of free markets and global integration that would bring Hollywood, digital finance, and fast food to all. Religious fundamentalism, nationalism, and traditional sexual identities would melt away before the forces of "modernity" and empire. A relentless, technocratic rationality would sweep all in its wake, bringing a neoliberal utopia of free markets, free speech, and increasing productivity. Nonetheless, as we have begun to experience the backlash against a global world founded on digital fungibility, the perils of appeals to nationalism, identity, and authenticity have become only too apparent. The collapse of Soviet Communism left an ideological vacuum that offered no recognized place from which to oppose global capitalism. What is the alternative? The anxieties and resentments produced by this new world order among those left behind are often manifested in assertions of xenophobia and particularity. This is what it supposedly means to be really American, truly Muslim, properly Chinese. The "other" is coming to take what is ours, and we must "defend" ourselves. *Digitalizing the Global Text* is a collection of essays by an international group of scholars situated squarely at this nexus of forces. Together these writers examine how literature, culture, and philosophy in

the global and digital age both enable the creation of these simultaneously utopian and dystopian worlds and offer a resistance to them. A joint publication from the University of South Carolina Press and the National Taiwan University Press.
