Getting the books **Chess Strategy In Vienna Research Handelsbanken** now is not type of challenging means. You could not lonesome going past ebook accretion or library or borrowing from your friends to approach them. This is an no question easy means to specifically acquire lead by on-line. This online message Chess Strategy In Vienna Research Handelsbanken can be one of the options to accompany you subsequent to having supplementary time.

It will not waste your time. consent me, the e-book will completely heavens you extra matter to read. Just invest tiny grow old to open this on-line declaration **Chess Strategy In Vienna Research Handelsbanken** as competently as review them wherever you are now.

Vivarium Jun 13 2021 The scientific achievements and forgotten legacy of a major Austrian research institute, from its founding in 1902 to its wartime destruction in 1945. The Biologische Versuchsanstalt was founded in Vienna in 1902 with the explicit goal to foster the quantification, mathematization, and theory formation of the biological sciences. Three biologists from affluent Viennese Jewish families—Hans Przibram, Wilhelm Figdor, and Leopold von Portheim—founded, financed, and nurtured the institute, overseeing its development into one of the most advanced biological research institutes of the time. And yet today its accomplishments are nearly forgotten. In 1938, the founders and other members were denied access to the institute by the Nazis and were forced into exile or deported to concentration camps. The building itself was destroyed by fire in April 1945. This book rescues the legacy of the “Vivarium” (as the Institute was often called), describing both its scientific achievements and its place in history. The book covers the Viennese sociocultural context at the time of the Vivarium's founding, and the scientific zeitgeist that shaped its investigations. It discusses the institute's departments and their research topics, and describes two examples that had scientific and international ramifications: the early work of Karl von Frisch, who in 1973 won the Nobel Prize in Physiology or Medicine; and the connection to Cold Spring Harbor Laboratory in New York. Contributors Heiner Fangerau, Johannes

Feichtinger, Georg Gaugusch, Manfred D. Laubichler, Cheryl A. Logan, Gerd B. Müller, Tania Munz, Kärin Nickelsen, Christian Reiß, Kate E. Sohasky, Heiko Stoff, Klaus Taschwer

Promoting Change Through Action Research Jul 22 2019 "Bringing a different world into existence - Action Research as a trigger for innovations" was the overarching theme and vision of the international CARN Conference 2011 in Vienna. The chapters in this book are drawn mainly from conference contributions. The authors share practical knowledge which has arisen from their work, and reflect on development processes in schools, in teacher education and professional development, social work, social pedagogy, health care and community development. This book offers what some critics believe has been missing in recent action research literature, namely first person accounts of action researchers who endeavour to change working conditions and social relations in their environment through the conduct of action research. This book is also distinguished by assembling contributions from people who are linking action research to a broad diversity of differing contexts, and who are exploring topics or issues across various applications of action research

On Social Research and Its Language Jul 26 2022 The eighteen essays in *On Social Research and Its Language* illustrate the diversity of Lazarsfeld's substantive, methodological, and organizational interests. Spanning the years 1933 to 1972, they encompass his own works of social research, as well as writings on methodology and the history and sociology of social research. Articles on methodology--observing, classifying and building typologies, analyzing the relations between variables, qualitative analysis, and macrosociology--form the bulk of the book. In addition, Raymond Boudon provides a revealing biography of Lazarsfeld and his influence on sociology.--Publisher description.

Integration of Constraint Programming, Artificial Intelligence, and Operations Research May 24 2022 This volume LNCS 12735 constitutes the papers of the 18th International Conference on the Integration of Constraint Programming, Artificial Intelligence, and Operations Research, CPAIOR 2021, which was held in Vienna, Austria, in 2021. Due to the COVID-19 pandemic the conference was held online. The 30 regular papers presented were carefully reviewed and selected from a total of 75 submissions. The conference program included a Master Class on the topic "Explanation and Verification of Machine Learning Models".

Programming and Utilization of Research Reactors Nov 18 2021

Academic Showcases Jan 20 2022 Descriptive guide to all teaching and research collections owned by or stored at the University of Vienna, including materials such as coins, stones, plaster casts, animal preparations and skeletons, plants, models, instruments, documents, letters, photographs and slides as well as audio and video tapes.

Orthopedic Procedures: Advances in Research and Application: 2011 Edition Aug 23 2019 Orthopedic Procedures: Advances in Research and Application: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Orthopedic Procedures. The editors have built Orthopedic Procedures: Advances in Research and Application: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Orthopedic Procedures in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Orthopedic Procedures: Advances in Research and Application: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Marienthal Feb 09 2021 The study on which Marienthal is based was conducted in 1930 in Austria, at the time of a depression that was worse than anything experienced in the United States. But the substantive problem is still very much with us, although our focus is now poverty rather than unemployment. In Austria, the institutional response to mass unemployment was the dole. Unlike the work relief programs of the New Deal, the dole system left workers destitute and idle. The essential finding of this research is that when people are deprived of work, there is a breakdown in the personality structure of a group. Marienthal represents a colossal breakthrough in social research. It provides a combination of quantification and interpretive analysis of qualitative material - an approach that remains in the forefront of present-day research design. The work combines statistical data at hand, case studies, information on historical background of those being studied, and questionnaires combined with solicited reports that enhance a sense of daily life without intrusion by investigators. The work provides a unique insight into how creative innovations can assist in overcoming collective deprivations.

Antimicrobials—Advances in Research and Application: 2012 Edition Oct 05 2020

Antimicrobials—Advances in Research and Application: 2012 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Antimicrobials. The editors have built Antimicrobials—Advances in Research and Application: 2012 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Antimicrobials in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Antimicrobials—Advances in Research and Application: 2012 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

The Economic and Environmental Sustainability of Dual Sourcing Nov 25 2019 Supply chains consist of all processes which are needed in order to supply customers with the required products. Traditionally, supply chain management decisions are based on the economic performance of the involved parties. But in recent years, other criteria, such as quality, flexibility or the environment, have become important as well. Especially carbon emissions are high on the political agenda because they are considered to be a major cause of the greenhouse gas effect. In this work it is shown how the performance of supply chains can be evaluated considering both economic and environmental criteria. In particular, the work deals with dual sourcing in the context of the newsvendor model. The impact of environmental regulations (emission taxes and emission trading) on the decisions of companies is analysed.

Franz Brentano and Austrian Philosophy Sep 23 2019 The book discusses Franz Brentano's impact on Austrian philosophy. It contains both a critical reassessment of Brentano's place in the development of Austrian philosophy at the turn of the 20th century and a reevaluation of the impact and significance of his philosophy of mind or 'descriptive psychology' which was Brentano's most important contribution to contemporary philosophy and to the philosophy in Vienna. In addition, the relation between Brentano, phenomenology, and the Vienna Circle is investigated, together with a related documentation of Brentano's disciple Alfred Kastil (in German). The

general part deals with the ongoing discussion of Carnap's "Aufbau" (Vienna Circle Lecture by Alan Chalmers) and the philosophy of mind, with a focus on physicalism as discussed by Carnap and Wittgenstein (Gergely Ambrus). As usual, two reviews of recent publications in the philosophy of mathematics (Paolo Mancosu) and research on Otto Neurath's lifework (Jordi Cat/Adam Tuboly) are included as related research contributions. This book is of interest to students, historians, and philosophers dealing with the history of Austrian and German philosophy in the 19th and 20th century.

An Introduction to Qualitative Research Jan 08 2021 'The fourth edition of Uwe Flick's Introduction to Qualitative Research remains the most comprehensive and thorough text in qualitative research. It is student-and user-friendly, thoroughly up-to-date in terms of the latest developments in the field, imminently practical. It is the single most important introductory book on qualitative inquiry in the social sciences today' - Norman K. Denzin, University of Illinois The new edition of Uwe Flick's bestselling textbook has been fully revised, expanded and updated. An Introduction to Qualitative Research guides the student step-by-step through the research process of qualitative research. This classic text covers all of the main theoretical approaches to qualitative research, and provides unmatched coverage of the full range of different qualitative methods and approaches now available to researchers. A range of new features have been added to the new edition including: - New structure to better meet the needs of teaching qualitative research - A new chapter on Grounded Theory plus updated coverage on the full range of other qualitative methods - A summary section discussing the state-of-the-art in qualitative research - A glossary - Updated cases studies, exercises and guided questions This new edition will continue to ensure that An Introduction to Qualitative Research remains an essential introductory text for all students of qualitative research.

Progesterone Congeners: Advances in Research and Application: 2011 Edition Sep 04 2020 Progesterone Congeners: Advances in Research and Application: 2011 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Progesterone Congeners. The editors have built Progesterone Congeners: Advances in Research and Application: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Progesterone Congeners in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and

relevant. The content of Progesterone Congeners: Advances in Research and Application: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Perspectives in Business Informatics Research Aug 27 2022 This book constitutes the proceedings of the 19th International Conference on Perspectives in Business Informatics Research, BIR 2020. The conference was initially planned to be held in Vienna, Austria, during September 2020. Due to the COVID-19 pandemic it was postponed to be held together with BIR 2021. The 14 papers presented in this volume were carefully reviewed and selected from 48 submissions. The papers were organized in topical sections as follows: Digital Transformation and Technology Acceptance; Multi-perspective Enterprise Models and Frameworks; Supporting Information Systems Development; Literature and Conceptual Analysis; and Value Creation and Value Management.

Action Research in Criminal Justice May 12 2021 To understand how people experience justice and security is a challenging task in times of unrest, marked by growing perceptions of insecurity, discrimination and uncertainty. The European project ALTERNATIVE aimed to understand justice and security experiences related to conflicts in intercultural settings, when citizens are given the means to actively contribute to these processes. This book relates how the project was set up as an action research through the concrete description of four action sites: social housing estates in Vienna, Austria; a small community in Hungary with a Roma population; three border towns in Serbia; and three communities in Northern Ireland. These four sites have been compared through an innovative methodology, which leads to a deeper understanding of the impact of participatory and restorative justice oriented processes, and - in a more general way - of what action research may entail in the criminological field. Bringing together researchers and case studies from around Europe, this book examines the scientific potential of action research as a methodology in criminal justice settings. This book is one of two volumes resulting from the work by a group of researchers in six European countries having cooperated intensively during four years in ALTERNATIVE, an action research project funded under the EU Seventh Framework Programme.

Innovation, Complexity and Policy Feb 21 2022 This book brings together a set of contributions that show the breadth and depth of the scientific work of Josef Fröhlich and his influence on Austrian research, technology and innovation (RTI) policy. It is edited in honour of the occasion of his retirement as Head of Innovation Systems Department at the AIT Austrian Institute of Technology. The contributors provide an overview of important issues of debate at the intersection of innovation studies and government policy, which have been pivotal for the modernisation and consolidation of the Austrian innovation system since the early 1990s.

Pile Neutron Research in Physics Dec 07 2020

Advances in Cyanobacteria Research and Application: 2011 Edition Mar 30 2020 Advances in Cyanobacteria Research and Application: 2011 Edition is a ScholarlyBrief™ that delivers timely, authoritative, comprehensive, and specialized information about Cyanobacteria in a concise format. The editors have built Advances in Cyanobacteria Research and Application: 2011 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Cyanobacteria in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Advances in Cyanobacteria Research and Application: 2011 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Computer-Human Interaction Research and Applications Jul 14 2021 This book constitutes selected papers of the Second International Conference on Computer-Human Interaction Research and Applications, CHIRA 2018, held in Seville, Spain, in September 2018, and Third International Conference on Computer-Human Interaction Research and Applications, CHIRA 2019, held in Vienna, Austria, in September 2019. The 7 full papers presented in this book were carefully reviewed and selected from 28 submissions for CHIRA 2018 and 36 submissions for CHIRA 2019. The papers selected to be included in this book contribute to the understanding of relevant trends of current research on computer-human interaction, including Interaction design, human factors, entertainment, cognition, perception, user-friendly software and systems, pervasive technologies and interactive

devices.

Chemistry Research and chemical techniques based on research reactors Jun 25 2022

Computer Security -- ESORICS 2015 Mar 10 2021 The two-volume set, LNCS 9326 and LNCS 9327 constitutes the refereed proceedings of the 20th European Symposium on Research in Computer Security, ESORICS 2015, held in Vienna, Austria, in September 2015. The 59 revised full papers presented were carefully reviewed and selected from 298 submissions. The papers address issues such as networks and Web security; system security; crypto application and attacks; risk analysis; privacy; cloud security; protocols and attribute-based encryption; code analysis and side-channels; detection and monitoring; authentication; policies; and applied security.

Ethnohistory in Vienna Mar 22 2022

Blocks and Chains Apr 30 2020 The new field of cryptographic currencies and consensus ledgers, commonly referred to as blockchains, is receiving increasing interest from various different communities. These communities are very diverse and amongst others include: technical enthusiasts, activist groups, researchers from various disciplines, start ups, large enterprises, public authorities, banks, financial regulators, business men, investors, and also criminals. The scientific community adapted relatively slowly to this emerging and fast-moving field of cryptographic currencies and consensus ledgers. This was one reason that, for quite a while, the only resources available have been the Bitcoin source code, blog and forum posts, mailing lists, and other online publications. Also the original Bitcoin paper which initiated the hype was published online without any prior peer review. Following the original publication spirit of the Bitcoin paper, a lot of innovation in this field has repeatedly come from the community itself in the form of online publications and online conversations instead of established peer-reviewed scientific publishing. On the one side, this spirit of fast free software development, combined with the business aspects of cryptographic currencies, as well as the interests of today's time-to-market focused industry, produced a flood of publications, whitepapers, and prototypes. On the other side, this has led to deficits in systematization and a gap between practice and the theoretical understanding of this new field. This book aims to further close this gap and presents a well-structured overview of this broad field from a technical viewpoint. The archetype for modern cryptographic currencies and consensus ledgers is Bitcoin and its underlying Nakamoto consensus. Therefore we describe the inner workings of this protocol in great detail and discuss its relations to

other derived systems.

Integration of Constraint Programming, Artificial Intelligence, and Operations Research Oct 17 2021 This volume LNCS 12735 constitutes the papers of the 18th International Conference on the Integration of Constraint Programming, Artificial Intelligence, and Operations Research, CPAIOR 2021, which was held in Vienna, Austria, in 2021. Due to the COVID-19 pandemic the conference was held online. The 30 regular papers presented were carefully reviewed and selected from a total of 75 submissions. The conference program included a Master Class on the topic "Explanation and Verification of Machine Learning Models".

Instrumentation for neutron inelastic scattering research Oct 25 2019

From Destination to Integration Jun 01 2020 In 2015 Austria took on about 90,000 asylum applications - one of the highest figures per population in Europe. The Institute for Urban and Regional Research (ISR) partnered with the Institute for Social Anthropology (ISA) and conducted an empirical pilot study among refugees, which is the basis of this ISR-Forschungsbericht. From December 2015 to March 2016, 60 biographical interviews with refugees from Syria, Iraq and Afghanistan living in Vienna were compiled in Farsi-Dari, Pashto, Arabic and Kurdish. A qualitative and interpretative research approach was used to understand how the refugees make sense of their experiences and networks on their path to social inclusion into the Austrian society. The collected information provided a wide range of insights into biographical topics in the context of refuge, for example, flight motivations and the often-traumatic experiences which were made in the countries of origin but of course also during the long way to and in Europe. The contributions in this volume provide invaluable insights in the refugees' perspective of their situation, their hopes and expectations, specific problem constellations, and the challenges they meet in Austria. Overall, the eight chapters of this volume provide an insight into many aspects of the sending context of refuge on the one side and the challenges of refugees in the receiving context on the other side.

Vienna and Beyond... a Sci-Fi Thriller Dec 19 2021 The author is also the main character of this book, and some parts of the book are autobiographical. Pat while doing genealogical research, finds out an intriguing story about one of her ancestors. She goes back to Vienna, Austria to try to understand why things turned out the way they did. While in Vienna a most extraordinary occurrence happens to her.

S-BPM ONE - Scientific Research Dec 27 2019 This book constitutes the thoroughly refereed scientific proceedings of the 4th International Conference on Subject-Oriented Business Process Management, S-BPM ONE 2012, held in Vienna, Austria, in April 2012. The 12 papers were carefully reviewed and selected from 36 submissions and are completed by one invited keynote paper and a summary of the tutorial on subject-oriented business process management. S-BPM as a discipline is characterized by a seamless approach toward the analysis, modeling, implementation, execution, and maintenance of business processes, with an explicit stakeholder focus. This year's contributions address all life-cycle activities, in particular analyzing business objectives, subject behavior design and integration, and automating complex work procedures.

Cambridge and Vienna Nov 06 2020 The Institute Vienna Circle held a conference in Vienna in 2003, Cambridge and Vienna – Frank P. Ramsey and the Vienna Circle, to commemorate the philosophical and scientific work of Frank Plumpton Ramsey (1903–1930). This Ramsey conference provided not only historical and biographical perspectives on one of the most gifted thinkers of the Twentieth Century, but also new impulses for further research on at least some of the topics pioneered by Ramsey, whose interest and potential are greater than ever. Ramsey did pioneering work in several fields, practitioners of which rarely know of his important work in other fields: philosophy of logic and theory of language, foundations of mathematics, mathematics, probability theory, methodology of science, philosophy of psychology, and economics. There was a focus on the one topic which was of strongest mutual concern to Ramsey and the Vienna Circle, namely the question of foundations of mathematics, in particular the status of logicism. Although the major scientific connection linking Ramsey with Austria is his work on logic, to which the Vienna Circle dedicated several meetings, certainly the connection which is of greater general interest concerns Ramsey's visits and discussions with Wittgenstein. Ramsey was the only important thinker to actually visit Wittgenstein during his school-teaching career in Puchberg and Ottertal in the 1920s, in Lower Austria; and later, Ramsey was instrumental in getting Wittgenstein positions at Cambridge.

Recent Advances in Geotechnical Research Aug 03 2020 This book provides a snapshot of the research activities of the Institute of Geotechnical Engineering, University of Natural Resources and Life Sciences in Vienna, Austria. The topics are broad ranged including: · Centrifuge model testing · Constitutive model · Granular physics · Numerical simulation · Soil bioengineering The topics reflect our geotechnical research in a changing

world. Traditional topics in foundation engineering are fading out and new topics are emerging. The European Commission is gratefully acknowledged for funding the following projects within its program FP7 and Horizon2020: MUMOLADE (Multiscale modelling of landslide and debris flow), REVENUES (Reinforced Vegetation Numerical Evaluation of Slopes) and GEORAMP (Geohazards - Risk Assessment, Mitigation and Prevention).

From Technische Hochschule to research university Apr 23 2022 This volume takes a look at the past – at the last 50 years in particular – and a look at the present, painting a picture of how the Imperial Royal Polytechnic Institute, founded in 1815, became the Technische Universität Wien – the "TU Wien" – with the launch of the 1975 University Organisation Act, and has increasingly developed into a research university ever since. Contemporaries from the years when the TU Wien was still the TH in Vienna have a place to tell their stories in this volume, alongside articles on interfaculty research facilities and service centres that support research activities and transfer of research results in accordance with the TU Wien's motto, "Technology for people". One of the main goals of this book is to not only inform readers, but also to amuse them a bit as they peruse the pages of the volume.

Robotics in Education Apr 11 2021 This proceedings book gathers the latest achievements and trends in research and development in educational robotics from the 10th International Conference on Robotics in Education (RIE), held in Vienna, Austria, on April 10–12, 2019. It offers valuable methodologies and tools for robotics in education that encourage learning in the fields of science, technology, engineering, arts and mathematics (STEAM) through the design, creation and programming of tangible artifacts for creating personally meaningful objects and addressing real-world societal needs. It also discusses the introduction of technologies ranging from robotics platforms to programming environments and languages and presents extensive evaluations that highlight the impact of robotics on students' interests and competence development. The approaches included cover the entire educative range, from the elementary school to the university level in both formal and informal settings.

Advances in Information Retrieval Jul 02 2020 This book constitutes the proceedings of the 37th European Conference on IR Research, ECIR 2015, held in Vienna, Austria, in March/April 2015. The 44 full papers, 41

poster papers and 7 demonstrations presented together with 3 keynotes in this volume were carefully reviewed and selected from 305 submissions. The focus of the papers were on following topics: aggregated search and diversity, classification, cross-lingual and discourse, efficiency, evaluation, event mining and summarisation, information extraction, recommender systems, semantic and graph-based models, sentiment and opinion, social media, specific search tasks, temporal models and features, topic and document models, user behavior and reproducible IR.

The Academy of Sciences in Vienna 1938 to 1945 Aug 15 2021 In 2013, the Academy is using the 75th anniversary of the "Anschluss" in March 1938 as an occasion to present an exhibition and to publish a catalog investigating the reactions of the Academy to the Nazi power takeover, the Academy's involvement in the Nazi domination apparatus, and the impact this had on the postwar period. New research findings allow a profound insight into the personnel and institutional structure of the Academy as well as its scientific focus during the Nazi era. The "Anschluss" of Austria by the National Socialist German Reich in March 1938 marked a profound turning point for the Academy of Sciences in Vienna. With the Nazis' seizure of power, Academy members and staff members were forced to leave for political and "racial" reasons. They were persecuted and expelled; they died in Nazi concentration camps. Organizations like the Institute for Radium Research, the Vivarium, and the Phonogram Archive lost their key research personnel; worldwide pioneering research programs and international research collaborations were broken off. Under the Academy's new Nazi leadership, the learned society's autonomy was reduced and research projects in the support of Nazi ideology were carried out. The year 1945 was not a "zero hour." In addition to breaks, there were also continuities in the research institutes as well as the association of scholars. In dealing with Nazism, the Academy took an ambivalent stance: In the early postwar period, the membership of former Nazis was provisionally suspended. A few years later - pursuant to the Amnesty Law of 1948 - practically all former Nazi party members, even high-ranking officials, were re-admitted as members.

Trafficking Materials and Gendered Experimental Practices Jan 28 2020 Maria Rentetzi surveys the experimental practices of radioactivity research in early-twentieth-century Vienna, focusing on radioactive materials, instruments, women's work in physics, and gendered skills. She shows how experimental cultures in radioactivity-

scientific practices employed by gendered subjects who shared a certain material and epistemic style of research? were constructed and reshaped by socialist politics in Vienna at that time. She also explores the different ways experimental practices affected men and women in laboratory sciences. Rentetzi expands the notion of material culture to include not only instruments and objects but also materials that operated as both commodities and objects of scientific inquiry. She tells a multifaceted story of how purified radium ended up on laboratory benches and who extracted and isolated it from tons of residues; the individuals who designed experiments and instruments for probing radium's properties; and those who carried radium outside of the physics laboratory and into the clinic and medical amphitheatres. Rentetzi examines how the architecture of the laboratory affected men's and women's scientific work and the way in which its urban setting reflected assumptions about scientific cross-disciplinary collaborations. Following the circulation of radium and the pursuit of power through strategies of partnership and collaboration, Rentetzi redraws paths of scientific exchange and transfers the reader from scientific laboratories to hospitals and from academic to industrial sites.

Heritage Conservation and Research in India Sep 28 2022 2009 marked the 60th anniversary of the diplomatic relations of the Republic of India and the Republic of Austria. The Conservation Department of the University of Applied Arts Vienna presents this volume largely based on papers reported at the conference "Cultural Heritage Counts - Research, Conservation and Management" held in New Delhi in August, 2009. The conference was a crucial contribution initiated by the Austrian Cultural Forum New Delhi to celebrate this important jubilee. The successful and intensive cooperation of both countries in the fields of the research and conservation of cultural heritage is reflected in numerous research and conservation projects presented in this book.
