How collages reveal your deepest thoughts: A guide to consumers' minds May 29 2022 A deeper understanding of how consumers think, feel and act is vital to the success of management and provides valuable information for managerial decision making in many areas of business. One key to this understanding is brand knowledge, which is the representation of a brand in consumers' minds. Unfortunately, a substantial amount of relevant knowledge within people's minds is unconscious and cannot be retrieved, accessed and recalled by consumers. As a consequence, certain methods of retrieval are required, such as projective techniques. The method this book works with is the collage technique, an expressive projective method. The aim of this book is to create a multi-layered approach that facilitates the interpretation of collages without the need of any additional information given by the participants, based on metaphor

analysis, color theory, a communication model and structural analysis.

**Legislative Foundations of American Consumer Society** Oct 22 2021 The current literature on consumerism is diverse, scattered, and unsystematic. This book remedies this by identifying the beginning of mass consumer society in the United States, starting with the New Deal. The New Deal framework of guaranteeing new home purchases by means of low down-payment, fixed-rate home mortgages lasted until the 1970s, at which time the legal framework unraveled due to a sustained attack on New Deal racism. Despite this, American consumerism continued and even flourished without a regulatory structure. This book analyzes seven key pieces of federal legislation which undergird American consumer society to this day.

**Perspectives on Methodology in Consumer Research** Apr 27 2022 Methodological advances in consumer behavior are increasing rapidly. We can characterize these advances by work in two logically separate but functionally related areas: (a) the philosophical underpinnings of our methods, and (b) the analytic strategies for examining the phenomena of interest in the field. An important aspect in communicating these advances is the demonstration of their use on focal problems in consumer behavior. Current research strategies and analytic techniques in the field of consumer research reflect the dominant logical empiricist epistemology. The development of new epistemologies (e.g., scientific relativism, hypothetical realism), however, is likely to modify the dominant logical empiricist approach and is also likely to influence the analytic strategies used to conduct research. For instance, with the increased awareness of scientific relativism and hypothetical realism, greater emphasis is anticipated for idiographic rather than nomothetic designs, for observational rather than experimental designs, for process rather than static analyses, and for more sophisticated techniques for summarizing findings across studies. The major theme underlying this volume is that conceptual, analytic, and substantive diversity are essential for consumer behavior research to advance. Collectively, the chapters we present in this volume are a diverse set of perspectives for the study of consumer behavior. This volume is organized into three parts: (1) philosophical orientations toward consumer behavior research, (2) analytic strategies for consumer behavior research, and (3) applications of these orientations and strategies to current research areas.
