*Thinning Films and Tribological Interfaces* Jan 01 2020 This collection of fully peer-reviewed papers were presented at the 26th Leeds-Lyon Tribology Symposium which was held in Leeds, UK, 14-17 September, 1999. The Leeds-Lyon Symposia on Tribology were launched in 1974, and the large number of references to original work published in the Proceedings over many years confirms the quality of the published papers. It also indicates that the volumes have served their purpose and become a recognised feature of the tribological literature. This year's title is 'Thinning Films and Tribological Interfaces', and the papers cover practical applications of tribological solutions in a wide range of situations. The evolution of a full peer review process has been evident for a number of years. An important feature of the Leeds-Lyon Symposia is the presentation of current research findings. This remains an essential feature of the meetings, but for the 26th Symposium authors were invited to submit their papers for review a few weeks in advance of the Symposium. This provided an opportunity to discuss recommendations for modifications with the authors.

**Glaxo Nov 22 2021** Originally published in 1992, this study of Glaxo, from its beginnings to 1962, was based on unprecedented and unparalleled archival access to the company records. It gives a detailed account of the global operations of Glaxo, and describes not only the evolution of its international business, but studies its research and development programmes, its products, and its marketing and management. It was the first comprehensive study of a UK-based drugs company and one of the relatively few scholarly studies written of front-ranking world companies.

**Nutrient Uptake and Cycling in Forest Ecosystems Jul 27 2019** From the research results and discussions presented in this book it becomes clear that a profound understanding of the various interrelationships of the nutritional aspects allows the implementation of specific management strategies to improve stability and productivity of forest ecosystems. In particular the effects of environmental changes as related to the impacts of air pollution, global change and land use on nutrient uptake and cycling processes in forest ecosystems are dealt with in detail. The book is divided into six main issues and each topic contains reviews as well as selected results of recent studies.
