Spain, Poland, Turkey, Greece, Bulgaria, Albania, Romania and Serbia. It explores various aspects of the weight and ecology of the Mediterranean languages, discusses LPP in the light of international law and the protection of human rights, bilingual education and foreign language acquisition policies. It also addresses the issue of feminization in a broad range of Mediterranean languages comparing French, Italian, Spanish, and, for the first time, Standard and Cypriot Greek. Finally, the book also discusses language revival and renovation policies, language planning in the public space, as well as cases of micro-language management. The volume is an excellent source of information for scholars and students of LPP interested in the synchrony and diachrony of Mediterranean languages, in aspects of LPP activity in various Mediterranean countries and in specific LPP processes involving several languages within the area.

Industrial Policy for Growth and Diversification:

A Conceptual Framework Nov 11 2020 As countries strive for a strong recovery and to recoup the losses incurred during the COVID-19 pandemic, they need to map out a new path for development and high and sustained growth. Promoting diversification, developing new industrial capabilities, and designing the policies needed to achieve this goal should be a priority. A successful diversification strategy should tackle both broad policy failures, such as an unfavorable business environment and investment climate and sector-specific market failures. This departmental paper presents a conceptual framework to analyze industrial policy, defined as targeted sectoral interventions. The authors first discuss the key principles that should guide policymakers, that is, a focus on the market failures that could justify targeted sectoral interventions, as well as the potential government failures that can undermine these interventions. The authors then discuss some commonly employed policy tools,

their rationale, and the associated pitfalls. Finally, the authors outline a stylized decision-making framework.

Change and Continuity in Poland's

Environmental Policy Jul 28 2019 This book takes a long-term view of environmental policy in Poland, which thus serves as an example to increase our understanding of environmental policy making in general in the former Eastern bloc countries. The perspective adopted also includes the pre-transition period, since the transformation process cannot be understood without reference to the preceding period. The book investigates the driving forces underlying policy changes, both prior to and after the transition, and identifies elements both of change and continuity - topics that have hitherto been neglected in the literature. A change of political system in Poland did not lead to a major change in the thrust of environmental policy: the

policy makers adopted a cautious approach to new instruments and institutions during the transition period. What did change with the transition was the implementation aspect: the effectiveness of environmental policy increased dramatically after the abolition of socialism. The rule of law meant that the state administration and the polluters were subordinated to the legal system, thus increasing the power to environmental policy. Readership: Researchers and students interested in the environment and the countries in transition.

[The Public Understanding of Assessment](#) Aug 09 2020 Assessment of educational achievement, whether by traditional examinations or by teachers in schools, attracts considerable public interest, particularly when it is associated with 'high stakes' outcomes such as university entry or selection for employment. When the individual's results do not chime with their or their teachers' expectations, doubts creep in about the process of assessment that has arrived

at this result. However, educational assessment is made up of many layers of complexity, which are not always clear to the general public, including teachers, students, and parents, and which are not easily understood outside of the expert assessment community. These layers may be organized in highly co-dependent relationships that include reliability, validity, human judgment, and errors, and the uses and interpretations of the various types of assessment. No-one could reasonably argue that the principles and complexities of educational assessment should be core learning in public education, but there is a growing realization that trust in the UK assessment system is under some threat as the media and others sensationalize or politicize any problems that arise each year. This book offers the first comprehensive overview of how the general public is considered to perceive and understand a wide variety of aspects of educational assessment, and how this understanding may be improved. This book was

originally published as a special issue of the Oxford Review of Education.

International Monetary and Financial Issues for the 1990s Jul 20 2021

Burning to Read Oct 30 2019 Amid present-day conflagrations, this illuminating book reminds us of the sources, and profound consequences, of Christian fundamentalism in the sixteenth century. Simpson focuses on the cultural transformation in early modern England that allowed common people to read the Bible for the first time. The last wave of fundamentalist reading in the West provoked 150 years of violent upheaval; as we approach a second wave, this powerful book alerts us to our peril.

OECD Urban Policy Reviews: Viet Nam May 30 2022 This report provides a comprehensive assessment of Viet Nam's urban policies and analyses how national spatial planning for urban areas, along with specific sectoral policies, directly and indirectly affect Viet Nam's urban development.

04 2022 The annual is a venue of publication for sociological studies of Chinese societies and the Chinese all over the world. The main focus is on social transformations in Hong Kong, Taiwan, the mainland, Singapore and Chinese overseas.

International Antitrust Law & Policy: Fordham Corporate Law 1998 Dec 13 2020 Every October the Fordham Corporate Law Institute brings together leading figures from governmental organizations, leading international law firms and corporations and academia to examine and analyze the most important issues in international antitrust and trade policy of the United States, the EU and the world. This work is the most definitive and comprehensive annual analysis of international antitrust law and policy available anywhere. Each annual edition sets out to explore and analyze the areas of antitrust/competition law that have had the most impact in that year. Recent "hot topics" include

antitrust enforcement in Asia, Latin America: competition enforcement in the areas of telecommunications, media and information technology. None of the chapters are merely descriptive, all raise questions of policy or discuss new developments and assess their significance and impact on antitrust and trade policy. All chapters, if necessary, are revised and updated before publication. As a result, the reader receives up-to-date practical tips and important analyses of difficult policy issues. The Annuals are an indispensable guide through the sea of international antitrust law. The Fordham Corporate Law Proceedings are acknowledged as simply the most definitive US/EC annual analyses of antitrust/competition law published. European Readmission Policy Sep 21 2021 From a legal and policy context, this book critically analyses the compatibility of European Community readmissions agreements with international protection obligations, explores the regional strategic objectives of these treaties, and evaluates their success in achieving these policy aims.

Russia and the European Union Jan 14 2021 The focus of this book is the implications of EU enlargement in May 2004 for EU-Russian relations. How should the EU and Russia develop their priorities as neighbours? What role could Russia's border regions play in shaping this policy? The book looks at the array of political, security, economic, and social concerns raised by the enlargement process. It incorporates different perspectives from existing and new EU member states, Russian scholars

and politicians from Moscow and the northwestern regions of Russia.

Social Welfare Policy Oct 11 2020 This book examines the conceptual, historical and practical implications that various social policies in the United States have had on ethnic minorities.

The Gender Effect Jul 08 2020 How and why are U.S. transnational corporations investing in the lives, educations, and futures of poor, racialized girls and women in the Global South? Is it a solution to ending poverty? Or is it a pursuit of economic growth and corporate profit? Drawing on more than a decade of research in the United States and Brazil, this book focuses on how the philanthropic, social responsibility, and business practices of various corporations use a logic of development that positions girls and women as instruments of poverty alleviation and new frontiers for capitalist accumulation. Using the Girl Effect, the philanthropic brand of Nike, Inc., as a central case study, the book examines how these corporations seek to address the problems

of gendered poverty and inequality, yet do so using an instrumental logic that shifts the burden of development onto girls and women without transforming the structural conditions that produce poverty. These practices, in turn, enable corporations to expand their legitimacy, authority, and reach while sidestepping contradictions in their business practices that often exacerbate conditions of vulnerability for girls and women. With a keen eye towards justice, author Kathryn Moeller concludes that these corporatized development practices depoliticize girls' and women's demands for fair labor practices and a just global economy.

The Irish Neutrality Concept as an Example for Foreign Policy Strategies of Small States

Mar 28 2022 Seminar paper from the year 2019 in the subject Politics - International Politics - Topic: International relations, grade: 1,0, University of Rostock, language: English, abstract: This work takes a look at how small states are characterized in the political science discipline of international relations, and what kinds of strategies they use to secure their interests in a globalized world. With the example of Ireland as a small and classically neutral state, the focus thereby lays on the foreign policy strategy of neutrality. Why do small European states adopt a neutral foreign policy and how does this strategy influence the development of the state? To understand the theoretical background of this theme and to get a clear understanding of the term, first the

theoretical concept of small states in international relations needs to be explained in a small overview including various definitions and approaches regarding their foreign policy. Proceeding from a review of their different strategies, the specific neutral strategy gets examined depending on the early political-historical background, different kinds of neutrality and neutrality rights. This will then be applied to the specific Irish case. More in-depth focused here is the question: can the Irish foreign policy in the 21st century still be phrased as neutral and what consequences are entailed in the answer? To achieve this, there is the need for an analysis of the Irish neutrality concept and its development. This will be done in the third part of this work by reviewing the political-historical background of the Irish derivation of the neutrality concept and later also taking into account the latest white paper regarding Ireland's foreign policy from 2015. Also a glance at the meso-level in form of the

Irish participation in international organizations like the European Union will be helpful to evaluate Ireland's degree of neutrality. At the end, cases of neutrality conflicts are gonna be pointed out and discussed in regard to the research question.

Making and Implementing Public Policy May 06 2020 This brand new text examines power and inequalities and how these are central to our understanding of how policies are made and implemented. It introduces the concepts and theoretical approaches that underpin the study of the policy process, reflects upon key developments and applies these to the practice of policy formulation and implementation.

The Emerging Middle East-East Asia Nexus Feb
Download File

24 2022 As the economies of East Asia grow ever stronger, their need for energy resources increases, which in turn compels closer relations with the countries of the Middle East. This book examines the developing relations between the countries of East Asia, especially China and Japan, with the countries of the Middle East. It looks at various key bilateral relationships, including with Iran and Syria, discusses the impact on the United States' hegemony in both regions, considers whether the new relations represent a contribution to, or a threat to, peace and stability, and assesses the implications of the changes for patterns of regional and global international relations systems.

Health inequalities Apr 28 2022 The world we live in is hugely unequal. People in a better socioeconomic position do not only lead more comfortable lives, but also longer and healthier lives. This is true not only in the poorer parts of the world but also in the richest countries, including the advanced welfare states of

Western Europe which have successfully pushed back poverty and other forms of material disadvantage. Why are health inequalities - systematically higher rates of disease, disability, and premature death among people with a lower level of education, occupation or income - so persistent? How can we expect to reduce this when it persists even in the most advanced states? Written by a leading figure in public health, this book looks to answer these questions by taking a broad, critical look at the scientific evidence surrounding the explanation of health inequalities, including recent findings from the fields of epidemiology, sociology, psychology, economics, and genetics. It concludes that a simplistic view, in which health inequalities are a direct consequence of social inequality, does not tell us the full story. Drawing upon a unique series of studies covering 30 European countries and more than three decades of observations, it shows that health inequalities are partly driven by autonomous forces that are difficult to

counteract, such as educational expansion, increased social mobility, and rapid but differential health improvements. Finally, the book explores how we might use these new findings to continue our efforts to build a healthier and more equal future. Offering a truly multidisciplinary perspective and an accessible writing style, *Health Inequalities* is an indispensable resource for health researchers, professionals, and policy-makers, as well as for social scientists interested in inequality.

Ethical and Policy Issues in International Research: Commissioned papers and staff analysis Aug 01 2022

Final Report, the 1981 White House Conference on Aging: A national policy on aging Dec 01 2019

[The Evolving Relationship between China, the EU and the USA](#) Apr 16 2021 This book closely scrutinizes the individual and collective roles played by China, the EU and the USA in contemporary world politics. Examining the

three actors' respective strategic and policy positions on and behaviour towards the flux of the contemporary global order, the analysis focuses on three major issues and challenges: foreign and security policy; economics and trade; and climate change and energy.

Discussing their relative power, as well as their interests, beliefs and positions on a set of decisive issues, this book explores bilateral relations between the three powers and the ways in which they may interact trilaterally in a broader global context to shape international politics. Written by a stellar line-up of experts from the fields of politics and international relations, *The Evolving Relationship between China, the EU and the USA* will be of huge interest to students and scholars from within these fields, as well as policy-makers and practitioners more generally.

The Diversification and Fragmentation of

International Criminal Law Jun 26 2019 This volume deals with the tension between unity and diversification which has gained a central place in the debate under the label of 'fragmentation'. It explores the meaning, articulation and risks of this phenomenon in a specific area: International Criminal Justice. It brings together established and fresh voices who analyse different sites and contestations of this concept, as well as its context and specific manifestations in the interpretation and application of International Criminal Law. The volume thereby connects discourse on 'fragmentation' with broader inquiry on the merits and discontents of legal pluralism in 'Public International Law'.

Education Sector Policy Paper May 18 2021

Enhancing Women's Participation in

Economic Development Feb 01 2020

Annotation Makes recommendations for removing the barriers women face in contributing to and benefiting from sustainable

economic development. International experience has proved that support for a stronger role for women in society contributes to economic growth through improved child survival rates, better family health, and reduced fertility rates. Nevertheless, women still face many barriers in contributing to and benefiting from development. These include low investment in female education and health and restricted access to services and assets. This study highlights five areas that could help change this inequitable situation: education, health, wage labor, agriculture and natural resource management, and financial services. A gender and development strategy is suggested that would take into account the relative roles and responsibilities of women and men, implying that the actions and attitudes of men must change. The ideas presented in this paper are an example of the World Bank's commitment to mainstreaming gender concerns into its operations. Although significant steps have

already been taken in this direction, there remains a long road ahead. Also available: French (ISBN 0-8213-3023-3) Stock No. 13023; Spanish (ISBN 0-8213-3024-1) Stock No. 13024. *Social Policy* Sep 02 2022 This thoroughly updated new edition provides a comprehensive introduction to contemporary social policy, and addresses its historical, theoretical and contextual foundations. Divided into four sections, it opens with a survey of the socio-economic, political and governmental contexts within which social policy operates, before moving on to look at the historical development of the subject. The third section examines contemporary aspects of providing welfare, whilst the final part covers European and wider international developments. The text explores the major topics and areas in contemporary social policy, including: work and welfare education adult health and social care children and families crime and criminal justice health housing race disability Issues are addressed

throughout in a lively and accessible style, and examples are richly illustrated to encourage the student to engage with theory and content, and to help highlight the relevance of social policy in our understanding of modern society. It is packed with features including, 'Spotlight' 'Discussion and review' and 'Controversy and debate' boxes, as well as further readings and recommended websites. A comprehensive glossary also provides explanations of key terms and abbreviations. *Social Policy* is an essential textbook for undergraduate students taking courses in social policy and related courses such as criminology, health studies, politics, sociology, nursing, youth and social work. *Passive and Perspective* Jun 30 2022 The passive construction in Dutch represents a long-standing problem both in linguistics and in written communications. This book proposes a new analysis of the passive in Dutch, integrating insights from theoretical (especially cognitive) linguistics and rhetoric/composition. The point of

departure is the observation that the Dutch passive has a demonstrable perspective effect in texts: the passive discourages identification with the agent, and this in fact is the meaning of the Dutch passive construction. This meaning forms the basis for a solution to a number of text problems, including the problem of how to best use the passive in computer manuals. We can also understand the passive's role in specific texts. For example, it becomes clear why policy paper writers use so many passives. Finally, in one of the case studies it is shown why passives were used differently in the NRC Handelsblad, a Rotterdam daily newspaper, and in the Parool, from Amsterdam, when they both reported that Ajax, Amsterdam's football team, became the national soccer champion.

Nature Conservation (Collins New Naturalist Library, Book 91) Jun 06 2020 This latest volume in the New Naturalist series provides a comprehensive study of wildlife conservation in Britain, concentrating on events

in the last 30 years.

The Research Program of the Nuclear Regulatory Commission Sep 29 2019

Climate Change Research at Universities

Aug 21 2021 This unique book provides a multidisciplinary review of current, climate-change research projects at universities around the globe, offering perspectives from all of the natural and social sciences. Numerous universities worldwide pursue state-of-the-art research on climate change, focussing on mitigation of its effects as well as human adaptation to it. However, the 2015 Paris 21st Conference of the Parties of the United Nations Framework Convention on Climate Change (UNFCCC) (COP 21)" demonstrated that there is still much room for improvement in the role played by universities in international negotiations and decision-making on climate change. To date, few scientific meetings have provided multidisciplinary perspectives on climate change in which researchers across the

natural and social sciences could come together to exchange research findings and discuss methods relating to climate change mitigation and adaptation studies. As a result the published literature has also lacked a broad perspective. This book fills that gap and is of interest to all researchers and policy-makers concerned with global climate change regardless of their area of expertise.

Unsettling Cities Mar 16 2021 This text examines the global nature of cities - cities whose openness has shaped their dynamism and character. It explores cities as sites of movement, migration and settlement where different peoples, cultures and environments combine. Unsettling Cities explores the mix of proximity and difference that exists in the rich and diverse texture of city life. The contributors reveal the association between the changing fortunes of cities and the power and influence of global networks.

Visual Politics and North Korea Mar 04 2020 In

the realm of international relations, there are seemingly few states like North Korea. Whether it is the country's human rights situation, its precarious everyday life or its so-called foreign policy of coercion and nuclear brinkmanship, no matter what this 'pariah' nation says and does it affects the state and stability of regional and global politics. But what do we know about North Korea and how do we come to know it? This book argues that visual imagery plays a decisive role in this operation. By discussing two exemplary areas - everyday photography and satellite imagery - the book takes into account the role of images in the way that particular issues related to North Korea are understood in contemporary geopolitics. Images work. They do something by evoking a particular perspective of what is shown in them, allowing only specific ways of seeing and knowing. In this sense, images are deeply political. Individual methodological usages in the book can provide a procedural basis from which to start or rethink
