The Poison King Jan 13 2021 A new account of one of Rome's most relentless but least understood foes. Claiming Alexander the Great and Darius of Persia as ancestors, Mithradates inherited a wealthy Black Sea kingdom at age fourteen after his mother poisoned his father. He fled into exile and returned in triumph to become a ruler of superb intelligence and fierce ambition. Hailed as a savior by his followers and feared as a second Hannibal by his enemies, he envisioned a grand Eastern empire to rival Rome. After massacring eighty thousand Roman citizens in 88 BC, he seized Greece and modern-day Turkey. Fighting some of the most spectacular battles in ancient history, he dragged Rome into a long round of wars and threatened to invade Italy itself. His uncanny ability to elude capture and surge back after devastating losses unnerved the Romans, while his mastery of poisons allowed him to foil assassination attempts and eliminate rivals.--From publisher description.

The Distracted Mind Oct 22 2021 A "brilliant and practical" study of why our brains aren't built for media multitasking—and how we can learn to live with technology in a more balanced way (Jack Kornfield, author of *The Wise Heart*) Most of us will freely admit that we are obsessed with our devices. We pride ourselves on our ability to multitask—read work email, reply to a text, check Facebook, watch a video clip. Talk on the phone, send a text, drive a car. Enjoy family dinner with a glowing smartphone next to our plates. We can do it all, 24/7! Never mind the errors in the email, the near-miss on the road, and the unheard conversation at the table. In *The Distracted Mind*, Adam Gazzaley and Larry Rosen—a neuroscientist and a psychologist—explain why our brains aren't built for multitasking, and suggest better ways to live in a high-tech world without giving up our modern technology. The

authors explain that our brains are limited in their ability to pay attention. We don't really multitask but rather switch rapidly between tasks. Distractions and interruptions, often technology-related—referred to by the authors as “interference”—collide with our goal-setting abilities. We want to finish this paper/spreadsheet/sentence, but our phone signals an incoming message and we drop everything. Even without an alert, we decide that we “must” check in on social media immediately. Gazzaley and Rosen offer practical strategies, backed by science, to fight distraction. We can change our brains with meditation, video games, and physical exercise; we can change our behavior by planning our accessibility and recognizing our anxiety about being out of touch even briefly. They don't suggest that we give up our devices, but that we use them in a more balanced way.

The Art of Innovation Jun 25 2019 IDEO, the widely admired, award-winning design and development firm that brought the world the Apple mouse, Polaroid's I-Zone instant camera, the Palm V, and hundreds of other cutting-edge products and services, reveals its secrets for fostering a culture and process of continuous innovation. There isn't a business in America that doesn't want to be more creative in its thinking, products, and processes. At many companies, being first with a concept and first to market are critical just to survive. In *The Art of Innovation*, Tom Kelley, general manager of the Silicon Valley based design firm IDEO, takes readers behind the scenes of this wildly imaginative and energized company to reveal the strategies and secrets it uses to turn out hit after hit. IDEO doesn't buy into the myth of the lone genius working away in isolation, waiting for great ideas to strike. Kelley believes everyone can be creative, and the goal at his firm is to tap into that wellspring of creativity in order to make innovation a way of life. How does it do that? IDEO fosters an atmosphere conducive to freely expressing ideas, breaking the rules, and freeing people to design their own work environments. IDEO's focus on teamwork generates countless breakthroughs, fueled by the constant give-and-take among people ready to share ideas and reap the benefits of the group process. IDEO has created an intense, quick-turnaround, brainstorm-and-build process

dubbed "the Deep Dive." In entertaining anecdotes, Kelley illustrates some of his firm's own successes (and joyful failures), as well as pioneering efforts at other leading companies. The book reveals how teams research and immerse themselves in every possible aspect of a new product or service, examining it from the perspective of clients, consumers, and other critical audiences. Kelley takes the reader through the IDEO problem-solving method: br” Carefully observing the behavior or "anthropology" of the people who will be using a product or servicebrbr” Brainstorming with high-energy sessions focused on tangible resultsbrbr” Quickly prototyping ideas and designs at every step of the waybrbr” Cross-pollinating to find solutions from other fieldsbrbr” Taking risks, and failing your way to successbrbr” Building a "Greenhouse" for innovation

Watts bevat de teksten van enkele van zijn beste lezingen, gebaseerd op de succesvolle audioserie 'Out of your mind'. Om de dingen helder te kunnen zien, moeten we soms weggaan van ons denken, is een bekende uitspraak van Alan Watts. Misschien wel meer dan enige andere Westerse spirituele leraar was en is Alan Watts in staat om ons uit ons beperkte Westerse denkkader te laten stappen. Hij biedt alternatieve wegen uit ons denken en leidt ons langs de grote spirituele thema's. Wat gebeurt er als we doorkrijgen dat ons lichaam en ons ego slechts een illusie zijn? Hoe kan het omarmen van de chaos ons helpen om ons levensdoel te ontdekken? En welke wonderen kunnen we verwachten als we stoppen met alles zo serieus te nemen? Volg deze briljante denker op deze zoektocht en je zult tot antwoorden komen!
