EBOOK: Evaluation  
May 06 2020 What  
is evaluation? Why  
is it important in  
public health? How  
can evaluation lead  
to improved health  
outcomes?

Evaluation and  
evidence-based  
practice are core to  
professional  
practice within the  
wider public health  
field. Practitioners

in a range of  
sectors, including  
the voluntary  
sector, are  
increasingly being  
held to account for  
the success of  
projects and  
programmes of  
activity. Conducting  
evaluation can be  
challenging.

Furthermore, the  
move to evidence-  
based practice  
demands that  
practitioners are  
able to critically  
interpret published  
evaluation findings.

Evaluation is a  
readily accessible  
examination of the  
key theories and  
principles  
underpinning  
approaches to  
evaluation. It offers

a guide to how  
these principles can  
be implemented in  
practice and  
provides insights  
into dealing with  
some of the real-life  
challenges and  
complexities of  
evaluation,  
including:  
Identifying  
indicators of  
success Developing  
an evaluation plan  
Ethical issues  
Making the most of  
findings This book  
is the first in a  
series on current  
theories and  
concepts for those  
working within the  
wider field of public  
health.
