The Future of Financial Regulation Apr 15 2021 A number of changes have been made to the supervision and regulation of banks as a result of the recent financial meltdown. Some are for the better, such as the Basel III rules for increasing the quality and quantity of capital in banks, but legal changes on both sides of the Atlantic now make it much more difficult to resolve failing banks by means of taxpayer funded bail-outs and could hinder bank resolution in future financial crises. In this book, Johan A. Lybeck uses case studies from Europe and the United States to examine and grade a number of bank resolutions in the last financial crisis and establish which were successful, which failed, and why. Using in-depth analysis of recent legislation, he explains how a bank resolution can be successful, and emphasizes the need for taxpayer-funded bail-outs to create a viable banking system that will promote economic and financial stability.

Statebuilding and State Formation in the Western Pacific Nov 10 2020 This book provides a rigorous and cross-disciplinary analysis of this Melanesian nation at a critical juncture in its post-colonial and post-conflict history, with contributions from leading scholars of Solomon Islands. The notion of 'transition' as used to describe the recent drawdown of the decade-long Regional Assistance Mission to Solomon Islands (RAMSI) provides a departure point for considering other transformations – social, political and economic –under way in the archipelagic nation. Organised around a central tension between change and continuity, two of the book's key themes are the contested narratives of changing state–society relations and the changing social relations around land and natural resources engendered by ongoing processes of globalisation and urbanisation. Drawing heuristically on RAMSI's genesis in the 'state- building moment' that dominated international relations during the first decade of this century, the book also examines the critical distinction between 'state-building' and 'state formation' in the Solomon Islands context. It engages with global scholarly and policy debates on issues such as peacebuilding, state-building, legal pluralism, hybrid governance, globalisation, urbanisation and the governance of natural resources. These themes resonate well beyond Solomon Islands and Melanesia, and the book will be of interest to a wide range of students, scholars and development practitioners. This book was previously published as a special issue of The Journal of Pacific History.

personal history and his fascination with quasi-Maoist values, the factional politics through which he ascended, the configuration of power of the Fifth-Generation leadership, and the country's likely future directions under the charismatic "princeling." Despite an undistinguished career as a provincial administrator, Xi has rapidly amassed more power than his predecessors. He has overawed his rivals and shaken up the party-state hierarchy by launching large-scale anti-corruption and rectification campaigns. With a strong power base in the People's Liberation Army and a vision of China as an "awakening lion," Xi has been flexing China's military muscle in sovereignty rows with countries including Japan, Vietnam, and the Philippines while trying to undermine the influence of the United States in the Asia-Pacific region. While Xi is still fine-tuning his art of governance, his zero tolerance for dissent and his preoccupation with upholding the privileges of the "red aristocracy" and the CCP's status as "perennial ruling party" do not bode well for economic, political, or cultural reforms. Lam takes a close look at Xi's ideological and political profile and considers how his conservative outlook might shape what the new strongman calls "the Great Renaissance of the Chinese race."

The MDGs, Capabilities and Human Rights Jun 25 2019 Heralded as opening a new chapter in international development, the Millennium Development Goals (MDGs) have led to the use of global goals and quantitative targets as a central instrument for defining global priorities. This book explores the implications of this new approach. How does target setting influence policy priorities of national governments, bilateral donors, multilateral agencies, NGOs, and other stakeholders? What are the intended and unintended consequences? Why is the use of numeric indicators effective? How does quantification reshape meanings of challenges such as women's empowerment? Building on 11 case studies and a conceptual framework, this book provides a goal-by-goal analysis by leading specialists in the relevant fields. These specialists analyse the choices made, as well as the empirical and normative effects of the MDGs to offer insights for a more rigorous use of indicators and cautions on their limitations and perverse consequences. This book was originally published as a special issue of the Journal of Human Development and Capabilities.

Crisis and Promise in the Caribbean Aug 20 2021 The Caribbean is made up of a complex, enigmatic region, characterised by great disparities in size, population, geography, history, language, religion, race and politics. This is a region in which harmony and discord work in tandem, trying to link economic logic with political logic. This book is a useful tool not only for those specialists and students of regionalism but for all those putting their hands to the task of nation-building and those interested in the development processes of small states and economies. At the same time, this book is a comprehensive historical record especially highlighting hindrances to development in this region. This study raises two important issues: the 'political imperative of convergence' and the need for 'appropriate correcting mechanisms' that align the needs of the local with the regional. It is a volume that underlines the need for a change in strategy and makes proposals as to how to go about making those changes.
