The Music Practitioner Oct 09 2020 Useful work has been done in recent years in the areas of music psychology, philosophy and education, yet this is the first book to provide a wide assessment of what practical benefits this research can bring to the music practitioner. With 25 chapters by writers representing a broad range of perspectives, this volume is able to highlight many of the potential links between music research and practice. The chapters are divided into five main sections. Section one examines practitioners' use of research to assist their practice and the ways in which they might train to become systematic researchers. Section two explores research centred on perception and cognition, while section three looks at how practitioners have explored their everyday work and what this reveals about the creative process. Section four focuses on how being a musician affects an individual's sense of self and the how others perceive him or her. The essays in section five outline the new types of data that creative researchers can provide for analysis and interpretation. The concluding chapter discusses that key question - what makes music affect us in the way it does? The research findings in each chapter provide useful sources of data and raise questions that are applicable across the spectrum of music-related disciplines. Moreover, the research methodologies applied to a specific question may have broader application for readers wishing to take on research themselves.

Main Currents in Modern Economics Nov 09 2020 *Main Currents in Modern Economics* deserves to be the classic it is. At the time of its original publication in 1962, Ben Seligman, a scholar's scholar, had immersed himself in the development of economic thought since 1870. This product of his efforts is truly timeless. Why is *Main Currents* still modern and surprisingly up-to-date? For Seligman, the story begins with the revolt of German historical writers against the rigidity of classical doctrine, a natural starting point for contemporary theory. He takes us from the world of Thorstein Veblen to Galbraith's theory of countervailing power and the affluent society—worlds that he makes us understand are not so far apart., Seligman also shows us how the doctrines begin to repeat themselves. Tradition is reaffirmed with the rediscovery of marginalism by Jevons, the Austrians, and J. B. Clark. A more neutral version of "equilibrium economics" is supplied by Leon Walras and Vilfredo Pareto, a main current of thought extended by John R. Hicks and Paul A. Samuelson. Seligman characterizes the principal trait of modern doctrine as the use of technique for its own sake. Dismissing G.L.S. Shackle's writing on uncertainty, he criticizes Shackle's use of continuous rather than discontinuous function., *Main Currents* may have been published too soon to be fully appreciated. Seligman's focus on the thrust toward technique now has a ring of truth that can no longer be ignored. As Ray Canterbury notes in his introduction, in some respects only the names of the

players have changed, and *Main Currents'* pertinence to today's issues is self-evident. Economics has moved so deeply into technique that the next generation may have to rediscover the past in order to find its way out. Seligman's book is a good place to begin the journey.

Recent Themes in the Philosophy of Science Apr 02 2020 Australia and New Zealand boast an active community of scholars working in the field of history, philosophy and social studies of science. *Australasian Studies in History and Philosophy of Science* aims to provide a distinctive publication outlet for their work. Each volume comprises a group of thematically-connected essays edited by scholars based in Australia or New Zealand with special expertise in that particular area. In each volume, a majority of the contributors are from Australia or New Zealand. Contributions from elsewhere are by no means ruled out, however, and are actively encouraged wherever appropriate to the balance of the volume in question. Earlier volumes in the series have been welcomed for significantly advancing the discussion of the topics they have dealt with. I believe that the present volume will be greeted equally enthusiastically by readers in many parts of the world. R. W. Home General Editor *Australasian Studies in History And Philosophy of Science* viii
ACKNOWLEDGEMENTS The majority of the papers in this collection had their origin in the 2001 *Australasian Association for History, Philosophy, and Social Studies of Science* annual conference, held at the University of Melbourne, where streams of papers on the themes of scientific realism and commonsense were organised.

Joan Robinson and the Americans Oct 21 2021 Employees with valuable skills and a sense of their own worth can make their jobs, pay, perks, and career opportunities different from those of their coworkers in subtle and not-so-subtle ways. This book shows how such individual arrangements can be made fair and acceptable to coworkers, and beneficial to both the employee and the employer.

[J. R. Davidson](#) Feb 22 2022 Julius Ralph Davidson is widely known as the architect of Thomas Mann's house. Born 1889 in Berlin, Davidson left Germany in 1923 and emigrated to the USA. In Los Angeles, he designed some 150 projects, among them three houses for the experimental Case Study House Program. This long overdue publication is a comprehensive documentation of Davidson's life and work, highlighting J.R.'s contribution to modernism in California in the 1930s and 1940s.

Ethnic Leadership and Midwestern Politics May 16 2021 If historians were once preoccupied with politics, they are no more. In the past century history has embraced the whole range of human activity. Yet historians cannot, or at least ought not, avoid politics. Aristotle was right: humans are by nature political beings and politics is naturally an essential human activity. Whatever else history must do, then, it needs always to take politics into account. The Norwegian-American Historical Association is therefore pleased to publish Jorn Brondal's study of Scandinavian-Americans in politics. His book is noteworthy for its emphasis on the role played in American politics by cohorts of ethnic leaders. It is also an able contribution to an undeveloped field, the comparative study of Scandinavian ethnic groups in the United States. In these respects his work complements other studies, including a number published by the Association itself, that have emphasized popular involvement in Norwegian-American politics or the careers in politics of single individuals.

Ruth Davidson's Conservatives: The Scottish Tory Party, 2011-19 Jul 30 2022 Examining the startling revival of the Scottish Conservative Party under Ruth Davidson's leadershipKey featuresFirst book to examine the recent revival of the Scottish Conservative PartyAnalyses the Scottish Conservative Party and Ruth Davidson's leadership in ground-breaking ways, for example in the context of gender and LGBT politics; its relationships with the SNP, Northern Ireland, the Scottish media and the UK Tory Party; its use of Scottish national identity in promoting itself electorallyComplements and updates David Torrance's 2012 edited volume for Edinburgh University Press on the decline of the party, Whatever Happened to Tory Scotland?Helps inform Scottish political and academic discourse ahead of the 2021 Holyrood electionsWhen Ruth Davidson was elected leader of the Scottish Conservative and Unionist Party in 2011, it was considered something of a joke: in electoral decline for decades, politically irrelevant and apparently beyond the point of no return. But by 2017, 'Ruth Davidson's Conservatives' had become Scotland's second party at Holyrood and Westminster, and its leader spoken of as a future leader of the UK Conservative Party, if not the next Scottish First Minister. This book, which brings together leading academics and analysts, examines the extraordinary revival of the Scottish Conservative Party between 2011 and Ruth Davidson's shock resignation in 2019. Contributors look at the importance of gender and sexuality, the 2014 independence referendum, the Scottish media and the UK Conservative Party's 'territorial code' to the changing fortunes of the party and its leader, asking if it can be sustained amid the turbulence of two ongoing constitutional debates.

Women's Legal Strategies in Canada Sep 27 2019 Have Canadian women gained from their pursuit of legal remedies to social, political, economic, and cultural inequalities? Is law a fruitful avenue for such struggles? Using liberal feminist, postmodern, critical, race, and queer theory, these essays confront the anti-rights critiques of the legal Left regarding the use of law in general and the Charter in particular. Several chapters explicitly examine the strategic limits and possibilities of the substantive equality rights approaches pursued by LEAF (The Women's Legal Education and Action Fund). Others focus on legal strategies mobilized in discreet areas of law and public policy by foreign domestic workers and racialized women, lesbians, women seeking reproductive freedom, women in the childcare movement, and anti-violence advocates. Recognizing the diversity of women across class, citizenship, race and ethnicity, sexual

identity, culture, and (dis)ability, this collection evaluates the efficacy of the wide range of legal and political strategies women have employed, particularly in this post-Charter era. *Women's Legal Strategies in Canada* is the most comprehensive account of these important issues and will surely become the standard work in the field.

Poisoning the Press Mar 14 2021 It is March 1972, and the Nixon White House wants Jack Anderson dead. The syndicated columnist Jack Anderson, the most famous and feared investigative reporter in the nation, has exposed yet another of the President's dirty secrets. Nixon's operatives are ordered to "stop Anderson at all costs"—permanently. Across the street from the White House, they huddle in a hotel basement to conspire. Should they try "Aspirin Roulette" and break into Anderson's home to plant a poisoned pill in one of his medicine bottles? Could they smear LSD on the journalist's steering wheel, so that he would absorb it through his skin, lose control of his car, and crash? Or stage a routine-looking mugging, making Anderson appear to be one more fatal victim of Washington's notorious street crime? *Poisoning the Press: Richard Nixon, Jack Anderson, and the Rise of Washington's Scandal Culture* recounts not only the disturbing story of an unprecedented White House conspiracy to assassinate a journalist, but also the larger tale of the bitter quarter-century battle between the postwar era's most embattled politician and its most reviled newsman. The struggle between Nixon and Anderson included bribery, blackmail, forgery, spying, and burglary as well as the White House murder plot. Their vendetta symbolized and accelerated the growing conflict between the government and the press, a clash that would long outlive both men. Mark Feldstein traces the arc of this confrontation between a vindictive president and a flamboyant, crusading muckraker who rifled through garbage and swiped classified papers in pursuit of his prey—stoking the paranoia in Nixon that would ultimately lead to his ruin. The White House plot to poison Anderson, Feldstein argues, is a metaphor for the poisoned political atmosphere that would follow, and the toxic sensationalism that contaminates contemporary media discourse. Melding history and biography, *Poisoning the Press* unearths significant new information from more than two hundred interviews and thousands of declassified documents and tapes. This is a chronicle of political intrigue and the true price of power for politicians and journalists alike. The result—Washington's modern scandal culture—was Richard Nixon's ultimate revenge.

Negotiating Citizenship Jun 24 2019 *Negotiating Citizenship* explores the growing inequalities associated with nation-based citizenship from the perspective of migrant women workers who have made their way from impoverished Third World countries to work in Canada in the caregiving industries of domestic service and nursing. The study demonstrates the impact of the global political economy, public and private gatekeeping mechanisms, and racialized and gendered stereotypes on the contested relationship between citizen-employers and non-citizen female migrant workers in Canada.

Access for Dialysis Jun 16 2021 This publication is intended as a guide to common diagnostic, operative and percutaneous techniques used in creating and maintaining vascular access for hemodialysis. When writing the text, the authors have focused on surgeons in training, fellows, interventional radiologists and clinically active nephrologists. Dialysis nurses and other clinicians involved in the care of end stage renal disease and dialysis patients will also greatly benefit from this handbook. This 2nd edition of the text contains expanded sections on ESRD, access surveillance and surgical and diagnostic devices, as well as new sections on peritoneal and dual lumen catheter placement, commonly used drugs and dialysis, hemo- and peritoneal dialysis techniques and CPT and ICD coding for statistical and billing purposes. These changes reflect the highly technical nature of clinical management in this evolving specialty.

Nevile Davidson Sep 07 2020 Rev. Dr. A. Nevile Davidson (1899–1976), minister of Glasgow Cathedral for over thirty years, was one of the most distinguished Scottish churchmen of the twentieth century. A living embodiment of the idea of “a broad churchman,” he was both a representative of the high church “Scoto-Catholic” tradition and a key supporter of Billy Graham’s 1955 evangelistic campaign. Throughout most of his life he kept a detailed diary and for the first time, in this book, this rich source of material is drawn upon, in addition to the reminiscences of those who knew him, giving a unique insight into the man behind the dignified public persona. *Nevile Davidson: A Life to be Lived* not only paints a portrait of a historically significant figure but reveals him to be a man of vision who was constantly thinking of innovative ways to

communicate the church's message to ordinary people and who worked tirelessly for ecumenical cooperation. As such, Nevile Davidson has much to say that is relevant to our own time.

The Chinese Takeaway Jun 04 2020 The eldest son of the Prime Minister of Great Britain is part of the crew of the catamaran Xylonite. The yacht has been entered into a demanding race around Antarctica. The Xylonite has ceased reporting her position and seems to have gone missing. Irregularities in the building and crewing of the catamaran are uncovered but is it a case of a storm breaking her up or is there a more sinister reason behind the disappearance? Al Qaeda are suspected but there is no conclusive proof. A story of abduction and blackmail for commercial gain.

Captain Jack for President Oct 28 2019 On a beautiful Spring morning in Jonesport Maine, Captain Jack Harper of Harper Industries walks into Moby's restaurant for his morning cup of Moby's jo, unsuspecting that it would be the beginning of a life change, not only for him, but for his community and quite possibly the country. Captain Jack had been a man of integrity and honor his entire life; a man of service to his community. Little did he know that his community would be asking him to be a man of service for the entire nation. In the quiet of the morning, as the locals debated politics and listened to the typical rhetoric of the incumbent and presidential contenders, a stranger to the town was sitting in the corner taking it all in. As the locals began talking about what life would be like under a presidency of Captain Jack, the stranger became more intrigued about who this Captain Jack character might be. When the townsmen finally approached Jack, encouraging him to make a run for the presidency, the stranger, Dexter Wyman, chair of the Constitution Party, introduced himself and joined the fray. Jack reluctantly accepted the challenge to run under the Constitution party banner, with the assistance of the entire township. Will Jack finish the race? Will he be shutdown before getting off the starting block? Will he be eliminated permanently by organized, empowered politicians who don't appreciate a newcomer to the field?

Cities in a Globalizing World Aug 26 2019 'The world has entered the urban millennium. Nearly half the world's people are now city dwellers, and the rapid increase in urban population is expected to continue, mainly in developing countries. This historic transition is being further propelled by the powerful forces of globalization. The central challenge for the international community is clear: to make both urbanization and globalization work for all people, instead of leaving billions behind or on the margins. Cities in a Globalizing World: Global Report on Human Settlements is a comprehensive review of conditions in the world's cities and the prospects for making them better, safer places to live in an age of globalization. I hope that it will provide all stakeholders - foremost among them the urban poor themselves - with reliable and timely information with which to set our policies right and get the machinery of urban life moving in a constructive direction.' From the Foreword by Kofi Annan, Secretary-General, United Nations. Cities in a Globalizing World presents a comprehensive review of the world's cities and analyses the positive and negative impacts on human settlements of the global trends towards social and economic integration and the rapid changes in information and communication technologies. In this Global Report, the United Nations Centre for Human Settlements (Habitat) draws on specially commissioned and contributed background papers from more than 80 leading international specialists. The report focuses on recent trends in human settlements and their implications for poverty, inequity and social polarization. It develops advance knowledge for urban planning and management policies in support and promotion of inclusive cities and good urban governance. This major and influential report is the most authoritative and up-to-date assessment of human settlements conditions and trends. Written in clear, non-technical language and supported by informative graphics, case studies and extensive statistical data, it should be an essential tool and reference for academics, researchers, planners, public authorities and civil society organizations around the world.

A Signal Victory Apr 14 2021 The Battle of Lake Erie on 10 September 1813 is considered by many to be the most important naval confrontation of the War of 1812. Made famous by the American fleet commander Oliver Hazard Perry's comment, "We have met the enemy and they are ours," the battle marked the U.S. Navy's first successful fleet action and was one of the rare occasions when the Royal Navy surrendered an entire squadron. This book draws on British, Canadian, and American documents to offer a totally impartial analysis of all sides of the struggle to control the lake. New diagrams of the battle are included that reflect the authors' modification of traditional positions of various vessels. The book also evaluates the strategic background and tactical conduct of the British and the Americans and the command leadership exercised

by Perry and his British opponent, Commander Robert H. Barclay. Not since James Fenimore Cooper's 1843 book on the subject has the battle been examined in such detail, and not since Alfred Thayer Mahan's 1905 study of the war has there been such a significant reinterpretation of the engagement. First published in hardcover in 1997, the book is the winner of the North American Society for Oceanic History's John Lyman Book Award.

Donald Davidson on Truth, Meaning, and the Mental Nov 02 2022 The analysis of the connections between truth, meaning, thought, and action poses a major philosophical challenge—one that Donald Davidson addressed by establishing a unified theory of language and mind. This volume offers a reappraisal of Davidson's intellectual legacy. Twelve specially written essays by leading philosophers in the field illuminate a range of enduring philosophical problems, and engage in particular with Ernie Lepore and Kirk Ludwig's interpretation of Davidson's philosophy. The collection affirms Davidson's continuing influence on the study of language, mind, and action, and offers a variety of new perspectives on his work.

The Rise and Fall of the Dinosaurs Nov 29 2019 The Times Science Book of the Year. A Sunday Times Bestseller. 66 million years ago the dinosaurs were wiped from the face of the earth. Today, Dr. Steve Brusatte, one of the leading scientists of a new generation of dinosaur hunters, armed with cutting edge technology, is piecing together the complete story of how the dinosaurs ruled the earth for 150 million years. The world of the dinosaurs has fascinated on book and screen for decades - from early science fiction classics like The Lost World, to Godzilla terrorizing the streets of Tokyo, and the monsters of Jurassic Park. But what if we got it wrong? In The Rise and Fall of the Dinosaurs, top dinosaur expert Brusatte, tells the real story of how dinosaurs rose to dominate the planet. Using the fossil clues that have been gathered using state of the art technology, Brusatte follows these magnificent creatures from their beginnings in the Early Triassic period, through the Jurassic period to their final days in the Cretaceous and the legacy that they left behind. Along the way, Brusatte introduces us to modern day dinosaur hunters and gives an insight into what it's like to be a paleontologist. The Rise and Fall of the Dinosaurs is full of thrilling accounts of some of his personal discoveries, including primitive human-sized tyrannosaurs, monstrous carnivores even larger than T. rex, and feathered raptor dinosaurs preserved in lava from China. At a time when Homo sapiens has existed for less than 200,000 years and we are already talking about planetary extinction, The Rise and Fall of the Dinosaurs is a timely reminder of what humans can learn from the magnificent creatures who ruled the earth before us. 'Thrilling . . . the best book on the subject written for the general reader since the 1980s.' - The Sunday Times

Overcome and Strive: Mar 02 2020 There's never a dull moment at New Kapington High School. The students' test scores, the music programs, and the athletic program are all outstanding, and the teaching staff is, for the most part, exceptional—although some of them occasionally find themselves caught up in crazy controversies. Twenty-five-year-old English teacher Patricia Dooble is one of the cool faculty members. Although her behavior and clothing are a bit risqué, students know they can trust her. Another young teacher, Daniel Gardelo, runs a popular restaurant on the weekends. It's mid-May, and everyone is just trying to make it to the end of the term. But soon the school is embroiled in a series of wild events: a leaked sex video, an accidental pregnancy, a school shooting, a suicide by fire, and a bomb threat. There's no telling what will happen next. In this play as the school year winds down, teachers, students, and community members experience a variety of shocks, scandals, and tragedies.

John Davidson, First of the Moderns Aug 31 2022 The first biography of Davidson for more than 30 years, this study shows the poet to be both a key figure in the emergence of literary modernism and an important influence on poets as diverse as T.S. Eliot and Hugh MacDiarmid. John Sloan presents a wealth of new information about Davidson's life, including his struggles in London as a penniless author. The picture which emerges is not simply of a late Victorian rebel, but of a proto-Modernist who pioneered a new idiom and subject matter for twentieth-century verse.

The Governors of New South Wales 1788-2010 Jan 12 2021 This book contains biographical accounts of all 37 Governors of New South Wales from Arthur Phillip in 1788 to Marie Bashir. Highlights of the book include John Hunter's amazing sea voyages, the erratic career of the 'devious and foul-tempered' William Bligh, the highly public clashes of Sir Hercules Robinson (nicknamed the 'Crisis maker') with Governments and Parliament, the 'Boy's Own' Naval career of the swashbuckling Sir Harry Rawson, the extraordinary

double life of Lord Beauchamp and the dramatic events surrounding Sir Philip Game's dismissal of Jack Lang. Leading historians such as Brian Fletcher, JM Bennett, Geoffrey Bolton, Graham Freudenberg, Anne Twomey, Chris Cunneen, Ian Hancock, Evan Williams and Rodney Cavalier tell of both extraordinary lives and the political and constitutional crises many had to face.

Florida Studies Jan 24 2022 Florida was the first region of the United States to be discovered, explored, and, after a fashion, settled by Euroamericans. Its population in the early 21st century is approaching 17 million. Within years the number of people living in the state will surpass those living in New York, and the Sunshine State will become the most populous area east of the Mississippi. The first book in English about Florida was written by Jean Ribault. A French adventurer, Ribault established a colony of Huguenots near present-day Jacksonville. He was captured by the very able Spanish commander Pedro Menendez, who ordered his French rival and all his minions killed. The state's long and colorful past is matched by its equally long and colorful literary production. Strangely, critical assessment of Florida literature has lagged far behind. With this volume, the Florida College English Association has formally begun an effort to correct this lamentable oversight. Included are papers on every aspect of Florida literature and history by scholars from every part of the state who are employed in every kind of institution of higher learning. Of special interest are the studies of Florida literature in the 19th century and in the late 20th and early 21st centuries, areas that are generally ignored in national journals. The papers on the contributions of African-American literary figures, such as Zora Hurston and James Weldon Johnson, are noteworthy. Of particular interest are the suggestions for teaching Florida studies in the classroom, which can be adapted for high school as well as college students.

Creating Your Own Space Feb 10 2021 The relationship between women and houses has always been complex. Many influential writers have used the space of the house to portray women's conflicts with the society of their time. On the one hand, houses can represent a place of physical, psychological and moral restrictions, and on the other, they often serve as a metaphor for economic freedom and social acceptance. This usage is particularly pronounced in works written in the nineteenth and twentieth century, when restrictions on women's roles were changing: "anxieties about space sometimes seem to dominate the literature of both nineteenth-century women and their twentieth-century descendants." The Metaphor of the House in Feminist Literature uses a feminist literary criticism approach in order to examine the use of the house as metaphor in nineteenth and twentieth century literature.

Injured Parties Jul 18 2021 On 9 November 1966, popular GP Dr Helen Davidson was battered to death in dense woodland while birdwatching and exercising her dog a few miles from her Buckinghamshire home. Her body was found the next day, her eyes having been pushed into her skull. 'She had binoculars round her neck, spied illicit lovers, was spotted, and one or both of them killed her,' surmised Detective Chief Superintendent Jack 'Razor' Williams of New Scotland Yard. He had received fifty police commendations in his career, yet not one for a murder enquiry. Unsurprisingly, within weeks the police operation was wound down, Williams retired, and another cold case hit the statistics. Fifty years later, amateur sleuth and author Monica Weller set about solving the murder - without the help of the prohibited files. As she sifted the evidence, a number of suspects and sinister motives began to emerge; it was clear it was not a random killing after all. Weller uncovered secret passions, deep jealousies, unusual relationships and a victim with a dark past. Her persistence and dedication were dramatically rewarded when she uncovered the identity of the murderer - revealed here for the first time.

The International System for Serous Fluid Cytopathology Sep 19 2021 This book is the culmination of an international effort to bring consistency and diagnostic efficiency to effusion cytology for the sake of patient care. The authors recognize special challenges in serous fluid cytopathology, such as reporting the presence of Mullerian epithelium in peritoneal fluids. What is an appropriate serous fluid volume to ensure adequacy? How should mesothelial proliferations be reported and is it appropriate to make an interpretation of malignant mesothelioma? How specific should a report be regarding the origin and subtyping of tumors found in serous fluids? What are the appropriate quality monitors for this specimen type? Special chapters on considerations for peritoneal washings, cytopreparatory techniques, mesothelioma and quality management are included to address these issues. The text contains literature reviews that elucidate existing evidence in support of current practices and recommendations. Expert opinions on where evidence was lacking, the most common practices were adopted by consensus, and where there was no commonality, are employed. Written by experts in the field, *The International System for Serous Fluid Cytopathology* serves as a collaborative effort between the International Academy of Cytology and the American Society for Cytopathology and calls upon participation of the international cytopathology and oncology communities to contribute to the development of a truly international system for reporting serous fluid cytology

Dark Quadrant Aug 19 2021 From Truman to Trump, the deep corruption of our political leaders unveiled. Many critiques of the Trump era contrast it with the latter half of the twentieth century, when the United States seemed governed more by statesmen than by special interests. Without denying the extraordinary

vigor of President Trump's assault on traditional ethical and legal norms, Jonathan Marshall challenges the myth of a golden age of American democracy. Drawing on a host of original archival sources, he tells a shocking story of how well-protected criminals systematically organized the corruption of American national politics after World War II. Marshall begins by tracing the extraordinary scandals of President Truman, whose political career was launched by the murderous Pendergast machine in Missouri. He goes on to highlight the role of organized crime in the rise of McCarthyism during the Cold War, the near-derailment of Vice President Johnson's political career by two mob-related scandals, and Nixon's career-long association with underworld figures. The book culminates with a discussion of Donald Trump's unique history of relations with the traditional American Mafia and newer transnational gangs like the Russian mafiya—and how the latter led to his historic impeachment by the House of Representatives.
