Biology Unit 1 for CAPE Examinations Sep 02 2022 Two new titles that provide comprehensive coverage of the syllabus. Units 1 and 2 of Biology for CAPE® Examinations provide a comprehensive coverage of the CAPE® Biology syllabus. Written by highly experienced, internationally bestselling authors Mary and Geoff Jones and CAPE® Biology teacher and examiner Myda Ramesar, both books are in full colour and written in an accessible style. Learning objectives are presented at the beginning of each chapter, and to assist students preparing for the examination, each chapter is followed by questions in the style they will encounter on their examination papers.

Quality-of-Life Research in Chinese, Western and Global Contexts Sep 21 2021 The majority of studies on the quality of life have been conducted in Western contexts and are based on Western participants. Comparatively speaking, there are only a few studies that have been conducted in different Chinese contexts. Also, there are fewer QOL studies based on children and adolescents, or studies that examine the relationship between QOL and economic disadvantage. In addition, more research is needed to address the methodological issues related to the assessment of quality of life. This volume is a constructive response to the challenges described above. It is the first book to cover research in Chinese, Western and global contexts in a single volume. It is a ground-breaking volume in which Chinese studies on the quality of life are collected. The book includes papers addressing family QOL, quality of life in adolescents experiencing economic disadvantage, and methodological issues in the assessment of QOL. It is written by researchers working in a variety of disciplines.

The Material Point Method Apr 04 2020 The Material Point Method: A Continuum-Based Particle Method for Extreme Loading Cases systematically introduces the theory, code design, and application of the material point method, covering subjects such as the spatial and temporal discretization of MPM, frequently-used strength models and equations of state of materials, contact algorithms in MPM, adaptive MPM, the hybrid/coupled material point finite element method, object-oriented programming of MPM, and the application of MPM in impact, explosion, and metal forming. Recent progresses are also stated in this monograph, including improvement of efficiency, memory storage, coupling/combination with the finite element method, the contact algorithm, and their application to problems. Provides a user's guide and several numerical examples of the MPM3D-F90 code that can be downloaded from a website Presents models that describe different types of material behaviors, with a focus on extreme events. Includes applications of MPM and its extensions in extreme events, such as transient crack propagation, impact/penetration, blast, fluid-structure interaction, and biomechanical responses to extreme loading

Medical Terminology: A Programmed Systems Approach Feb 12 2021 This best-selling medical terminology resource is now even better with a newly robust suite of supplement options for instructors, innovative built-in learning tools for students, and extensive updates reflecting the most accurate, current industry terms today. MEDICAL TERMINOLOGY: A PROGRAMMED SYSTEMS APPROACH, 10E uses a unique word-building programmed approach that teaches students to break down key medical terms into their roots, prefixes, and suffixes. This programmed-learning format requires active participation through reading, writing, answering questions, labeling, repetition, and providing immediate feedback. By using didactic color, engaging review activities, back-of-the-book flash cards, and an accompanying CD-ROM with interactive learning activities, this book provides a complete package for building a comprehensive entry-level knowledge of medical language for students with little or no previous experience. Now in its 10th edition, this book is a proven resource

Design Research on Learning and Thinking in Educational Settings Jan 14 2021 The key question this book addresses is how to identify and create optimal conditions for the kind of learning and development that is especially important for effectively functioning in the 21st century. Taking a new approach to this long-debated issue, it looks at how a design research-based science of learning (with its practical models and related design research) can provide insights and integrated models of how human beings actually function and grow in the social dynamics of educational settings with all their affordances and constraints. More specifically: How can specific domains or subject matters be taught for broad intellectual development? How can technology be integrated in enhancing human functioning? How can the social organization of classroom learning be optimized to create social norms for promoting deep intellectual engagement and personal growth? Part I is concerned with broad conceptual and technical issues regarding cultivating intellectual potential, with a focus on how design research might fill in an important niche in addressing these issues. Part II presents specific design work in terms of design principles, models, and prototypes.

Mathematics for Economics and Business Feb 01 2020 Mathematics is the language of science. As such, it is a basic tool for gaining knowledge in any scientific discipline. Students often wonder why mathematics subjects are also included in economics and business studies. Any economist should be fluent in mathematical language and capable of applying mathematics in the analysis, modelling and solving of economic problems. This book covers a broad range of mathematics topics, all of which are essential to gaining the skills required in economics and business professions. Along with theoretical explanations, essential for correctly understanding the concepts involved, it includes a large number of numerical examples. Each chapter is concluded by a collection of exercises with solutions and a self-assessment test, which are key components of the learning process for each topic.
