Achieving Equity and Quality in Higher Education Jun 25 2019 Across the world, higher education is witnessing exponential growth in both student participation and types of educational providers. One key phenomenon of this growth is an increase in student diversity: governments are widening access to higher education for students from traditionally underrepresented groups. However, this raises questions about whether this rapid growth may in face compromise academic quality. This book presents case studies of how higher education institutions in diverse countries are maintaining academic excellence while increasing the access and participation of students from historically underrepresented backgrounds. Including case studies spanning four continents, the authors and editors examine whether increasing widening participation positively impacts upon academic quality. This volume will be of interest and value to students and scholars of global higher education, representation and participation in education, and quality in higher education.

<u>Sleep</u> Mar 03 2020 We spend more than 200,000 hours sleeping in a lifetime, the equivalent of more than 8,000 days. Yet research has only just begun to decode the mysteries behind what can go wrong. Here, Dr. Carlos H. Schenck, one of the most prominent sleep doctors and researchers in the country, takes us on an incredible journey into the mechanisms of sleep, and the spectrum of disorders that can occur when these mechanisms go bizarrely awry. Dr. Schenck discusses the causes and treatments for common problems-insomnia, restless legs syndrome, sleep apnea, and more. But what sets this book apart is the rare glimpse it offers into the cutting-edge science that he and others have pioneered in identifying, understanding, and explaining the realm of "parasomnias"-the mysterious, more extreme sleep disorders,such as dream enactment, sleep-related eating disorder, sexsomnia, sleepwalking, sleep terrors, sleep paralysis, and even sleep violence, which affect at least 20 million Americans. Comprehensive, engrossing, and backed by the latest medical research, Sleep is a groundbreaking work about what continues to be one of our most mysterious medical puzzles-making it an indispensable guide for sufferers of all sleep disorders and their families.
Apa/Mla Guidelines (Speedy Study Guides) Aug 20 2021 APA/MLA Guidelines provide writers with the information that they need to present their research findings correctly in APA/MLA formatted papers. Because both styles require in-text citations, confusion may set in when writing a paper in MLA. The use of the Guideline will allow you to decide quickly between APA: (Johnson, 2010) or MLA: (Johnson 25). Such information at your fingertips will end the waste of time searching for information and allow you to present a strong credible paper.
Case Research in Public Management Sep 28 2019 Highly readable and non-technical, this handbook is designed to help students and non-profit managers gain a working knowledge of the principles and practices of conducting qualitative case study research in public organizations. This book is a motherload of practical and comprehensive guidance to planning, conducting, analyzing, and reporting case research project findings. McNabb begins with a detailed rationale for the use of the case research approach in public administration, non-profit organizations, and political science. Then it provides step-by-step instructions on how to conduct single-case, multicase, and meta-analysis research, with guidelines on organizing and writing the case report. Case Research in Public Management also includes many examples of case studies in a wide range of important topics in public administration, including performance management, sustainable government, technology management, security issues, emergency and disaster management, social and health services, infrastructure, public transportation, and transforming the work of government.
<u>What Every American Should Know About Who's Really Running America</u> Nov 30 2019 A guide to the politicos, money men, lobbyists, and deal makers who really run America What foreign country has the power to send America crashing into a recession? Why is the USA still dangerously dependent on oil, when viable energy alternatives have existed for decades? Who made the call that we should return to nuclear energy—and then took a high-paying position with a nuclear company? Which youth group was a spawning ground for many contemporary power mongers? What lobbyists and special-interest groups are running the show on Capitol Hill—and exactly what tools of persuasion are they using? Melissa Rossi answers these questions and more in this timely and topical guide to who's pulling the strings behind the scenes of American politics. This latest edition of Rossi's popular What Every American Should Know. . . series puts the spotlight on our own backyard, covering topics like: • Which groups ensure that Americans pay more for drugs than any other nation • How our immigration laws are damaging the U.S. economy • Who's telling the school boards what your child will learn • Who really benefits from U.S. foreign policy • How corporations and government agencies are spying on us • Why we should avoid electronic voting • Who killed the electric car and who exposed it Organized by topic for easy reference, What Every

American Should Know About Who's Really Running America shows Americans what is going on behind the scenes and how they can counterbalance the influence of a small, powerful elite to put the power back where it should be—in the hands of the people.

Understanding Business Research Apr 27 2022 Explore the essential steps for data collection, reporting, and analysis in business research Understanding Business Research offers a comprehensive introduction to the entire process of designing, conducting, interpreting, and reporting findings in the business environment. With an emphasis on the human factor, the book presents a complete set of tools for tackling complex behavioral and social processes that are a part of data collection in industry settings. Utilizing numerous real-world examples throughout, the authors begin by presenting an overview of the research process, outlining key ideas relating to the business environment, ethics, and empirical methods. Quantitative techniques and considerations that are specific to business research, including sampling and the use of assessments, surveys, and objective measures are also introduced. Subsequent chapters outline both common and specialized research designs for business data, including: Correlational Research Single Variable Between-Subjects Research Correlated Groups Designs Qualitative and Mixed-Method Research Between-Subjects Designs Between-Subjects Factorial Designs Research with Categorical Data Each chapter is organized using an accessible, comprehensive pedagogy that ensures a fluid presentation. Case studies showcase the real-world applications of the discussed topics while critical thinking exercises and Knowledge Checks supply questions that allow readers to test their comprehension of the presented material. Numerous graphics illustrate the visual nature of the research, and chapter-end glossaries outline definitions of key terms. In addition, detailed appendices provide a review of basic concepts and the most commonly used statistical tables. Requiring only a basic understanding of statistics, Understanding Business Research is an excellent book for courses on business statistics as well as business and management science research methods at the graduate level. The book is also a valuable resource for practitioners in business, finance, and management science who utilize qualitative and quantitative research methods in their everyday work.

Keys to Running Successful Research Projects Oct 22 2021 Keys to Running Successful Research Projects: All the Things They Never Teach You provides a step-by-step guide for the management of a successful research project or program. Through the use of illustrative case studies, the book covers all aspects of management that should be included during researcher training, helping researchers overcome the many challenges they face in their day-to-day management of people, time and resources. Links throughout provide more detailed information from gold standard sources on every topic. It is a must-have reference for postdocs, research managers and administrators in colleges, universities, hospitals and research institutes. In addition, it is an ideal resource for those working in grant and contract funding groups in the life sciences and medical fields. Covers the nuts and bolts of research management in the life sciences, medical and health fields Provides simple solutions to issues that come up on the job Ensures that hard-fought for money is spent wisely and well

Robotics Research May 17 2021 At the dawn of the new millennium, robotics is undergoing a major transfor- tion in scope and dimension. From a largely dominant industrial focus, robotics is rapidly expanding into the challenges of unstructured environments. Inter- ting with, assisting, serving, and exploring with humans, the emerging robots will increasingly touch people and their lives. The goal of this new series of Springer Tracts in Advanced Robotics is to bring,inatimelyfashion,thelatestadvancesanddevelopmentsinroboticsonthe basisoftheirsigni?canceandquality.Itisourhopethatthegreaterdissemination of research developments will stimulate more exchanges and collaborations among the research community and contribute to further advancement of this rapidly growing ?eld. As one of robotics pioneering symposia, ISRR, the "International Sym- sium on Robotics Research," has established over the past two decades some of the ?eld's most fundamental and lasting contributions.With the launching of STAR, this and other thematic symposia devoted to excellence in robotics ?nd an important platform for closer links and extended reach within the research community. The Tenth edition of "Robotics Research" edited by Raymond Jarvis and AlexZelinskyoffersinits11-partvolumeacollectionofabroadrangeoftopics in robotics. The content of these contributions provides a wide coverage of the current state of robotics research: the advances and challenges in its theoretical foundation and technology basis, and the developments in its traditional and new areas of applications.

Running, Identity and Meaning Oct 10 2020 Running, Identity and Meaning showcases how gender, class, age and ethnicity influence whether and how different groups participate in the sport, and explores its role in the reproduction of social structure and the search for distinction.

Intelligent Decision Making Systems Jan 31 2020 ISKE2009 is the fourth in a series of conferences on Intelligent Systems and Knowledge Engineering. The ISKE2009 proceedings covers state-of-the-art research and development in various areas of Intelligent Systems and Knowledge Engineering, particularly of Intelligent Decision Making Systems.

Advances and Trends in Structural Engineering, Mechanics and Computation Jul 27 2019 Advances and Trends in Structural Engineering, Mechanics and Computation features over 300 papers classified into 21 sections, which were presented at the Fourth International Conference on Structural Engineering, Mechanics and Computation (SEMC 2010, Cape Town, South Africa, 6-8 September 2010). The SEMC conferences have been held every 3 years in

Beyond Databases, Architectures and Structures. Paving the Road to Smart Data Processing and Analysis Jan 13 2021 This book constitutes the refereed proceedings of the 15th International Conference entitled Beyond Databases, Architectures and Structures, BDAS 2019, held in Ustroń, Poland, in May 2019. It consists of 26 carefully reviewed papers selected from 69 submissions. The papers are organized in topical sections, namely big data and cloud computing; architectures, structures and algorithms for efficient data processing and analysis; artificial intelligence, data mining and knowledge discovery; image analysis and multimedia mining; bioinformatics and biomedical data analysis; industrial applications; networks and security.

USDA Forest Service General Technical Report NC. Jan 01 2020

Building & Running a Successful Research Business Sep 01 2022 "Online research is one of the hottest work-from-home business opportunities of the decade, and this handbook provides the information necessary to launch, manage, and build a successful research business. Explained is every step of the process including getting started, running the business, marketing, and researching. The important question of ôis this business right for you?ö is addressed in detail, as are how to close the sale, managing clients, promoting services on the web, and tapping into powerful information sources beyond the web. Also provided are a description of the types of research independent information professionals are expected to provide and surveys of the online and offline tools necessary to build expertise and ensure a satisfied clientele."

Paper Jul 07 2020

Running from the Storm Jul 31 2022 Climate change on a global scale has been described as 'the mother of all environmental issues', with many scientists warning of the dire consequences already facing us, even if remedial action is undertaken immediately. It is almost certainly the largest, most difficult environmental challenge the world now faces. And it has also provided the Australian federal government with one of its most awkward political issues - with the nation being transformed in the eyes of many from a world environmental leader into an international pariah. Running

from the Storm is a timely book from one of Australia's most prominent commentator on the issue. It provides a lively, comprehensive and provocative account of the key issues that affect climate change policy in Australia. It details the many policy failures, the murky politics of climate change, the corruption of the policy process, the influence of the fossil-fuel industries on our politicians and policy makers, and the ethical issues that underpin the public debate. All of these are discussed in the context of the momentous international developments before and after the landmark Kyoto Protocol in December 1997.

U.S. Forest Service Research Paper RM. Jun 29 2022

Runner's World Training Journal Oct 29 2019 A revised edition of the ultimate week-by-week training journal for runners of all abilities— from the top experts in the sport Runner's World Training Journal – by the Editors of Runner's World – provides the perfect framework to help every kind of runner, from fitness joggers to competitive racers, track a year's worth of runs. This updated and revised version includes the latest tips, advice, and motivation from the pros to keep runners going all year long. With space for recording daily routes, mileage, times, and notes—s well as weekly doses of information on training, nutrition, and injury prevention—eaders can track their progress as they achieve their running goals, whether they seek better aerobic conditioning, weight loss, or world records. The only runner's training journal with full-color photos throughout and top-notch tips from the experts at Runner's World, this handsomely redesigned journal provides: • Smear-proof paper and a handy spiral binding for ease of use • A mple space for readers to record facts about each day's run—including route, distance, time, and cross-training—and to note how they felt at the time • A Week-at-a-Glance feature that helps runners summarize their weekly training quickly and easily • Advice for runners on how to analyze their data and set new goals for the next year

Runner's World Sep 08 2020 Runner's World magazine aims to help runners achieve their personal health, fitness, and performance goals, and to inspire them with vivid, memorable storytelling.

Running the Gauntlet of Anti-Semitism Nov 22 2021 During the war, Checinski (who was born in Łódź in 1924) participated in the Łódź ghetto resistance. He was interned in the Gleiwitz labor camp and survived a death march. This book deals with his personal experiences after the war. Pp. 18-167 focus on antisemitism he and his family encountered in Poland, despite his status as a high-ranking officer in military counterintelligence. Recounts events during the antisemitic campaigns of 1956-58 and 1967-69. Checinski and his family emigrated to Israel in 1969 and then went to the U.S. in 1976. However, his encounters with antisemitism continued. At Harvard he found that at least some professors tended to conceal their Jewish origins. In 1982 he returned to work at the Hebrew University in Jerusalem. From 1984 he taught at the U.S. Army Russian Institute (USARI) in Germany (in 1993 USARI was integrated with the George C. Marshall European Center for Security Studies as one of its divisions). There, too, he encountered antisemitism and discovered that antisemites (including Holocaust deniers) were protected by their bosses and were not rebuked or dismissed. Pp. 286-304 contain photographs and documents.

ICTR 2020 3rd International Conference on Tourism Research Feb 11 2021

Running Around in Circles Dec 24 2021 Kunal Chaudhari, the author of Running around in Circles, is an engineering major at Amity University. The author pursued his education at the University of Windsor, Ontario, Canada before moving back to India. He takes keen interest in sports, especially cricket having played professionally for over twelve years. More recently, he's been playing college level and university level cricket. Like most first time authors, Kunal drew inspiration from his personal life. This novel is a way for him to explore his own personality, thus his own perspective on the vagaries of everyday life. His insight on life is quite similar to that of most young people. So in a way Kunal's writing reflects the attitude of today's youth in every walk of life. Relating to his work becomes easier as he lives the life that he talks about in his book. The author loves life and lives it to the fullest. Humor is something that comes naturally to him, so inevitably his first novel has fantastic humor. Just at the age of twenty one, for Kunal the world is his oyster.

Handbook of Physical Testing of Paper Jul 19 2021 Scientists from academic and the paper industry compile as many aspects of testing properties of paper as possible into a broad reference to help people who plan, specify, and evaluate the physical and mechanical testing of paper material take advantage of the many developments in recent years. An initial essay in each volume discusses the independent invention and widespread use of paper in Mesoamerica beginning sometime before AD 660. The two volumes are paged and indexed separately, but do not seem to be topically distinct. The first edition, Handbook of Physical and Mechanical Testing of Paper and Paperboard appeared in 1983; the second contains 30 chapters, a third of which are new and the others substantially revised, updated, and expanded. c. Book News Inc.

Psychology Research Methods Mar 27 2022 This engaging undergraduate textbook uses research relevant to students' lives to teach research methodology.

Awakening Instinct * Running the Gauntlet * Windows Through Time Feb 23 2022 A call to compassionate, awakened action alike Marianne Williamson's speech for Nelson Mandela in "A Return to Love". A ' brain bath ', this collection of three astute, inter-woven writings opens the human mind far beyond the reaches of analytical thinking. Inspired by processes of deep intuition, these treasures awaken us to the spirit within and the great mystery without, rekindling our memory of the 'puzzle' of which we are all a part. "Awakening Instinct" is a treatise on the vital need for humans to de-fossilize their latent powers – their 'Barometers of Time', lamps with which to light their path. "Running the Gauntlet" opens our hearts wide to experiencing our full potential and recognizing the 'gauntlet' we must run to fully embody it. "Windows Through Time" leaps into the unknown like a Vision Quest, bringing back great riches of conscious understanding. In its gentle yet remarkable journey it makes the nameless, uncharted universe tangible and accessible. A graceful, powerful, life-changing read.

Running Science Jan 25 2022 More than 50 years ago, New Zealand's Arthur Lydiard started using terms like base training, periodization, and peaking. His U.S. counterpart, Bill Bowerman, brought Lydiard's term for what until then had been called roadwork, or jogging, to the States. Soon after, the 1970s running boom started, spurred by exercise-advocating research from the growing fields of exercise science and sports medicine and from enthusiasts such as Jim Fixx, author of The Complete Book of Running. One of Bowerman's former runners at the University of Oregon, Phil Knight, saw to it that those millions of new runners had swoosh-adorning footwear designed specifically for their sport. The pace of knowledge enhancement and innovation has, in fact, been so brisk through the years that even highly informed runners could be excused for not keeping up, but no longer. Running Science is a one-of-a-kind resource: • An easily comprehended repository of running research • A wealth of insights distilled from great sport and exercise scientists, coaches, and runners • A do-it-right reference for a host of techniques and tactics • An array of the most credible and widely used training principles and programs • Perhaps most of all, a celebration of the latest science-based know-how of running, now truly the world's most popular sport Running Research News and Training Update editor Owen Anderson presents this comprehensive work in a compelling way for runners. A PhD and coach himself, Anderson has both a great enthusiasm for sharing what scientific studies offer the running community and a keen sense of what's really important for today's informed runners to know.

Research in Education Mar 15 2021

The HM Learning and Study Skills Program Sep 20 2021 Level III (Grades 11-13) The hm Learning and Study Skills Program: Level III was designed to provide an introduction to learning and study skills for high school juniors and seniors and beginning college students through a series of activity-oriented units. It is structured on the assumption that an activity-oriented lesson is the most effective instructional strategy for the teaching of study skills: more succinctly, that "learning by doing" is the best way "study smart." Learning and study skills are important for learning. They are methods and ways of doing things that help make learning easier. Understanding how to study can also facilitate learning by assisting students as they complete assignments correctly and efficiently during a specified period of time. Just like any other skill, knowing how to learn and study proficiently must be learned and practiced over time. The Program has been designed to help students learn more efficiently and effectively.

Walking Apr 03 2020 A guide to walking for health and fitness provides advice to women on specifically female concerns, reasons to exercise, activity scheduling, burning fat, nutrition, racing, typical problems that arise, clothing, and the older walker.

Keys to Running Successful Research Projects Oct 02 2022 Keys to Running Successful Research Projects: All the Things They Never Teach You provides a step-by-step guide for the management of a successful research project or program. Through the use of illustrative case studies, the book covers all aspects of management that should be included during researcher training, helping researchers overcome the many challenges they face in their day-to-day management of people, time and resources. Links throughout provide more detailed information from gold standard sources on every topic. It is a must-have reference for postdocs, research managers and administrators in colleges, universities, hospitals and research institutes. In addition, it is an ideal resource for those working in grant and contract funding groups in the life sciences and medical fields. Covers the nuts and bolts of research management in the life sciences, medical and health fields Provides simple solutions to issues that come up on the job Ensures that hard-fought for money is spent wisely and well

The Lazy Man's Guide to [ultra]Marathon Running Jun 17 2021 Completing a marathon, a half marathon, or an ultramarathon (distance greater than 26.2 miles) is an amazing feat, and it is an amazing feat that can be accomplished by all. If you ever thought about running but thought that it was "too hard" or that you weren't "tough enough", this book is for you! On the other hand, if you are a serious runner who is looking for that competitive edge, this book is for you as well! Professor Waterpeace shares a number of research-based efficient training methods which will turn the average person into a fat-burning machine, and turn the experienced runner into a competitive monster. Plus, there's an entire chapter about the necessity of eating (dark) chocolate as part of any effective training plan! This is the perfect book for anyone who runs or has ever even thought about running. This edition includes a foreword by the great Tom Osler, as well as a complete reprint of Osler's seminal 1967 running book, The Conditioning of Distance Runners.
