E-Research in Educational Contexts Sep 20 2021 This book explores the impact of e-research in education and the opportunities presented by a new generation of research approaches and tools. 'E-research' is an umbrella term that encompasses all digital research methods used for data collection and analysis including those involving handheld mobile devices. This is a current concern as the emergence of online tools that enable people to collaborate, create, and share information has led to the widespread use of these new digital research methods. Indeed, new tools and technologies are emerging almost daily and are being taken up by researchers for their ease of data collection and analysis. As a result the book investigates the implications of how we conceptualise educational research in the digital age. In addressing a range of key themes, from the ethics of e-research to the relationships between researchers and participants, the book presents original studies from a variety of educational contexts where digital tools are being used, and should be of value to postgraduate students, academic researchers, and policy makers. This book was originally published as a special issue of the International Journal of Research & Method in Education.

Den store M•NELANDINGEN Oct 29 2019 "? og dette skal bli var manelanding" Statsminister Stoltenbergs budskap til det norske folk i nyttarstalen 2006. Det var noe anebrytende som skulle skje, noe med fullskala rensing av CO2 på vart nye gasskraftverk. Norge skulle igjen være foregangslandet. Men usserne, de trodde ikke at Var Manelanding handlet bare om CO2-fangst og umiddelbart fikk statsministerens nyttarshilsen et nytt fokus: Frykten for en raketbase på selveste Nordpolen. Denne boken tar for seg livet i skyggen av de hemmelige tjenestene på sytti- og attitallet og utvikler seg til en krimspionroman med flere stormakter involvert, godt inn i det nye arhundret. Deler av handlingen refererer seg til forfatterens egne opplevelser. Men det meste er fiksjon. Reisen går blant annet til Dracula-land i ksotiske Transilvania. Bestikkelser, forsøk på verving, overvaking, jaerlighet, brutte lofter, insest, selvmord og mord. Det er nok a ta av. Spenningen topper seg ved avslutningen i Moskva, i Bymarka, Trondheim og den nedlagte Grakallen flystasjon."

Reforming Teaching and Teacher Education Jul 27 2019 What are the prerequisites for reforming education, and how can these reforms be seen in school development and culture? How should teacher education support this reform process? What are the principles and practices underlying the functioning of the schools of tomorrow? These questions are examined in this unique volume. The authors in this book argue that the central function of teacher education and education in general is to respond to the challenges brought on by the twenty-first century. According to this approach, the competencies and skills needed in the future are not merely a new addition to school activities, but rather something requiring a comprehensive reform of school culture encompassing teacher education, curricula, and teaching methods. Such a fundamental process of change in the action and thinking models used by schools would be an effort to achieve a complete transformation, the result of which would be schools developing into organizations that are both creative and imbued with a strong sense of community. A central attribute is that the creation of new knowledge is not just restricted to the classroom but also takes place in out-of-school environments. This would link learning to its natural context, eventually leading to an ideal instruction that is actively problem oriented, holistic, and life centered. This reform-minded volume is divided into three parts. The first part focuses on the reform processes in teacher education, the second on the reforms of pedagogics at schools and teacher education institutions, and the third on the processes of reculturing schools. New prospects for active schools in the United States and Europe, as well as in Japan and China, are discussed.

The Oxford Handbook of Local and Regional Democracy in Europe Mar 27 2022 The Oxford Handbook of Local and Regional Democracy in Europe analyses the state of play of democracy at the subnational level in the 27 member states of the EU plus Norway and Switzerland. It places subnational democracy in the context of the distinctive Anglo, the French, the German and Scandinavian state traditions in Europe asking to what extent these are still relevant today. The Handbook adapts Lijphart's theory of democracy and applies it to the subnational levels in all the country chapters. A key theoretical issue is whether subnational (regional and local) democracy is derived from national democracy or whether it is legitimate in its own right. Besides these theoretical concerns it focuses on the practice of democracy: the roles of political parties and interest groups and also how subnational political institutions relate to the ordinary citizen. This can take the form of local referendums or other mechanisms of participation. The Handbook reveals a wide variety of practices across Europe in this regard. Local financial systems also reveal a great variety. Finally, each chapter examines the challenges facing subnational democracy but also the opportunities available to them to enhance their democratic systems. Among the challenges identified are: Europeanization, globalization, but also citizens disaffection and switch-off from politics. Some countries have confronted these challenges more successfully than others but all countries face them. An important aspect of the Handbook is the inclusion of all the countries of East and Central Europe plus Cyprus and Malta, who joined the EU in 2004 and 2007. This is the first time they have been examined alongside the countries of Western Europe from the angle of subnational democracy.
