Exemplary Literacy Teachers, Second Edition Nov 16 2021 Identifying what exemplary teachers know and do to promote literacy achievement at every grade level, this highly motivating book provides step-by-step guidance for professional development. It helps teachers assess their strengths and build their competencies in six key domains of literacy instruction directly linked to student success. Featuring skills-building exercises, sample lesson plans, book lists, and over a dozen reproducibles, the book illustrates specific actions that teachers can take to emulate their most effective colleagues in school districts around the country. New to This Edition * Revised and updated based on the authors' professional development work with over 20,000 educators. * Expanded to cover K–12 (prior edition covered K–5). * Now includes material for literacy coaches and administrators, as well as teachers. * "Teacher-in-Action" cases offer vivid snapshots of exemplary practices. *Many of the activities and reproducibles are new or revised.

You're Teaching My Child What? Oct 15 2021 Think Sex Ed Is All About The "Facts of Life"? Think Again. If you think sex education is still about the birds and the bees, think again. And it's not about science either. In her shocking exposé, *You're Teaching My Child What?*, Dr. Miriam Grossman rips back the curtain on sex education today, exposing a sordid truth. Today's sex ed programs aren't based on science; they're based on liberal lies and politically correct propaganda that promote the illusion that children (yes, children) can be sexually free without risk. As a psychiatrist and expert on sexual education, Dr. Grossman cites example after example of schools and organizations whitewashing—or omitting altogether—crucial information that doesn't fit in with their "PC" agenda. Instead, sex educators only tell teens the "facts of life" that promote acceptance, sexual exploration, and experimentation. What sex educators call an education, scientists would call a scam:

- Sex educators won't tell girls their bodies are biologically and chemically more susceptible to STDs; they will only say 3 million girls have a sexually transmitted infection
- Educators say it's natural for children to "explore" their sexuality from a young age and only they can decide when it's right to have sex—the real truth is neurobiologists say teen brains are not developed to fully reason and weigh consequences, especially in "the heat of the moment"
- Teens are told condoms, vaccines and yearly testing provide adequate protection, without being told that studies now show condoms are no match for herpes, HPV and gonorrhea

In *You're Teaching My Child What?*, Dr. Grossman reveals biological truths that you won't find in today's classrooms. *You're Teaching My Child What?* is critical reading for parents with teens and instrumental in teaching children the truth about sex.
