Build Jan 23 2022 THE NEW YORK TIMES BESTSELLER. An unorthodox guide to making things worth making, from 'the father of the iPod and iPhone' and the creator of Nest. Everyone deserves a mentor. For every career crisis every fork in the road, you need someone to talk to. Someone who's been there before, who knows exactly how wobbly and conflicted you feel, who can give it to you straight: Here's how to think about choosing a job. Here's how to be a better manager. Here's how to approach design. Here's how to start a company. Here's how to run it. Tony Fadell learned all these lessons the hard way. He spent the first 10 years of his career in Silicon Valley failing spectacularly. The next 20 building some of the most impactful devices in history - the iPod, iPhone, and Nest Learning Thermostat. He has enough stories and advice about leadership, design, startups, mentorship, decision making, devastating screwups, and unbelievable success to fill an encyclopedia. So that's what this book is. An advice encyclopedia. A mentor in a box. But Tony's doesn't follow the standard Silicon Valley credo that you have to radically reinvent yourself to do. His advice is unorthodox because it's old school. Because it's based on human nature, not gimmicks. Tony keeps things simple: he just tells you what works. He gives you exactly what you need to make things worth PRaising FOR BUILD This is the most fun - and the most fascinating - memoir of curiosity and invention that I've ever read.' The Complete Guide to Making Mead Sep 29 2022 Mead may have been "discovered," as some suggest, when one of our not-yet-upright forebears stuck their hand in a fermenting bee hive and came away with a honeycomb contaminated little more than they bargained for. Whatever the truth, brewers have brought this beverage into the twenty-first century, and you can rest assured that The Complete Guide to Making Mead is a thoroughly up-to-date, modern, authoritative guide to homemade mead. Best of all, it has something for everyone, from the stone-cold beginner to the seasoned veteran. Award-winning mead-maker Steve Platz begins with a brief history of the fermented beverage, a rundown of the various types of mead; and a discussion of the many types of honey that are available, their characteristics, and where to source them. Readers will be treated to discussions of yeast and special ingredients, and the equipment is necessary and recommended and an illustrated and detailed look at the basic process. Readers will also discover advanced techniques, such as oaking, clarifying, aging, spicing, and blending. There are even a section on developing recipes and troubleshooting problems with the brewing process. With more than 100 color photos, The Complete Guide to Making Mead includes dozens of recipes for basic meads (honey only), melomels (honey and other fruits), metheglins (honey and spices), and braggots (honey and malt).

**NAMED ONE OF THE BEST COOKBOOKS OF THE YEAR BY EPICURIUS** John deBary is a veritable cocktail expert with a 100-proof personality, a dash of fun, and garnished with flair—there's nothing muddled about him. In *Drink What You Want*, John breaks down the science of mixology (yes, it's a science) and explains the rules of drink-making. Most important, you'll learn how to tweak any drink, both classic and creative, to your preferences and moods. Are you adventurous or traditional? Sweet or bitter? Brown liquor or clear? While giving newbies a rundown of cocktail culture, lingo, and etiquette, John turns the "cocktail book" concept on its ear by infusing a traditional formal topic with his fresh, conversational voice. Mixology geeks and bottomless brunchers alike will revel in the craft of the cocktail, from classic to modern to funky. Cocktails are about creativity and setting the mood, and *You Want overflows* with both.

**Mixing and Mastering in the Box** 28 2019 "Mixing and mastering, the two final steps in the complex process of sound engineering, require both artistic finesse and technical facility. Even the slightest difference in the way a process can lead to a shift in the overall aesthetic of a piece, and so sound engineers must work towards an understanding of sound engineering that is particularly oriented towards the artistic and aesthetic. In order to mix, a sound engineer must maintain a distinct set of artistic goals while drawing on an in-depth understanding of the software involved in the process. Creating final masters requires specialized aural skills and a similarly understanding of the software in order to fine-tune the product with respect to these goals. *Mixing and Mastering in the Box* addresses the practical and technological necessities of these two final steps without neglecting the process that is integral to the creation of high-quality recordings. Savage focuses primarily on creating mixes and masters in the Digital Audio Workstation (DAW), or "in the box," currently a popular platform in the field of sound engineering due to the creative advantages and advanced technological capabilities it offers to its users. However, much of the information presented in *Mixing and Mastering in the Box* is also applicable to analog mixing gear, a system of digital and analog tools. This book, which features over one hundred illustrations and a comprehensive companion website, is ideal for beginning or intermediate students in sound engineering with a focus on DAW. Artists who do their own mixing and mastering, or musicians who wish to be better informed when collaborating on mixes and masters"--

**Good Charts** Feb 21 2022 *Dataviz--the new language of business*. A good visualization can communicate the nature and potential impact of information and ideas more powerfully than any other form of communication. For a long time, "dataviz" was left to specialists--data scientists and professional designers. No longer. A new generation of tools and massive amounts of available data make it easy for anyone to create visualizations that communicate ideas effectively than generic spreadsheet charts ever could. What's more, building good charts is quickly becoming a need-to-have skill for managers. If you're not doing it, other managers are, and they're getting noticed for it and credit for contributing to your company's success. In *Good Charts*, dataviz maven Scott Brinatto provides an essential guide to how visualization works and how to use this new language to impress and persuade. *Dataviz* took spreadsheets and word processors were in the early 1980s--on the cusp of changing how we work. Brinatto lays out a system for thinking visually and building better charts through a process of talking, sketching, and prototyping. This book is much more than a set of static rules for making visualizations. It taps into both well-established and cutting-edge research in visual perception and neuroscience, as well as the emerging field of visualization science. Good charts (and bad ones) create "feelings behind our eyes." Along the way, Brinatto also includes many engaging vignettes of dataviz pros, illustrating the ideas in practice. *Good Charts* will help you turn plain, uninspiring content into compelling, merely present information into smart, effective visualizations that powerfully convey ideas.

**Visual Insights** May 15 2021 A guide to the basics of information visualization that teaches nonprogrammers how to use advanced data mining and visualization techniques to design insightful visualizations. In the age of Big Data, tools of information visualization offer us a microscope to help us make sense of the avalanche of data available on every subject. This book offers a gentle introduction to the design of insightful information visualizations. It is a book on the subject that teaches nonprogrammers how to use open code and open data to design insightful visualizations. Readers will learn to apply advanced data mining and visualization techniques to make sense of temporal, geospatial, topical, and network data. The book, developed for use in an information visualization MOOC, covers data analysis algorithms that enable extraction of patterns and trends in data, with chapters devoted to "when" (temporal data), "where" (geospatial data), "what" (topical data), and "with whom" (networks and trees); and to systems that drive research and development. Examples of projects undertaken for clients include an interactive visualization of success of game player activity in *World of Warcraft*: a visualization of 311 number adoption that shows the diffusion of non-emergency calls in the United States; a return on investment study for two decades of HIV/AIDS research funding by NIAID; and a map showing the impact of the HiveNYC Learning Network. *Visual Insights* will be an essential resource on basic information visualization techniques for scholars in many fields, students, designers, or anyone who works with data.

**A Dragon's Guide to Making Your Human Smarter** Apr 01 2020 For fans of *How to Train Your Dragon* comes a new tale about dragon Miss Drake and her human pet Winnie, by a two-time Newbery Honor winner, featuring illustrations by Caldecott Honor winner Mary GrandPré. Three-thousand-year-old Miss Drake has arranged to send her dear pet Winnie to The Spriggs Academy, an extraordinary school for humans and magicals alike. Winnie is particularly excited about magic class and having Sir Isaac Newton for science. She's also making new friends—and frenemies. . . . When a plot to snatch Winnie from her San Francisco home is uncovered, Miss Drake is ready to use her cunning and magic to thwart it. Not that feisty Winnie needs the help. . . . As a team, the intrepid duo you first met in *A Dragon's Guide to the Care and Feeding of Humans* is unstoppable! With equal doses of whimsy and magic, Laurence Yep and Joanne Ryder have crafted an enchanting story about true friendship. Praise for *A Dragon's Guide to Making Your Human Smarter* • "Yep and Ryder keep the magic coming with their whimsical fantasy, enhanced by GrandPré's sweet drawings. The story positively vibrates with fun." —Kirkus Reviews • "Lighthearted episodes of unusual school lessons and field trips, illustrated by GrandPré's winsome spot art, are grounded by Miss Drake's more serious encounters with the goons...a gratifying development as this buoyant, fantastical series continues."—The Horn Book Review Praise for *A Dragon's Guide to the Care and Feeding of Humans* • "Warm humor, magical mishaps, and the main characters' budding mutual respect and affection combine to give this opener for a planned series a special shine that will draw readers and leave them impatient for sequels." —Booklist, Starred • "The alternately comical, suspenseful and sometimes sweetly emotional." —Kirkus Reviews • "Miss Drake's arch narration and the sharp back-and-forth between the characters create an enchanting story, accented by GrandPré's black-and-white spot illustrations." —Publishers Weekly • "With a black-and-white spot illustration opening most chapters, an engaging narrator, and a consistently fluid writing style, this title makes a fine dragon choice for readers." —School Library Journal
