[Resort City In The Sunbelt, Second Edition](#)
Nov 23 2019
Resort City in the Sunbelt is a non-sensationalistic, scholarly account of Las Vegas from the building of the Hoover Dam to the construction of the MGM Grand Hotel. Historian Eugene Moehring provides a balanced view of the city's urban development. Although a unique city in many ways, Las Vegas has displayed characteristics common to other sunbelt cities across the western United States—including underfunded social services, low-density urbanization with a heavy reliance upon automobiles, a sluggish response to problems within minority communities, a preference for efficient, business-like government, and a mania for low taxes. The gaming and resort aspects are fully considered, but Moehring emphasizes the city as part of the continually expanding sunbelt. From this important study, historians will conclude that, despite some of its unusual traits, Las Vegas is much like other western cities and therefore deserves recognition as one of the fastest-growing centers in postwar America. In a new and expanded epilogue to this edition, Moehring looks at the major events of the three decades leading up to 2000 and their underpinnings.

He served as an adviser to New York State and New York City tax commissions and acted as consultant to the League of Nations (1922-1923) and the government of Cuba in 1931. He was the editor in chief of the Encyclopedia of the Social Sciences and editor of the Columbia University series Studies in History, Economics and Public Law. Liberating Economics, Second Edition Mar 20 2022 In this brand-new critical analysis of economics, Barker, Bergeron, and Feiner provide a feminist understanding of the economic processes that shape households, labor markets, globalization, and human well-being to reveal the crucial role that gender plays in the economy today. With all new and updated chapters, the second edition of *Liberating Economics* examines recent trends in inequality, global indebtedness, crises of care, labor precarity, and climate change. Taking an interdisciplinary and intersectional feminist approach, the new edition places even more emphasis on the ways that gender, race, class, sexuality, and nationality shape the economy. It also highlights the centrality of social reproduction in economic systems and makes connections between the economic circumstances of women in global North and global South. Throughout, the authors reject the idea that there is no alternative to our current neoliberal market economy and offer alternative ways of thinking about and organizing economic systems in order to achieve gender-equitable outcomes. Written in an accessible and engaging style, this book will be of interest to students and scholars across a range of fields, policymakers, and any reader interested in creating just futures.
