*The Architecture of Rome* Mar 27 2022 Architects and artists have always acknowledged over the centuries that Rome is rightly called the 'eternal city'. Rome is eternal above all because it was always young, always 'in its prime'. Here the buildings that defined the West appeared over more than 2000 years, here the history of European architecture was written. The foundations were laid even in ancient Roman times, when the first attempts were made to design interiors and thus make space open to experience as something physical. And at that time the Roman architects also started to develop building types that are still valid today, thus creating the cornerstone of later Western architecture. In it Rome's primacy remained unbroken -- whether it was with old St Peter's as the first medieval basilica or new St. Peter's as the building in which Bramante and Michelangelo developed the High Renaissance, or with works by Bernini and Borromini whose rich and lucid spatial forms were to shape Baroque as far as Vienna, Bohemia and Lower Franconia, and also with Modern buildings, of which there are many unexpected pearls to be found in Rome. All this is comprehensible only if it is presented historically, i. e. in chronological sequence, and so the guide has not been arranged topographically as usual but chronologically. This means that one is not led in random sequence from a Baroque building to an ancient or a modern one, but the historical development is followed successively. Every epoch is preceded by an introduction that identifies its key features. This produces a continuous, lavishly illustrated history of the architecture of Rome -- and thus at the same time of the whole of the West. Practical handling is guaranteed by an alphabetical index and detailed maps, whose information does not just immediately illustrate the historical picture, but also makes it possible to choose a personal route through history.

**Figures of Speech** Jul 31 2022 Over the past two hundred years, thousands of ancient Greek vases have been unearthed. Yet these artifacts remain a challenge: what did the images depicted on these vases actually mean to ancient Greek viewers? In this long-awaited book, Gloria Ferrari uses Athenian vases, literary evidence, and other works of art from the Archaic and Classical periods (520-400 B.C.) to investigate what these items can tell us about the ancient Greeks—specifically, their notions of gender. Ferrari begins by

developing a theoretical perspective on visual representation, arguing that artistic images give us access to how their subjects were imagined rather than to the way they really were. For instance, Ferrari's examinations of the many representations of women working wool reveal that these images constitute powerful metaphors—metaphors, she argues, which both reflect and construct Greek conceptions of the ideal woman and her ideal behavior. From this perspective, Ferrari studies a number of icons representing blameless femininity and ideal masculinity to reevaluate the rites of passage by which girls are made ready for marriage and boys become men. Representations of the nude male body in Archaic statues known as kouroi, for example, symbolize manhood itself and shed new light on the much-discussed institution of paiderastia. And, in Ferrari's hands, imagery equating maidens with arable land and buried treasure provides a fresh view of Greek ideas of matrimony. Innovative, thought-provoking, and insightful throughout, *Figures of Speech* is a powerful demonstration of how the study of visual images as well as texts can reshape our understanding of ancient Greek culture.

*The Castellani Fragments in the Villa Giulia* Aug 27 2019 The vast Castellani collection of ancient Greek pottery, now housed in the Villa Giulia Museum in Rome, has been studied by several scholars, notably Paolo Mingazzini who published part of the collection. A great deal, however, especially fragments and fragmentary pieces, remains unpublished. The aim of the publication of the Athenian Black Figure fragments is to make this important material available to all students of Greek pottery. Each piece in the publication is illustrated and described. There are a number of important pieces among them, and the fragments as a whole add to the knowledge of Athenian Black Figure pottery since the picture is distorted without them. The first volume by Lise Hannestad dealt with cups: kylikes, skyphoi, kyathoi, and mastoids. The second volume emphasises the closed vessels: amphorae, jugs, lekythoi, hydriai, craters, and dinoi.

**Alle pendici dei Colli Albani / On the slopes of the Alban Hills** Jun 05 2020 This volume results from the conference "Between Appia and Latina, Settlement Dynamics and Territorial Development on the Slopes of the Alban Hills", held at the Royal Dutch Institute at Rome (KNIR) in February, 2017. Papers present both data from new research and results of research done in the past. In the initiative a range of research institutions partook (foreign Institutes at Rome, Universities, Archaeological Services) and independent researchers stimulating the exchange of current knowledge of this small, but important part of the Campagna Romana.

**Religion in Ancient Etruria** Jul 19 2021 This lively translation of Devins, Dieux et Démons is the first English-language edition of Jean-René Jannot's highly informative examination of Etruscan religion. Jannot tackles this elusive subject within three major constructs—death, ritual, and the nature of the gods—and presents recent discoveries in an accessible format. Jane K. Whitehead's translation updates Jannot's innovative text and introduces readers of all types—students, scholars, and the general audience—to this thorough overview of ancient Etruscan beliefs, including the afterlife, funerary customs, and mythology. Provocative insights and thoughtful discussions contribute to an understanding of the prophetic nature of Etruscan culture. Jannot investigates the elaborate

systems of defining space and time that so distinctly characterize this ancient society. Religion in Ancient Etruria offers a unique perspective that illuminates the origins of some of our own "modern" religious beliefs. This updated edition includes more than 100 illustrations that demonstrate early temples, statues, mirrors, tablets, and sculptures. 1998 French edition, Picard

**The Archaeology of Early Rome and Latium** Jan 25 2022 The archaeology of early Rome has progressed rapidly and dramatically over the last century; most recently with the discovery of the shrine of Aeneas at Lavinium and the reports of the walls of the Romulan city discovered on the city slopes of the Palatine Hill. The Archaeology of Early Rome and Latium presents the most recent discoveries in Rome and its surroundings: princely tombs, inscriptions and patrician houses are included in a complete overview of the subject and the controversies surrounding it. This comprehensively illustrated study fills the need for an accessible English guide to these new discoveries, and in preparation, the author interviewed most of the leading figures in current research on the early periods of Rome.

**Etruscan Civilization** Dec 12 2020 This comprehensive survey of Etruscan civilization, from its origin in the Villanovan Iron Age in the ninth century B.C. to its absorption by Rome in the first century B.C., combines well-known aspects of the Etruscan world with new discoveries and fresh insights into the role of women in Etruscan society. In addition, the Etruscans are contrasted to the Greeks, whom they often emulated, and to the Romans, who at once admired and disdained them. The result is a compelling and complete picture of a people and a culture. This in-depth examination of Etruria examines how differing access to mineral wealth, trade routes, and agricultural land led to distinct regional variations. Heavily illustrated with ancient Etruscan art and cultural objects, the text is organized both chronologically and thematically, interweaving archaeological evidence, analysis of social structure, descriptions of

trade and burial customs, and an examination of pottery and works of art.

**Testing ancient textile tools in Southern Etruria (Central Italy): Experimental archaeology versus experiential archaeology**  
Sep 20 2021 Published in *Origini* n. XL/2017. Rivista annuale del Dipartimento di Scienze dell' Antichità – “Sapienza” Università di Roma | Preistoria e protostoria delle civiltà antiche – Prehistory and protohistory of ancient civilizations | The debate regarding experimental archaeology versus the experience of archaeology is currently quite heated in Italy. Experience of archaeology, storytelling and historical re-enactment are the latest trends. Experts and non-expert enthusiasts are often involved in experimental activities as well as in experience of archaeology and re-enacting. Treating these very different aspects of archaeology in the same way is creating confusion. My paper aims to contribute to this discussion. This paper presents the experience of re-enactments and storytelling that were developed during 2014-2016 at the Etruscan Museum of Villa Giulia, Rome, as well the activities that formed part of an experimental archaeology approach that were conducted during research into Etruscan textile tools. I will first outline the experiences of archaeology as a means to disseminate and communicate knowledge. The events recently organised at the National Etruscan Museum of Villa Giulia in Rome will be used as examples. The second part will be dedicated to the recent practical experiments carried out at La Sapienza University of Rome in collaboration with the Villa Giulia Museum to understand the function of some pre-Etruscan and Etruscan textile tools (10th-5th centuries BC). The focus will be on the theoretical approaches we adopted.

The Encyclopedia of the History of Classical Archaeology includes entries on individuals whose activities influenced the knowledge of sites and monuments in their own time; articles on famous monuments and sites as seen, changed, and interpreted through time; and entries on major works of art excavated from the Renaissance to the present day as well as works known in the Middle Ages. As the definitive source on a comparatively new discipline - the history of archaeology - these finely illustrated volumes will be useful to students and scholars in archaeology, the classics, history, topography, and art and architectural history.
