**Paying for Education** Mar 02 2020 Which type of education should we pay for? How much education should we pay for? Can we buy knowledge about how to improve education? Uniquely presenting a general overview of economic principles applicable to all sectors of education, Paying for Education makes key economic ideas accessible to non-economists, whilst drawing on insights from other social science disciplines. It examines the implications of its analysis, especially for two important areas of policy - paying for teachers and paying for teaching in higher education - in order to highlight some underlying issues and consider alternative policy options, as well as reflect on possible futures. The chapters examine: The value of education for the individual The value of education for society Private and public demands for education Choosing a system to supply education The cost, efficiency and equity of providing education Analysing evidence and case studies on a global scale, Paying for Education is an essential read for academics, educational administrators, policy makers, leaders in educational organisations and all of those interested in the future of how we pay for education.

[Return to Values](#) Jul 26 2019 Acknowledging that the Republican Party's compass is askew, former congressman Bob Beauprez makes the case for the GOP to return to its founding values and principles. Analyzing the successes, failures, and lost opportunities of the Republican-controlled Congress and White House, Beauprez identifies several crumbling foundations that led to the election defeats in 2006—including his own. He explains his own guiding principles by drawing upon his real-world experience to examine why he became both a conservative and a Republican, reaching the conclusion that trust from voters must be earned through substantive action, not bought by empty political rhetoric.
