Homo Deus Nov 29 2019 Op onnavolgbare wijze beschrijft Yuval Noah Harari in zijn bestseller Sapiens 70.000 jaar menselijke evolutie, maar met Homo Deus richt hij zich op de toekomst. Met zijn kenmerkende vermenging van wetenschap, geschiedenis en filosofie onderzoekt Harari de dromen en nachtmerries van de eenentwintigste eeuw - van onsterfelijkheid tot kunstmatig leven. Hij stelt fundamentele vragen: Waar gaan we naartoe? Hoe beschermen we onze kwetsbare wereld tegen onze eigen verwoestende krachten? En als we in staat zijn door technologische vooruitgang ons lichaam en onze geest te verbeteren, wat gebeurt er dan met de mensen die zich niet laten upgraden? Wat voor sociale gevolgen zal deze tweedeling hebben? Volgens Harari is het essentieel om meer te begrijpen van de technologische revoluties om ons heen, anders hebben we geen invloed op de koers van onze toekomst. Dit is de volgende stap in onze evolutie. Dit is Homo Deus.

Soft Computing: Biomedical and Related Applications Jul 06 2020 This book lists current and potential biomedical uses of computational intelligence methods. These methods are used in diagnostics and treatment of such diseases as cancer, cardiac diseases, pneumonia, stroke, and COVID-19. Many biomedical problems are difficult; so, often, the current methods are not sufficient, new methods need to be developed. To confidently apply the new methods to critical life-and-death medical situations, it is important to first test these methods on less critical applications. The book describes several such promising new methods that have been tested on problems from agriculture, computer networks, economics and business, pavement engineering, politics, quantum computing, robotics, etc. This book helps practitioners and researchers to learn more about computational intelligence methods and their biomedical applications—and to further develop this important research direction.

The Economy and Business Environment of Vietnam Mar 14 2021 This Palgrave Pivot provides an introduction to the economy and business environment of Vietnam, a member of the ASEAN Economic Community whose economy is rapidly growing. The introduction argues that though there may be perceived disadvantages in investing in Vietnam, there are a number of benefits as well, such as the country's openness to trade and foreign direct investment, the increasing ease of doing business there and the dynamism of the economy. The book then provides an overview of Vietnam's economic policy since 1975, covering reunification, attempts at a command economy, and finally renovation under Doi Moi Policy. Further chapters cover the expansion of the private sector, interest in foreign investment, and the peculiarities of marketing and finance in Vietnam. As an edited volume with chapters written by Vietnamese scholars across economics, history, and business, this book is critical reading for researchers studying Vietnam and other Asian economies and for businesses interested in expanding into that market.

Sapiens Mar 02 2020 Honderdduizend jaar geleden leefde de Homo sapiens nog een tamelijk onbekommerd bestaan in een uithoek van het Afrikaanse continent en deelde hij de planeet met ten minste vijf andere menssoorten. Maar op een zeker moment onderging het brein van deze mens een ingrijpende verandering: nu kon hij zich plots verbeelden dat het gras elders wel eens groener zou kunnen zijn, en dus maakte hij zich op om de wereld te veroveren. In Sapiens neemt Yuval Noah Harari ons mee op een fascinerende reis door de geschiedenis van de mensheid. Wie zijn we? Waar komen we vandaan? En hoe zijn we zo geworden als we nu zijn? In zijn aanstekelijke relaas laat Harari ons kennismaken met het meest dominante wezen op aarde: de mens.

Corporate Governance, Ownership Structure and Firm Performance Feb 10 2021 The relationship between ownership structure and firm performance has been studied extensively in corporate finance and corporate governance literature. Nevertheless, the mediation (path) analysis to examine the issue can be adopted as a new approach to explain why and how ownership structure is related to firm performance and vice versa. This approach calls for full recognition of the roles of agency costs and corporate risk-taking as essential mediating variables in the bi-directional and mediated relationship between ownership structure and firm performance. Based on the agency theory, corporate risk management theory and accounting for the dynamic endogeneity in the ownership-performance relationship, this book develops two-mediator mediation models, including recursive and non-recursive mediation models, to investigate the ownership structure-firm performance relationship. It is demonstrated that agency costs and corporate risk-taking are the 'missing links' in the ownership structure-firm performance relationship. Hence, this book brings into attention the mediation and dynamic approach to this issue and enhances the knowledge of the mechanisms for improving firm's financial performance. This book will be of interest to corporate finance, management and economics researchers and policy makers. Post-graduate research students in corporate governance and corporate finance will also find this book beneficial to the application of econometrics into multi-dimensional and complex issues of the firm, including

The Political Economy of Competition Law in Asia Dec 11 2020 'This is a very timely book which provides an unprecedented analysis of the factors which have shaped the competition law systems of ten Asian countries and Australia. The comprehensive discussion from varying viewpoints against the backdrop of the significantly different environments within which the respective regimes have developed creates a framework for the comparative assessment of competition law systems elsewhere in the world.' Lutz-Christian Wolff, The Chinese University of Hong Kong 'New competition laws have been adopted throughout Asia in recent years, and some of the older laws have been significantly strengthened. This makes Asia a fascinating region in which to look at the political and economic circumstances of the countries in which such laws are to be found, and to consider the very different conditions that exist within them. This book will be an invaluable guide to anyone with an interest in the developing competition law regimes of this immensely important part of the world.' Richard Whish, King's College London, UK This detailed book describes and analyses the essential political economy features that provide the backdrop to the competition policies and competition law regimes of several of the most important Asian economies. The book also discusses the impact of these political economy influences in determining whether the adopted competition policy is effective. Each of the authors experts in their respective countries offer specific insights into the nature and structure of their competition regimes and discuss to what extent the varied political economy factors unique to that country help to determine whether and to what extent the established system promotes or hinders economic competition in that jurisdiction. Comprising wide coverage of Asian jurisdictions, including Australia, this book will strongly appeal to students and academics of law, politics, economics and economic development, policy makers in national governments, international agencies and competition authorities, as well as practicing competition lawyers and in-house counsel.

Economics for the IB Diploma Paper 3 Workbook May 28 2022 The 2013 IB HL Economics syllabus change introduced Paper 3, an essentially calculations-based assessment. This development challenged teachers and students alike, as few Paper 3 practice resources have been available. This is furthermore an area of the syllabus where, as in Mathematics, practice is fundamentally important in developing the skills and confidence for needed for success. Paul Hoang's latest publication therefore represents an invaluable resource in helping students to prepare for the examination challenges they face. For many candidates the mix of words, theory and numbers in Paper 3 questions can be overwhelming, if they have not developed easy familiarity throughout their course. With clear layout and content that beautifully mirrors IB examination questions, this resource is the one we have all been waiting for. I absolutely recommend it as a 'must have' for all those who are preparing for the HL Economics examination. IT is a core resource invaluable to students and teachers alike. De weg Jun 16 2021 De weg biedt een geheel nieuwe kijk op het dagelijks leven. Michael Puett, Harvards populairste docent, laat zien hoe Chinese denkers ons inspireren tot grote en kleine veranderingen. In De weg put hij hiervoor uit het werk van zes grote Chinese filosofen zoals Confucius en Lao Tze. Mede door de waarde die zij aan kleine gebaren, rituelen en goede gewoontes hechten, bieden zij een totaal ander wereldbeeld dan westerse denkers of boeddhistische leraren. De weg daagt ons uit onze diepgewortelde overtuigingen te herzien. Volgens Puett betekent 'het goede leven' niet een groots programma of doel uitvoeren, maar een weg bewandelen. Aan de hand van voorbeelden uit het alledaagse leven, legt Puett de denkbeelden van de oude Chinese filosofen uit. Hij inspireert tot kleine, haalbare veranderingen in onze manier van werken, opvoeden, politiek bedrijven en relaties aangaan, met mogelijk verstrekkende gevolgen voor onszelf en de wereld. De weg biedt een nieuwe kijk op bijna alles!
