Armed with just a screwdriver and basic understanding of PC hardware (or willingness to learn), preeminent hackability author Allan Sulkin includes hacks for changing the order of recorded programs, activating the 30-second skip to blaze through commercials, upgrading TiVo's hard drive for more hours of recording, use of TiVo's Home Media Option to remotely record via the Web, log in to the serial port for command-line access to programming data, log files, closed-captioning data, display graphics on the TiVo screen, and even play MP3s. Readers who use advanced hacks to put their home network via the serial port, Ethernet, USB, or wireless (with 802.11b WiFi) will watch a whole new world open up. By installing various open source software packages, you can use TiVo for mail, instant messaging, calling. It's also easy to run a web server on TiVo to schedule recordings, access lists of recorded shows, and even display them on a web site.
