**PowerBuilder Questions and Answers** Oct 27

2022 PowerBuilder is a client-server computer language that is a tool of choice among much of corporate America. In a question-and-answer format, this book looks at PowerBuilder 5.0 from the developer's point of view. All aspects of PowerBuilder programming are covered including the installation of the development environment, the application, library, datawindow, and window painters, as well as how to use object-oriented programming techniques to maximize efficiency of code. The recently released PowerBuilder Internet tools are also discussed.

**Computerworld** Jul 12 2021 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

**Computerworld** Jan 18 2022 For more than 40 years, Computerworld has been the leading source of technology news and information for IT influencers worldwide. Computerworld's award-winning Web site (Computerworld.com), twice-monthly publication, focused conference series and custom research form the hub of the world's largest global IT media network.

**Computer Industry Almanac** Jan 26 2020 Surveys the computer business, with profiles of the top companies, rankings of hardware and software, product trends, and forecasts for the computer marketplace

**Writing a Professional Life** Jun 18 2019 This is the first collection of narratives by practicing technical communicators telling their own personal stories about the workplace and their lives on the job. The authors portray a wide range of jobs: writers, editors, interface designers, marketing writers, and trainers

working in 9 different technical fields, including software, R&D, engineering, medicine, transportation, and telecommunications. The stories vividly demonstrate the unique power of narrative as a teaching and learning tool. Unlike fabricated cases, these real-life narratives show new and veteran technical writers at work on the job, dealing with tasks, clients, and co-workers, and revealing their insights, values, and attitudes about their work. The stories also show the skills required in the profession and the ethical and other issues raised in the course of the workday. For anyone interested in technical communication and professional writing.

**Computers** May 30 2020 Discusses the workings of computer program languages and explains how to program a computer in the Basic language.

**Web Writing/Web Designing** Aug 01 2020 Web Writing/Web Designing explains basic HTML and includes essential information about writing copy, as well as using graphics and color. Basic coverage of effective design and functionality helps students create Web pages and sites that offer the features of the most popular and best-known Web destinations. The book helps empower users to take control of their own Web messages and design rather than relying solely on software. By offering coverage of writing basic HTML, this book helps readers think critically about boilerplate designs. For anyone in fields of technical writing and web design.

**1001 Programming Resources** Jun 11 2021 "1001 Programming Resources" features key Web sites programmers must visit and shows how to access product descriptions and detailed documentation in minutes. Download sample programs in C/C++, Java, Perl, Visual Basic, and more. The CD-ROM contains programming tools, Java and Perl, an electronic book, and demos.

**Model Driven Engineering Languages and Systems** Dec 05 2020 The pioneering organizers of the first UML workshop in Mulhouse, France in the

summer of 1998 could hardly have anticipated that, in little over a decade, their initiative would blossom into today's highly successful MODELS conference series, the premier annual gathering of researchers and practitioners focusing on a very important new technical discipline: model-based software and system engineering. This expansion is, of course, a direct consequence of the growing significance and success of model-based methods in practice. The conferences have contributed greatly to the heightened interest in the field, attracting much young talent and leading to the gradual emergence of its corresponding scientific and engineering foundations. The proceedings from the MODELS conferences are one of the primary references for anyone interested in a more substantive study of the domain. The 12th conference took place in Denver in the USA, October 4-9, 2009 along with numerous satellite workshops and tutorials, as well as several other related scientific gatherings. The conference was exceptionally fortunate to have three eminent, invited keynote speakers from industry: Stephen Mellor, Larry Constantine, and Grady Booch.
