Mixed Methods for Policy Research and Program Evaluation Nov 29 2019 *Mixed Methods for Policy Research and Program Evaluation* by Patricia Burch and Carolyn J. Heinrich equips students, researchers, and policymakers in the social sciences with the tools they need for applying mixed methods in policy research and program evaluation, from design, through data collection, and dissemination. Emphasizing the “how-to”—the set of conceptual and active tasks carried out by mixed methods researchers—the book is illustrated with rich case studies from the authors’ own research projects in education and public policy. These examples help readers identify and explain policy and program impacts and better understand the “why” and “how” of observed effects. Throughout the book, the authors describe challenges that both beginners and advanced scholars are likely to encounter when doing mixed methods research and recommend practical tools available to address them.

Protected Landscapes Mar 26 2022 Many countries have areas with special natural qualities characterized by the harmonious interaction between resident populations and the land. This book sets out the varied approaches to establishing such areas as protected landscapes. It provides guidance on criteria for selection of landscapes, implementation, management and the legal measures involved if protection is to be achieved.

OECD Reviews of Regulatory Reform **Regulatory Impact Analysis A Tool for Policy Coherence** Apr 14 2021 This publication brings together recent OECD research and analysis concerning methodological issues and country experiences with regulatory impact analysis (RIA). The collected papers cover a number of challenges to the effectiveness of RIA.

The Policy Process Mar 14 2021 This useful book is designed to teach natural resources professionals how to be more effective in solving conservation and environmental policy problems. Its presentation of basic concepts, case studies, and "real world concerns" provides a deeper understanding of the policy process and makes the book an invaluable aid for students and practitioners in such fields as wildlife biology, conservation biology, forestry, range management, ecosystem management, and sustainable development. Susan G. Clark begins by describing the challenges faced by natural resources professionals. She then explains how the substance and process of policy analysis and decision making can be improved by using a policy sciences framework that takes into account biological, social, political, and institutional considerations. Finally she reflects on how issues of human rights and morality should affect natural resources management and policy analysis. The book is very user-friendly.

The Australian Policy Handbook Aug 07 2020 Public policy permeates every aspect of our lives. It is the stuff of government, justifying taxes, driving legislation, and shaping our social services. Public policy gives us roads, railways and airports, emergency services, industry development, and natural resource management. While politicians make the decisions, public servants provide analysis and support for those choices. Drawing on their extensive practical experience, the authors outline the processes used in making public policy. They systematically explain the relationships between political decision-makers, public service advisers, other community participants, and those charged with implementing the programs that result. The sixth edition of this widely used introduction is fully updated, and includes new material on the professionalisation of politicians, the role of opposition members, loss of corporate memory in the public service, addressing systemic policy failure, nudge economics and the impact of social media and the sharing economy on policy making and government. 'An invaluable guide for practitioners, academics and students to the craft of policy analysis, development and evaluation. It is an important resource for those with a commitment to sound evidence-based public policy.' Ken Smith, ANZSOG CEO and Dean 'An enduring and important contribution to the field. Althaus, Bridgman and Davis' pioneering policy cycle approach continues to offer vital insights into the policy-making process in Australia and internationally.' Lisa Paul AO PSM, Former Secretary of the Department of Education

The Australian Policy Handbook May 16 2021 The seventh edition of this classic handbook on the policy process is fully updated, featuring new material on policy making amid local and global disruption, the contestable nature of modern policy advice, commissioning and contracting, public engagement and policy success and failure. The Australian Policy Handbook shows how public policy permeates every aspect of our lives. It is the stuff of government, justifying taxes, driving legislation and shaping our social services. Public policy gives us roads, railways and airports, emergency services, justice, education and health services, defence, industry development and natural resource management. While politicians make the decisions, public servants provide analysis and support for those choices. This updated edition includes new visuals and introduces a series of case studies for the first time. These cases--covering family violence, behavioural economics, justice reinvestment, child protection and more--illustrate the personal and professional challenges of policymaking practice. Drawing on their extensive practical and academic experience, the authors outline the processes used in making public policy. They systematically explain the relationships between political decision makers, public service advisers, community participants and those charged with implementation. The Australian Policy Handbook remains the essential guide for students and practitioners of policy making in Australia.

Health Care in Canada Jul 26 2019 *Health Care in Canada* examines the challenges faced by the Canadian health care system, a subject of much public debate. In this book Katherine Fierlbeck provides an in-depth discussion of how health care decisions are shaped by politics and why there is so much disagreement over how to fix the system. Many Canadians point to health care as a source of national pride; others are highly critical of the system's shortcomings and call for major reform. Yet meaningful debate cannot occur without an understanding of how the system actually operates. In this overview, Fierlbeck outlines the basic framework of the health care system with reference to specific areas such as administration and governance, public health, human resources, drugs and drug policy, and mental health. She also discusses alternative models in other countries such as Britain, the United States, and France. As health care becomes increasingly complex, it is crucial that Canadians have a solid grasp of the main issues within both the policy and political environments. With its balanced and accessible assessment of the main political and theoretical debates, *Health Care in Canada* is an essential guide for anyone with a stake in Canada's health system.

International Handbook for Policy Research on School-Based Counseling Jul 06 2020 This handbook examines policy research on school counseling across a wide range of countries and offers guidelines for developing counseling research and practice standards worldwide. It identifies the vital role of counseling in enhancing students’ educational performance and general wellbeing, and explores effective methods for conducting policy research, with practical examples. Chapters present the current state of school-based

counseling and policy from various countries, focusing on national and regional needs, as well as opportunities for collaboration between advocates and policymakers. By addressing gaps in policy knowledge and counselor training, the Handbook discusses both the diversity of prominent issues and the universality of its major objectives. Topics featured in this handbook include: The use of scoping reviews to document and synthesize current practices in school-based counseling. Contemporary public policy on school-based counseling in Latin America. Policy, capacity building, and school-based counseling in Eastern/Southern Africa. Public policy, policy research, and school counseling in Middle Eastern countries. Policy and policy research on school-based counseling in the United Kingdom. Policy research on school-based counseling in the United States. The International Handbook for Policy Research in School-Based Counseling is a must-have resource for researchers, graduate students, clinicians, and related professionals and practitioners in child and school psychology, educational policy and politics, social work, psychotherapy, and counseling as well as related disciplines.

Handbook of Biodiversity Valuation A Guide for Policy Makers Jul 30 2022 This Handbook describes the types of values usually associated with biodiversity. Advancing Agroforestry on the Policy Agenda Nov 09 2020 "Agroforestry is a dynamic, ecologically based, natural resources management system that, through the integration of trees on farms and in the agricultural landscape, diversifies and sustains production for increased social, economic and environmental benefits for land users at all levels (ICRAF). Yet it is still considered a peripheral activity of agriculture and many farmers and other land users are ignorant of its benefits. This paper is a guide for policy-makers, advisers and other technocrats who wish to include agroforestry in the national agenda. It aims to assist countries to develop policy, legal and institutional conditions that facilitate the adoption of agroforestry and recognize its contribution to national development. Part I explains the benefits of agroforestry systems, the necessary conditions for its development, the barriers that have prevented its adoption so far, and the drivers, contextual and internal, that make it possible. Part II outlines 10 tracks for policy action, which if followed correctly will facilitate the development of national policies designed to promote the agroforestry concept and practices at plot, farm and landscape scale. Illustrated with case studies and examples of good practice from around the world, these guidelines are an invaluable addition to the agroforestry global agenda."--Page 4 of cover.

The Politics of Policy Analysis Feb 10 2021 This book focuses on two key ways to improve the literature surrounding policy analysis. Firstly, it explores the implications of new developments in policy process research, on the role of psychology in communication and the multi-centric nature of policymaking. This is particularly important since policy analysts engage with policymakers who operate in an environment over which they have limited understanding and even less control. Secondly, it incorporates insights from studies of power, co-production, feminism, and decolonisation, to redraw the boundaries of policy-relevant knowledge. These insights help raise new questions and change expectations about the role and impact of policy analysis.

A Practical Guide for Policy Analysis: The Eightfold Path to More Effective Problem Solving 4E Jun 28 2022 The author presents concrete tips, case studies, and step-by-step methods for the budding analyst as well as the seasoned professional. He pays particular attention to "design problems" and the choice of a "base case". The book includes: up-to-date examples; a new set of environmental problems; a sample document of real-world policy analysis; a primer in how to "talk the talk" of policy analysis; and, a cheat sheet of how-to's for solving a host of policy problems.

Democratic Decentralization, Local Governance and Sustainable Development Jul 18 2021 Drawing on field-based data and experiences from the practice of democratic decentralization and local governance over the last three decades in Ghana, this book examines whether and how democratic decentralization and local governance reforms in developing countries have produced the anticipated development outcomes. In seventeen related contributions, the authors present four relevant focal themes, including conceptual and historical trajectories of decentralization and local governance; institutional choice, democratic representation, and poverty reduction; local governance, resource capacity, and service delivery; and non-state actors, local governance and sustainable development. The book blends perspectives of scholars, practitioners, and policy-makers to provide a holistic analysis of linkages between decentralization, local governance, and sustainable development efforts, presenting a novel and useful guide for science, policy, and practice of bottom-up governance and development. It provides relevant lessons and experiences for scholars, policy-makers, and development practitioners in Africa in particular and developing countries in general.

Environmental Public Policy Making Exposed Dec 23 2021 This book exposes the barriers to inclusive and effective public policy making, which are the current decision making paradigm and commonly held ideas that reduce public policy problems to scientific and technical ones. Through both environmental policy and other decision making examples, readers are shown the commonalities of all decision making. Solution-oriented practitioners and stakeholders will find this book filling a conceptual and methodological gap in existing policy literature and practice. The authors deftly guide readers from post-normal science, wicked problems, and uncertainty concepts to a conceptually-grounded, practical implementation of a new approach, the open solution approach. The Multi-criteria Integrated Resource Assessment (MIRA) is described as the first generation methodology that fulfills the expectations for the inclusive, transparent, and learning-based open solutions approach. MIRA is a holistic package of concepts, methods and analytical tools that is designed to assess Decision Uncertainty, the combined uncertainties that include data, problem formulation, expert judgments, and stakeholder opinions. Introduction of the Requisite Steps, the common steps found in all decision making, provides the yardstick for evaluating a variety of decision making processes, decision tools, and commonly found indices such as the Dow Jones Industrial Average or the Newsweek Green Ranking of corporations. The use of anecdotes, policy stories, and case examples makes this a very readable and practical book for citizens and experts. With this book, readers are prepared to critically evaluate these common indices for their personal use as well as challenge policy processes as a stakeholder. For policy practitioners, this guidebook will become a rubric to ensure an effective public policy making process and to critically evaluate decision support tools.

Evidence, policy, impact. WHO guide for evidence-informed decision-making Sep 19 2021 The importance of evidence-informed approaches in policy formulation and implementation has long been recognized by the World Health Organization (WHO) and its Member States. With the General Programme of Work (GPW)13 and the creation of the Science Division, WHO has reinforced its science and evidence-based mandate. This guide offers staff and partner organizations a compendium of WHO tools to successfully leverage evidence for policy and impact, and promote evidence-informed decision-making for safe and effective health policy and practice at country and global levels. Through its framework, the guide will increase awareness and uptake of existing tools and best practices, and additionally facilitate collaboration between areas within the Organization and with partners across countries and regions.

Evidence-Based Policy Apr 02 2020 Over the last twenty or so years, it has become standard to require policy makers to base their recommendations on evidence. That is now uncontroversial to the point of triviality—of course, policy should be based on the facts. But are the methods that policy makers rely on to gather and analyze evidence the right ones? In *Evidence-Based Policy*, Nancy Cartwright, an eminent scholar, and Jeremy Hardie, who has had a long and successful career in both business and the economy, explain that the dominant methods which are in use now—broadly speaking, methods that imitate standard practices in medicine like randomized control trials—do not work. They fail, Cartwright and Hardie contend, because they do not enhance our ability to predict if policies will be effective. The prevailing methods fall short not just because social science, which operates within the domain of real-world politics and deals with people, differs so much from the natural science milieu of the lab. Rather, there are principled reasons why the advice for crafting and implementing policy now on offer will lead to bad results. Current guides in use tend to rank scientific methods according to the degree of trustworthiness of the evidence they produce. That is valuable in certain respects, but such approaches offer little advice about how to think about putting such evidence to use. *Evidence-Based Policy* focuses on showing policymakers how to effectively use evidence. It also explains what types of information are most necessary for making reliable policy, and offers lessons on how to organize that information.

Philosophico-Methodological Analysis of Prediction and its Role in Economics Aug 26 2019 This book develops a philosophico-methodological analysis of prediction and its role in economics. Prediction plays a key role in economics in various ways. It can be seen as a basic science, as an applied science and in the application of this science. First, it is used by economic theory in order to test the available knowledge. In this regard, prediction has been presented as the scientific test for economics as a science. Second, prediction provides a content regarding the possible future that can be used for prescription in applied economics. Thus, it can be used as a guide for economic policy, i.e., as knowledge concerning the future to be employed for the resolution of specific problems. Third, prediction also has a role in the application of this science in the public arena. This is through the decision-making of the agents — individuals or organizations — in quite different settings, both in the realm of microeconomics and macroeconomics. Within this context, the research is organized in five parts, which discuss relevant aspects of the role of prediction in economics: I) The problem of prediction as a test for a science; II) The general orientation in methodology of science and the problem of prediction as a scientific test; III) The methodological framework of social sciences and economics: Incidence for prediction as a test; IV) Epistemology and methodology of economic prediction: Rationality and empirical approaches and V) Methodological aspects of economic prediction: From description to prescription. Thus, the book is of interest for philosophers and economists as well as policy-makers seeking to ascertain the roots of their performance. The style used lends itself to a wide audience.

Educational Indicators Feb 22 2022 Policymakers need to understand the uses and abuses of the education system's principal diagnostic tools--educational indicators. Those in positions to use indicators and pay for their collection must understand what the realistic information returns are from investing in them. This paper from the Center for Policy Research in Education is designed to help education decisionmakers understand the legitimate roles indicators might play in monitoring the condition of the educational system, tracking changes over time, and anticipating future change. It defines educational indicators, explains their principal applications, describes some of their limitations, and reviews the current state of the indicator art.
