The Comprehensive Respiratory Therapist Exam Review E-Book Aug 27 2019 Gain realistic National Board of Respiratory Care (NBRC) Exam experience to help eliminate exam day surprises! *The Comprehensive Respiratory Therapist's Exam Review, 7th Edition* covers every topic listed on the 2020 NBRC Detailed Content Outline — and presents every item listed as testable on the Therapist Multiple Choice (TMC) Exam and Clinical Simulation Exam (CSE). It provides study hints, in-depth content review, and self-assessment questions with rationales to help you retain more information. Two practice exams on an accompanying Evolve website prepare you for the TMC Exam. In addition, twenty-two updated practice clinical simulation scenarios on Evolve offer invaluable CSE prep. Updated content reflects 2020 NBRC Detailed Content Outline and examination matrix so that you know exactly what to expect on the exams and can review each of the areas covered on the matrix. Exam Hints point out

commonly tested items to help you determine what to study, how to plan your time, and improve test-taking skills. Special NBRC coding of topics corresponds to every topic covered on the NBRC Detailed Content Outline (DCO) so that you know exactly what to expect on the exams and can easily review each of the areas covered on the DCO. Self-study questions at the end of each chapter include an answer key with rationales to help you analyze areas of strengths and weaknesses in content learned. Additional analysis-type questions account for changes in the testing matrix. Rationales for each question provide feedback for correct and incorrect answers to help you understand why an answer is correct or incorrect and retain information better. Difficulty level codes (recall, application, analysis) for each question included with each NBRC topic to help you prepare for questions in a way that is most appropriate for that type of question (e.g., memorization for recall or synthesis for analysis). Twenty-two clinical simulations align in content and structure with the new 2020 NBRC Clinical Simulation Exam in both study mode and exam mode. In the untimed study mode you can select each scenario individually and choose to receive detailed feedback on the items that were selected, or on all possible items, upon completion. In the exam mode you take all 22 scenarios with a 4-hour time limit and receive feedback after completion. The clinical simulations can be found on the secured Evolve website and accessed by a pin code (access code in book). The software mimics that used on the actual NBRC CSE. Two 160-question versions of the Therapist Multiple Choice (TMC) Exam align in content and structure with the new 2020 NBRC TMC Exam. The untimed study (pretest) version provides immediate feedback on each question with a rationale about the correct and incorrect answers. The timed exam (posttest) version has a 3-hour limit. Feedback, including the correct answer and a rationale for the correct and the incorrect answers, is provided on each question upon completion. Final scores are given in the pretest and posttest versions, and the software for both versions mimics that used on the actual NBRC TMC Exam. The question sequence mixes with each repeated attempt, giving you a unique exam experience each time. This content can be found on the secured Evolve website and accessed by a pin code (access code in book).

COVID-19 Considerations in the Deployed Setting (Presentation) - 27 May 2020, 35 pages INTRODUCTION *The STANDARD MEDICAL OPERATING GUIDELINES (SMOG)* continues to go through significant

improvements with each release as a result of the collaboration of Emergency Medicine professionals, experienced Flight Medics, Aeromedical Physician Assistants, Critical Care Nurses, and Flight Surgeons. There has been close coordination in the development of these guidelines by the Joint Trauma System, and the Defense Committees on Trauma. Our shared goal is to ensure the highest quality en route care possible and to standardize care across all evacuation and emergency medical pre-hospital units. It is our vision that all of these enhancements and improvements will advance en route care across the services and the Department of Defense. Unit medical trainers and medical directors should evaluate Critical Care Flight Paramedics (CCFP) ability to follow and execute the medical instructions herein. These medical guidelines are intended to guide CCFPs and prehospital professionals in the response and management of emergencies and the care and treatment of patients in both garrison and combat theater environments. Unit medical providers are not expected to employ these guidelines blindly. Unit medical providers are expected to manipulate and adjust these guidelines to their unit's mission and medical air crew training / experience. Medical directors or designated supervising physicians should endorse these guidelines as a baseline, appropriately adjust components as needed, and responsibly manage individual unit medical missions within the scope of practice of their Critical Care Flight Paramedics, Enroute Critical Care Nurses, and advanced practice aeromedical providers. The medication section of this manual is provided for information purposes only. CCFPs may administer medications only as listed in the guidelines unless their medical director (supervising physician) orders a deviation. Other medications may be added, so long as the unit supervising physician and/or medical director approves them. This manual also serves as a reference for physicians providing medical direction and clinical oversight to the CCFP. Treatment direction, which is more appropriate to the patient's condition than the guideline, should be provided by the physician as long as the CCFP scope of practice is not exceeded. Any medical guideline that is out of date or has been found to cause further harm will be updated or deleted immediately. The Medical Evacuation Concepts and Capabilities Division (MECCD) serves as the managing editor of the SMOG and are responsible for content updates, managing the formal review process, and identifying review committee members for the annual review. The Standard Medical Operating Guidelines are intended to provide medical procedural guidance and is in compliment to other Department of Defense and Department of the Army policies, regulatory and doctrinal guidance. Nothing herein overrides or supersedes laws, rules, regulation or policies of the United States, DoD or DA.
