Mapping the Unmappable? Sep 07 2020 How can we map differing perceptions of the living environment? Mapping the Unmappable? explores the potential of cartography to communicate the relations of Africa's indigenous peoples with other human and non-human actors within their environments. These relations transcend Western dichotomies such as culture-nature, human-animal, natural-supernatural. The volume brings two strands of research - cartography and »relational« anthropology - into a closer dialogue. It provides case studies in Africa as well as lessons to be learned from other continents (e.g. North America, Asia and Australia). The contributors create a deepened understanding of indigenous ontologies for a further decolonization of maps, and thus advance current debates in the social sciences.

*Parental Alienation Syndrome in Court Referred Custody Cases* Oct 09 2020 This dissertation summarizes the research of 30 court referred, custody dispute cases assessing the behaviors of the parents and their children to determine the presence or absence of Parental Alienation Syndrome (PAS). The criteria to determine the parent and their children's behaviors is Dr. Gardner's definition of Parental Alienation Syndrome. The parents were placed in three categories (mild, moderate or severe) based on their symptoms and behaviors. Their children (59) were then categorized into three groups (mild, moderate, severe). This investigation seeks to determine additional information regarding the presence or absence of PAS. Reluctance by the courts and mental health community to accept the validity of PAS probably contributes to the perpetuation of the disruption of parent-child relations in custody disputes. Findings and Conclusions: It appears the data from this study corroborates observations and definitions of Parental Alienation Syndrome. The data from this study indicates that the parents in the mild PAS category have children who exhibit fewer negative behaviors toward the alienated parents whereas children whose parents are in the severe category exhibit more negative behaviors towards the alienated parents. This study found that the more negative behaviors a child exhibits towards an alienated parent, the more severe their parent's symptoms and behaviors. Consequently, there is more severe alienation from the alienated parent and the more disruption to that parent-child relation. PAS is a distinctive form of child abuse generally found in intractable custody disputes. Download 1st chapter & ByteSizeSystems Reader FREE - and buy ByteSize b-book for \$5.00.

*Beyond the Iceberg* Apr 02 2020 *Beyond the Iceberg: A Case for Emotional Healing* presents a step-by-step investigation into human nature, considering why so many people get angry, producing an intense response without any good reason. Through her experience and professional studies, author Dr. Christine Onu offers antidotes to those hidden reasons causing people appear to be sick when there is no actual sickness. There are many problems plaguing society today for which the root causes are not self-evident. We are naturally inclined to think and care for ourselves and our own safety more than we think or care for others. But nobody is an island; we need each other for life to be more meaningful. While there is absolute need for each of us to take proper care of ourselves, we should also be interested in the needs and progress of others. *Beyond the Iceberg* explores the value of psychology as a necessary tool to deal with and understand human behaviors and the problems that arise in interpersonal relationships, so that we are better able to resolve conflicts when they arise. Each of us creates our own life story and reality—who we are as human beings. *Beyond the Iceberg* considers the hidden emotions that create problems in our relationships, at work, and at home, while examining the causes for our psychological challenges and possible solutions.

Simester and Sullivan's Criminal Law Aug 19 2021 '... undoubtedly a first-rate companion for any undergraduate or post-graduate law course.' John Taggart, *Criminal Law Review* This outstanding account of modern English criminal law combines detailed exposition and analysis of the law with a careful exploration of its theoretical underpinnings. Primarily, it is written for undergraduate students of criminal law, covering all subjects taught at undergraduate level. The book's philosophical approach ensures students have a deeper understanding of the law that goes beyond a purely doctrinal knowledge As a result, over its numerous editions, it has become required reading for many criminal law courses. The 8th edition covers all statutory law including the Assaults on Emergency Workers Act 2018 and Domestic Abuse Act, s 71. Case law discussions now cover: Grant (complicity); Barton (dishonesty); Broughton, Field, Kuddus, and Rebelo (homicide) and AG's Ref (No 1 of 2020) (sexual offences).

*Intermediate Algebra* Nov 02 2022 For courses in Elementary and Intermediate Algebra Helping Readers Innovatively "Do the Math" The Sullivan Elementary & Intermediate Developmental Math Series , 4 th Edition introduces readers to the logic, precision and rigor of mathematics, while building a foundation for future success. Known for their hallmark examples that provide extra step-by-step support, the authors have continued their successful text pedagogy and have focused in the revision to translating it to the MyLab(TM) Math course for a truly dynamic learning and teaching experience. Key revisions to the MyLab Math course include guided "How To" exercises, modeled on the successful Show Case examples and new GeoGebra applet exercises. The Sullivan team has revised their MyLab Math course to ensure that readers are getting the most of the resources they have at their disposal. For example, they offer an enhanced e-text that allows readers to easily and quickly refer back to a specific page for examples. To encourage readers, the author team developed a MyLab Math that helps them develop good study skills, garner an understanding of the connections between topics, and work smarter in the process. Also available with MyLab Math MyLab(TM) Math is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. **Alternative Sweeteners, Fourth Edition** Oct 28 2019 Sweeteners are forever in the news. Whether it's information about a new sweetener or questions about one that has been on the market for years, interest in

sweeteners and sweetness continues. Completely revised and updated, this fourth edition of *Alternative Sweeteners* provides information on new, recently evaluated, and numerous other alternatives to sucrose. This edition retains the successful format that made previous editions so popular. The discussion of each sweetener includes production, physical characteristics, utility and relative sweetness compared to sucrose, technical qualities, admixture potential, application, availability, shelf life, general cost and economics, metabolism, carcinogenicity and other toxicity evaluation data, cariogenicity evaluations, and regulatory status. Scientists and food technologists have been researching sweeteners and sweetness for more than 100 years. The number of approved sweeteners has increased substantially in the last three decades. Food product developers now have a number of sweeteners from which to choose in order to provide more product choices to meet the increasing demand for good-tasting products that have reduced calories. With contributions from experts who develop, make, and use the sweeteners, this book draws together the latest information into a convenient resource that can bring researchers closer to developing the ideal sweetener.
