**Intertwined Threads : An Amalgamation of Colourful Short Stories** Jun 24 2019 About the Book: The famous novelist Orhan Pamuk has said - "I read a book one day and my whole life was changed." StoryMirror has been instrumental in changing the lives of people by providing a unique platform for writers and readers alike. Storytelling or reading stories - transitions one into another realm, to explore various shades of human emotions. Each story teaches us something, makes us ponder and provides an opportunity for some soulful reflection. In this hectic and monotonous life, a storybook can help us dream, make us believe in fairies, keep us lively, give us hope and some stories can even give us the courage to deal with our day-to-day problems. It is rightly said by George Saunders, "When you read a short story, you come out a little more aware and a little more in love with the world around you." It is a difficult task to choose a handful of stories from the plethora of interesting content on StoryMirror but the very best stories have been selected and brought to you by the means of this book. They are a result of the hard work and determination of promising writers. The writers have questioned their imagination and desire for writing and presented to us their most imaginative, engrossing, fascinating and gripping creations. This collection of short stories will provide an opportunity for the readers to access the best stories and also bear ample evidence to the vast corpus of work on the StoryMirror website. We hope it touches your heart and soul. Hope you have a great reading experience!

Breast & Gynecological Diseases Dec 11 2020 This book is primarily a symptom-based guide to Breast and Gynecologic Imaging. Most clinical publications focus on a specific pathology such as "Imaging and/or management of ovarian cancer," but in clinical practice, patients do not present with a diagnosis. Physicians are presented with clinical symptoms, and appropriate use of imaging after a clinical assessment is critical from the point of view of effective intervention to treat a patient. CMS now mandates a clinical decision support system to justify imaging. This is based on making use of appropriate modalities for specific clinical problems that are deemed so by professional society guidelines. In an era of emphasis on cost effective, high quality health care delivery, it is critical for clinicians in training and practice to have a resource that outlines scientifically sound and professional society endorsed criteria for appropriate work up of patients' symptoms. This book applies this symptom-based approach to women's health. Authors are focused on providing a scientifically proven resource to gynecologists, obstetricians, radiologists and internists involved in the management of common symptoms affecting women. Each chapter is based on a common breast or gynecological problem and how patients are triaged for imaging. The

implications of the findings and the most appropriate management of the patient are also presented. The text focuses on providing the most effective methods currently available to investigate commonly encountered symptoms in women's health. In addition, there are chapters that outline rationale of screening for breast cancer in women with an average risk and those with an elevated risk for breast cancer as well as a clinician guide to understanding multidisciplinary approach to the Breast cancer patient. This is an ideal guide for gynecologists, obstetricians, radiologists, and internists working in women's health.
