Artificial Intelligence and Economics: the Key to the Future Jul 18 2021 This book aims to deal with the main advances in the study of artificial intelligence, the digital and circular economy and innovation from a multidisciplinary perspective. Whoever governs the artificial intelligence will hold the keys to the world and the future. This consideration explains the growing role of artificial intelligence in our lives and the need to understand its mechanisms. This book presents original research articles addressing various aspects of artificial intelligence applied to economics, law, management, and optimization. The topics discussed include, economics, territorial policies, law, resource allocation strategies, information technology, and learning for inclusion. Combining the input of contributing professors and

researchers from Italian and other foreign universities, the book is of interest to students, researchers, and practitioners, as well as members of the public in general, interested in the world of the artificial intelligence and economics.

Human Rights in European Criminal Law Nov 29 2019 This book deals with human rights in European criminal law after the Lisbon Treaty. Doubtless the Lisbon Treaty has constituted a milestone in the development of European criminal justice. Not only has the reform following the Treaty given binding force to the EU Charter of Fundamental Rights, but furthermore it has paved the way for unprecedented forms of supranational legislation. In this scenario, the enforcement of individual rights in criminal matters has become a core goal of EU legislation. Alongside these developments, new interactions between national and supranational jurisprudences have emerged, which have significantly contributed to a human rights-oriented approach to European criminal law. The book analyses the main developments of this complex phenomenon from an interdisciplinary perspective. Criminal and procedural law, constitutional law and comparative law must thus be combined to achieve a full understanding of these developments and of their impact on national law.

Advance Care Decision Making in Germany and Italy Dec 23 2021

What is the situation of people who are unable to make decisions due to a physical or mental change? This book gives impulses and answers to many ethical, economical and mainly legal questions which arise and are associated with the end of life. A universal human rights approach and the analysis of the relevant European law are put in front of the presentation of the national legal situations in Italy and Germany. The most topical and controversial issues concerning advance care planning are presented as well as a transnational economic analysis on the effects of advance care planning.?

Criminal Law in Italy May 28 2022 Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides a practical analysis of criminal law in Italy. An introduction presents the necessary background information about the framework and sources of the criminal justice system, and then proceeds to a detailed examination of the grounds for criminal liability, the justification of criminal

offences, the defences that diminish or excuse criminal liability, the classification of criminal offences, and the sanctions system. Coverage of criminal procedure focuses on the organization of investigations, pre-trial proceedings, trial stage, and legal remedies. A final part describes the execution of sentences and orders, the prison system, and the extinction of custodial sanctions or sentences. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable resource for criminal lawyers, prosecutors, law enforcement officers, and criminal court judges handling cases connected with Italy. Academics and researchers, as well as the various international organizations in the field, will welcome this very useful guide, and will appreciate its value in the study of comparative criminal law.

Transnational Inquiries and the Protection of Fundamental Rights in Criminal Proceedings Jul 30 2022 The protection of fundamental rights in the field of transnational criminal inquiries is of great delicateness in the current tangled web of domestic and international legal sources. Due to this complex scenario, this research has been carried out from a four-level perspective. The first part provides a critical analysis of the multilevel systems of protecting fundamental rights from the perspective of supranational and constitutional case law, and in the field of international and organized crime. The second part focuses on EU judicial cooperation in three main fields: financial and serious organized crime, mutual recognition tools, and individual rights protection. The third part provides the perspectives of ten domestic legal systems in two fields, i.e., obtaining evidence abroad and cooperation with international criminal tribunals. The fourth part analyses cross-border inquiries in comparative law, providing a reconstruction of different models of obtaining evidence overseas.

Legal Knowledge and Analogy Oct 21 2021 3 of law as an object that has always already been there, systematic and complete. Quite the

contrary. Some, indeed practically all of us, reject this sort of epistemology of law, and where the hypothesis of the coherence of the legal universe is put forward, this is in order to define it in very noticeably different terms from those traditionally used in legal scholarly accounts. If this referent, the law presented as a full discourse, runs through all of the contributions, this is because reasoning by analogy has to be found its specific place within this legal culture. It is the place to locate the problem of "lacunae" in law, which at bottom allows our various contributions to be classified. With Zaccaria and Maris, the question of lacunae is accepted as such (this is, we might say, the "traditionalist" aspect of these two articles, which is counterbalanced by - keeping to the same terminology - "modernist" emphases, sometimes Dworkinian in nature), and becomes the backdrop for considerations of purely hermeneutic type, in Zaccaria, extended in Maris to the field of ethics. The papers from Lenoble and Jackson, the former philosophical and the latter semiological, take as their main target this legal knowledge where the theory of lacunae finds its place.

The Western Codification of Criminal Law Jan 24 2022 This volume addresses an important historiographical gap by assessing the respective contributions of tradition and foreign influences to the 19th century codification of criminal law. More specifically, it focuses on the extent of French influence – among others – in European and American civil law jurisdictions. In this regard, the book seeks to dispel a number of myths concerning the French model's actual influence on European and Latin American criminal codes. The impact of the Napoleonic criminal code on other jurisdictions was real, but the scope and extent of its influence were significantly less than has sometimes been claimed. The overemphasis on French influence on other civil law jurisdictions is partly due to a fundamental assumption that modern criminal codes constituted a break with the past. The question as to whether they truly broke with the past or were merely a degree of reform touches on a difficult issue, namely, the dichotomy between tradition and foreign influences in the codification of criminal law. Scholarship has unfairly ignored this important subject, an oversight that this book remedies.

A Three-Dimensional Theory of Law Mar 26 2022 What this book intends to do is to study three-dimensionalism (the distinction values-norms-facts) not in what could be called its historical dimension, but in its substantive aspect, as a “form” that, when applied to different legal themes, would construct a “material” theory of law.

The Role of Fraternity in Law Feb 22 2022 This collection discusses the concept of fraternity and examines the issue of its role in law. Since the end of World War II, fraternity has been cited in several national constitutional charters, in addition to the United Nations Universal Declaration of Human Rights. But is there space for fraternity in law? The contributions to this book form an ideal “bridge” between the past and present to trace the different pathways taken to address the meaning of fraternity, and to identify its possible legal relevance. The book lays out paths that have placed fraternity in varied and challenging legal contexts in an age of globalization and conflict, where the multiplicity of national and supranational sources of law seems to show its inadequacy to govern complexity, and coexistence between diversities that appear irreconcilable. The purpose is not to recover fraternity as a forgotten principle, but to reimagine it today to address the aim and force of law within a plurality of cultures. The analysis considers a possible universal dimension that models unity within diversity, and aspires to serve as a prologue to a transition from research to dialogue between different legal systems and traditions. The book will be of interest to academics and researchers working in the areas of Comparative Law, Legal History and Legal Philosophy.

The Limits of Criminological Positivism Jan 12 2021 *The Limits of Criminological Positivism: The Movement for Criminal Law Reform in the West, 1870-1940* presents the first major study of the limits of criminological positivism in the West and establishes the subject as a field of interest. The volume will explore those limits and bring to life the resulting doctrinal, procedural, and institutional compromises of the early twentieth century that might be said to have defined modern criminal justice administration. The book examines the topic not only in North America and western Europe, with essays on Italy, Germany, France, Spain, the United Kingdom, Belgium, and Finland but also the reception and implementation of positivist ideas in Brazil. In doing so, it

explores three comparative elements: (1) the differing national experiences within the civil law world; (2) differences and similarities between civil law and common law regimes; and (3) some differences between the two leading common-law countries. It interrogates many key aspects of current penal systems, such as the impact of extra-legal scientific knowledge on criminal law, preventive detention, the 'dual-track' system with both traditional punishment and novel measures of security, the assessment of offenders' dangerousness, juvenile justice, and the indeterminate sentence. As a result, this study contributes to a critical understanding of some inherent contradictions characterizing criminal justice in contemporary western societies. Written in a straightforward and direct manner, this volume will be of great interest to academics and students researching historical criminology, philosophy, political science, and legal history.

Fitness to Plead Jan 30 2020 The law relating to fitness to plead is an increasingly important area of the criminal law. While criminalization may be justified whenever an offender commits a sufficiently serious moral wrong requiring that he or she be called to account, the doctrine of fitness to plead calls this principle into question in the case of a person who lacks the capacity or ability to participate meaningfully in a criminal trial. In light of the emerging focus on capacity-based approaches to decision-making and the international human rights requirement that the law should treat defendants fairly, this volume offers a benchmark for the theory and practice of fitness to plead, providing readers with a unique opportunity to consider differing perspectives and debate on the future development and direction of a doctrine which has up till now been under-discussed and under-researched. The fitness to plead rules stand as an exception to notions of public accountability for criminal wrongdoing yet, despite the doctrine's long-standing function in criminal procedure, it has proven complex to apply in practice and has given rise to many varied legislative models and considerable litigation in different jurisdictions. Particularly troublesome is the question of what is to be done with someone who has been found unfit to stand trial. Here the law is required to balance the need to protect those defendants who are unable to participate effectively in their own trial, whether permanently or for a defined period, and the

need to protect the public from people who may have caused serious social harm as a result of their antisocial behaviour. The challenge for law reformers, legislators, and judges, is to create rules that ensure that everyone who can properly be tried is tried, while seeking to preserve confidence in the fairness of the legal system by ensuring that people who cannot properly engage in the criminal trial process are not forced to endure it.

Ispezioni e sanzioni nel Testo Unico Sicurezza del Lavoro Aug 07 2020
Riedizione del Volume pubblicato nel 2008 (nella I ed. presentato nella Collana “Testo Unico Sicurezza del Lavoro”) sul quadro sanzionatorio e sulle regole innovative che governano il sistema istituzionale della vigilanza in materia di sicurezza sul lavoro a seguito dell’entrata in vigore del decreto legislativo 9 aprile 2008, n. 81 (Testo Unico). Corporate Criminal Liability Jun 16 2021 With industrialization and globalization, corporations acquired the capacity to influence social life

for good or for ill. Yet, corporations are not traditional objects of criminal law. Justified by notions of personal moral guilt, criminal norms have been judged inapplicable to fictional persons, who ‘think’ and ‘act’ through human beings. The expansion of new corporate criminal liability (CCL) laws since the mid-1990s challenges this assumption. Our volume surveys current practice on CCL in 15 civil and common law jurisdictions, exploring the legal conditions for liability, the principles and options for sanctioning, and the procedures for investigating, charging and trying corporate offenders. It considers whether municipal CCL laws are converging around the notion of ‘corporate culture’, and, in any case, the implications of CCL for those charged with keeping corporations, and other legal entities, out of trouble.

Crime and the Fascist State, 1850–1940 Mar 14 2021 By studying the development of Italy's penal system, Pires Marques provides valuable insights into the wider political culture of European society. Focusing on the rise of fascism in Spain and Portugal as well as Italy, he examines the role of religious, economic and political factors in the making of penal laws.

Memory and Punishment Apr 14 2021 This book examines the criminalisation of denials of genocide and of other mass atrocities in Europe and discusses the implications of protecting institutional historical memory through criminal law. The analysis highlights the tensions with free speech, investigating the relationship between criminal law and historical memory. The book paves the way for a broader discussion about fake news, ‘post-truth’ scenarios, and free expression in a digital world. The author underscores the need to protect well-founded factual records from the dangers of misinformation. Historical denialism and the related jurisprudence represent a key step in exploring this complex field. The book combines an interdisciplinary approach with criminal law methodology. It is primarily aimed at academics, practitioners and others who wish to deepen their understanding of historical denialism, remembrance laws, ‘speech crimes’ and freedom of expression. Emanuela Fronza is Senior Research Fellow in Criminal Law and Lecturer in International and European Criminal Law at the School of Law, University of Bologna. She is a

Principal Investigator within the EU research consortium Memory Laws in European and Comparative Perspectives funded by HERA (Humanities in the European Research Area).

Nullum Crimen Sine Lege, the European Convention on Human Rights and the Foreseeability of the Law Sep 19 2021 Das Buch untersucht nullum crimen sine lege als europäischen Grundsatz. Die Untersuchung konzentriert sich auf die Rolle der Vorhersehbarkeit als Lösung für die Legalitätsprobleme, die sich aus dem Richterrecht im Strafrecht ergeben. Die Vorhersehbarkeit und seine Entwicklung werden in der Rechtsprechung des EGMR untersucht. Aktuelle Lösungen, die von Zivilrechtsstaaten (Italien und Deutschland) angenommen wurden, werden auch unter Berücksichtigung der theoretischen Grundlagen von ncsl analysiert. Darüber hinaus wird die Rolle der Vorhersehbarkeit im EU-Recht als Beispiel für eine wirkungsorientierte Rechtsordnung betrachtet. Abschließend werden Zukunftsperspektiven für die Umsetzung der Vorhersehbarkeit analysiert.

Criminal law between war and peace Oct 28 2019 If subjecting war to law is one of the most important legal achievements of the 20th century, progressing further in that direction is one of the most important challenges for the 21st century. The problems it poses are many: the term “war” has formally fallen into disuse and we talk about “peacekeeping”; armies are today the product of cooperation between states and international organizations; private contractors increasingly participate in warlike activities, as the case of the Iraq war demonstrates; and the lines between war and very serious forms of crime (terrorism, organized crime) are increasingly blurred. This volume compiles the contributions presented at XVth International Congress on Social Defence, and tackle the criminal-legal issues raised by these new scenarios. It constitutes an innovative volume, gathering together the work of both academic and military authors, who have drawn on their theoretical and practical experience.

General Principles of Law - The Role of the Judiciary Aug 19 2021 This book examines the role played by domestic and international judges in the “flexibilization” of legal systems through general principles. It

features revised papers that were presented at the Annual Conference of the European-American Consortium for Legal Education, held at the University of Parma, Italy, May 2014. This volume is organized in four sections, where the topic is mainly explored from a comparative perspective, and includes case studies. The first section covers theoretical issues. It offers an analysis of principles in shaping Dworkin's theories about international law, a reflection on the role of procedural principles in defining the role of the judiciary, a view on the role of general principles in transnational judicial communication, a study on the recognition of international law from formal criteria to substantive principles, and an inquiry from the viewpoint of neo-constitutionalism. The second section contains studies on the role of general principles in selected legal systems, including International Law, European Union Law as well as Common Law systems. The third section features an analysis of select legal principles in a comparative perspective, with a particular focus on the comparison between European and American experiences. The fourth and last section explores selected principles in given areas of law, including the misuse of the *lex specialis* principle in the relationship between international human rights law and international humanitarian law, the role of the judiciary in Poland as regards discrimination for sexual orientation, and the impact of the ECtHR case law on Italian criminal law with regard to the principle of legality. Overall, the book offers readers a thoughtful reflection on how the interpretation, application, and development of general principles of law by the judiciary contribute to the evolution of legal systems at both the domestic and international levels as well as further their reciprocal interactions.

Neurolaw Apr 26 2022 This volume illustrates to the public, and legal experts, the basic principles of the field of neuroscience, that commonly goes under the name of Neurolaw. First, it illustrates the relationship between neuroscience, natural sciences and social sciences. Furthermore, it highlights numerous problems concerning the fundamental philosophical concepts used by Neurolaw and evaluates the validity of the method and the limits of a neuroscientific approach to the problems of law and justice. The volume explores the possibility of application of

these concepts on the fundamentals of the general theory of law and legal dogmatics. It also examines the main problems of Neurolaw in relation to public, private, criminal and procedural law. In conclusion, the book follows a systematic method that makes it an thorough manual for the introduction to Neurolaw.

Environmental Crime in Europe Jun 04 2020 "Environmental crime is a growing challenge for policy makers and law enforcers. This is an important and timely study which examines in depth how environmental crime is treated at national level within the European Union and the impact of the 2008 EU Directive on environmental crime on national systems. It will be required reading by anyone concerned with making environmental law more effective." Richard Macrory, Emeritus Professor, University College London The aim of this important new collection is to explore how environmental crime is controlled and environmental criminal law is shaped and implemented within the European Union and its Member States. It examines the legal framework, looking in particular at Directive 2008/99/EC, and the specific competences of the EU in this domain. In addition, it provides a detailed analysis of environmental criminal law in seven Member States, focusing inter alia on the basic legislation, the way in which environmental pollution is criminalised and the main actors in place to enforce environmental criminal law. In so doing, it provides a much needed explanation of the evolution of environmental criminal law in Europe at Union level and how this is implemented in selected Member States.

Historical Pollution Nov 02 2022 This volume examines legal matters regarding the prevention and fighting of historical pollution caused by industrial emissions. "Historical pollution" refers to the long-term or delayed onset effects of environmental crimes such as groundwater or soil pollution. *Historical Pollution* presents and compares national legal approaches, including the most interesting and effective mechanisms for managing environmental problems in relation with historical pollution. It features interdisciplinary and international comparisons of traditional and alternative justice mechanisms. This book will be of interest to researchers in criminology and criminal justice and related areas, such as politics, law, and economics, those in the public and private sectors

dealing with environmental protection, including international institutions, corporations, specialized national agencies, those involved in the criminal justice system, and policymakers.

Ideology and Criminal Law Aug 31 2022 With populist, nationalist and repressive governments on the rise around the world, questioning the impact of politics on the nature and role of law and the state is a pressing concern. If we are to understand the effects of extreme ideologies on the state's legal dimensions and powers – especially the power to punish and to determine the boundaries of permissible conduct through criminal law – it is essential to consider the lessons of history. This timely collection explores how political ideas and beliefs influenced the nature, content and application of criminal law and justice under Fascism, National Socialism, and other authoritarian regimes in the twentieth century. Bringing together expert legal historians from four continents, the collection's 16 chapters examine aspects of criminal law and related jurisprudential and criminological questions in the context of Fascist Italy, Nazi Germany, Nazi-occupied Norway, apartheid South Africa, Francoist Spain, and the authoritarian regimes of Brazil, Romania and Japan. Based on original archival, doctrinal and theoretical research, the collection offers new critical perspectives on issues of systemic identity, self-perception and the foundational role of criminal law; processes of state repression and the activities of criminal courts and lawyers; and ideological aspects of, and tensions in, substantive criminal law.

The Crime of Conspiracy in International Criminal Law Jul 26 2019 This book looks at the relevance of conspiracy in international criminal law. It establishes that conspiracy was introduced into international criminal law for purposes of prevention and to combat the collective

nature of participation in commission of international crimes. Its use as a tool of accountability has, however, been affected by conflicting conceptual perceptions of conspiracy from common law and civil law countries. This conflict is displayed in the decisions on conspiracy by the international criminal tribunals, and finally culminates into the exclusion of punishment of conspiracy in the Rome Statute. It is questionable whether this latest development on the law of conspiracy was a prudent decision. While the function of conspiracy as a mode of liability is satisfactorily covered by the modes of participation in the Rome Statute, its function as a purely inchoate crime used to punish incomplete crimes is missing. This book creates a case for inclusion in the Rome Statute, punishment of conspiracies involving international crimes that do not extend beyond the conceptual stage, to reinforce the Statute's purpose of prevention. The conspiracy concept proposed is one that reflects the characteristics acceptable under both common law and civil law systems.

Criminal Law in Liberal and Fascist Italy May 16 2021 By extending the chronological parameters of existing scholarship, and by focusing on legal experts' overriding and enduring concern with 'dangerous' forms of common crime, this study offers a major reinterpretation of criminal-law reform and legal culture in Italy from the Liberal (1861–1922) to the Fascist era (1922–43). Garfinkel argues that scholars have long overstated the influence of positivist criminology on Italian legal culture and that the kingdom's penal-reform movement was driven not by the radical criminological theories of Cesare Lombroso, but instead by a growing body of statistics and legal researches that related rising rates of crime to the instability of the Italian state. Drawing on a vast array of archival, legal and official sources, the author explains the sustained and wide-ranging interest in penal-law reform that defined this era in Italian legal history while analyzing the philosophical underpinnings of that reform and its relationship to contemporary penal-reform movements abroad.

Combating Illicit Trade in Tobacco Products Nov 09 2020 This book

focuses on the enforcement aspect of tobacco control policy, and argues that the intense regulation of the tobacco market will never be successful as long as it can be circumvented by the availability of illicit tobacco products. Yet, current efforts to combat illicit tobacco trade are insufficient, suffering from several flaws and gaps at the regulatory and operational levels. The aim of this book is to provide an analysis of the legal framework and practice of enforcement with regard to illicit tobacco products. Combining criminological and legal perspectives, it presents and critically analyses the phenomenon of illicit tobacco trade, as well as the policies, legal frameworks and practices in six EU countries with regard to combatting this phenomenon, assessing the strengths and weaknesses of their approaches. Furthermore, it studies the relationship between the EU and third countries (e.g. Ukraine) in terms of how the EU can influence policy and enforcement in these countries in order to counter illicit tobacco trafficking. Not exclusively focusing on the EU, the book also includes an analysis of enforcement against illicit tobacco products in the US. The EU Member States analysed in the book (Belgium, Germany, Italy, Latvia, the Netherlands and Poland) reflect the range of currently available approaches. Some of them have ratified the WHO Protocol against tobacco smuggling; others have not. They belong to different legal traditions and face different challenges due to their respective border situations. While Belgium and the Netherlands are key entry ports to the EU, Poland and Latvia represent the Eastern land border of the EU, with various regional challenges. Italy has a long maritime border, where trafficking is possible from Northern Africa and from the Middle East. It also has significant experience in fighting organised crime. Lastly, Germany is the largest market in Europe and situated in the middle of these trafficking routes.

Money and the Governance of Punishment Dec 31 2019 Money is the most frequently means used in the legal system to punish and regulate. Monetary penalties outnumber all other sanctions delivered by criminal justice in many jurisdictions, imprisonment included. More people pay fines than go to prison and in some jurisdictions many of those in prison are there because of failure to pay their fines. Therefore, it is surprising how little has been written in the Anglophone academic world about the nature of money sanctions and their specific characteristics as legal

sanctions. In many ways, legal innovations related to money sanctions have been poorly understood. This book argues that they are a direct consequence of the changing meaning of money. Considering the 'meaninglessness' of modern money, the book aims to examine the history of changing conceptions in how fines have been conceived and used. Using a set of interpretative techniques sensitive to how money and freedom are perceived, the genealogy of the penal fine is presented as a story of constant reformulation in response to shifting political pressures and changes in intellectual developments that influenced ideological commitments of legislators and practitioners. This book is multi-disciplinary and will appeal to those engaged with criminology, sociology and philosophy of punishment, socio-legal studies, and criminal law.

Redefining Organised Crime: A Challenge for the European Union? Oct 01 2022 The definition of organised crime has long been the object of lively debate, at national and international level. Sociological and legal analysis has not yet led to one definitive answer to the question of what exactly 'organised crime' means. Nonetheless, many instruments adopted both at international and national levels set forth special legal regimes designed to target criminal groups featuring a stable organisation, which are perceived as particularly dangerous to society. Therefore, identifying the notion of organised crime is crucial to establishing the scope of any legal instrument specifically designed for combating it. The aim of this book is to reassess the scope, the effectiveness and the overall coherence of existing definitions of organised crime, and to identify any need for a reconsideration of these definitions, specifically with reference to the EU legal order. It will be of interest to academics, practitioners and legislators working in the sphere of EU criminal law and of organised crime more generally.

Psychology and Law in a Changing World Apr 02 2020 Criminal psychology, and its relationship to the practice of law, has become a topic of major significance over the last three decades. Psychologists play a key role in modern criminal investigation and are central to crime reduction measures such as offender profiling, delinquency prevention and tackling fear of crime. Contributors from North America, Europe and Australia examine this link, both adding to and drawing upon the

pool of recent theory construction and empirical work in the following areas: * causes and prevention of offending * studies of crime and offenders * the victim's perspective * witnesses and testimony * studies of legal processes. These issues are studied from a 'local' perspective that recognises not only the need for cross-national comparative research, but also the generation of a corpus of scientific knowledge more representative of the complexity of criminal and legal investigation today.

Treatise on International Criminal Law Sep 07 2020 This is the first of three volumes of a treatise on the principles and practice of international criminal law, from its foundations to its future. Volume 1 analyses the history and sources of international criminal law, individual criminal responsibility, the requirements for criminal responsibility, and the grounds that exclude liability.

Homosexuality in Italian Literature, Society, and Culture, 1789-

1919 Jun 24 2019 Homosexuality, bisexuality, transvestitism, and trans-genders represented new ideas, customs, and mentalities which shattered nineteenth-century Italy. At this time, Italy was a state in the making, with a growing population, a fading aristocracy, and new urban classes entering the scene. While still an extremely Catholic country, atheism and secularization slowly undermined the old, traditional morality, with literature and poetry endorsing innovative fashions coming from abroad. Laxity mixed with perversion, while new forms of sexuality mirrored the immense changes taking place in a society that, since time immemorial, was dominated by the Church and by a rigid class system. This was a revolution, parallel to the political movements that brought about the Unification of Italy in 1861, and was tormented, intense, and occasionally tragic. This collection of essays offers a rather comprehensive overview of this phenomenon. Personalities and places, ideas and novels, poetry and tragedy, law and customs, are the subject of ten essays, written by leading international experts in Italian history, the history of sexuality, literature and poetry. The Italian nineteenth century is a time of a number of rapid changes, visible and invisible revolutions, often given less attention than the unification process. This book makes a substantial contribution to Italian studies and modern European

history.
