Sports-Talk Radio in America Aug 03 2020 An inside look at the hosts, hot spots, and history of sports-talk radio Sports-Talk Radio in America looks at major-, medium-, and small-market stations across the United States that feature an all-sports format, with a focus on the unique personalities and programming strategies that make each station successful. Broadcasters, journalists, and academics provide insight on how and why this media phenomenon has become an important influence of American culture, examining the "guy talk" broadcasting approach, the traditional sports-emphasis approach, "HSOs" (hot sports opinions), localism in broadcasting, how sports talk radio builds "communities" of listeners, and how reckless, on-air comments can actually build ratings. For better or worse, millions of (mostly) male listeners indulge their obsession with sports to the exclusion of virtually everything else available on the radio dial—music, news, and political talk. This unique book examines how this "niche of the niche" has formed a bond between its hosts and their rabid, passionate, and loyal audiences, spinning the dial from the largest, best-known stations in big-league markets to smaller stations in Colletown, USA, including Philadelphia's WIP, "The Ticket," KTCK in Dallas, WEEI in Boston, "The Team," WQTM in Orlando, KJR in Seattle, KOZN "The Zone" Omaha, Nebraska, WGR and WNSA in Buffalo, Kansas City's WHB, and "The Fan," WFAN in New York, the first all-sports radio station and the blueprint for the format. Sports-Talk Radio in America puts you in the studio with Mike and the Mad Dog, Angelo Cataldi, Howard Eskin, "The Musers" ("Junior" Miller and George Dunham), Norm Hitzges, John Dennis and Gerry Callahan, Dan Sileo, Howard Simon, and Art Wander. Sports-Talk Radio in America examines: how stations create an environment in which listeners become part of a social group (social-identity and self-categorization theories) personality-driven programming the station's commitment to local teams and their fans how exploring controversial topics beyond sports broadens station's appeal and attracts upscale, affluent audience how an abundance of live, play-by-play broadcasting, creating plenty of available content college sports in a town without a major professional sports team how local sports is framed by hosts and callers the conflicted relationship between sports-talk radio and the print media and much more! Sports-Talk Radio in America is a must-read for academics and professionals working in radio-television and popular culture.

*Facilitator's Guide* Jul 26 2022 Faith is trust. It is a confidence in the power and goodness of God that leads us to make good decisions and allows us to surrender our lives to Him. Hebrews 6:12 says that we are to be "imitators of those who through faith and patience inherit the promises." One of the best ways to grow in faith is to imitate the lives of people who have shown great faith. Hebrews 11 guides us through the lives of men and women - like Abel, Enoch, Noah, Abraham, Sarah, Moses, Rahab, David and others - who have done just that. Real people with real lives and real problems, who had faith in a great God and trusted Him at pivotal moments in their lives. By drawing on some of the greatest lives of faith in the Bible, readers will come to see that God was worthy of these men's and women's trust and faith during biblical times in the same way that He is worthy of ours today. This new edition of Big God includes a study guide for deeper reflection and personal application.

*Teaching and Learning Employability Skills in Career and Technical Education* Nov 18 2021 This book examines how industry-desired employability skills—or "soft skills"—are taught and learned in high school career and technical education (CTE) engineering and engineering technology programs. Identifying, recruiting, and keeping workers with strong personal and interpersonal skills is a

constant challenge for STEM employers who need to hire young workers to replace an aging technical workforce. To answer the call, teachers interviewed explained that they maintain regimented daily classroom routines that include individual and small group hands-on activities and projects. In turn, their students explain learning personal responsibility, work ethic, teamwork, leadership, conflict management, and social skills in the classroom. Narratives from the workforce and classroom interweave to put employability skills frameworks into action.

Issues in Career Development Jun 13 2021 This volume will examine the historical emergence of the concept of career including early ideas about the meaning and role of work and how it fits with life. The concept of career development is of relatively recent origin. It was not until the early 20th Century that serious attention was given to the role of work and career as it applied to the common man. While the concept of "vocation" has historical roots that date back centuries, vocation (or calling) was typically only applied to the professions of the clergy, law and medicine. These individuals had careers, while the common man had a job. Perhaps the most significant event that changed both the labor market and the associated socio-cultural values about work was the 2nd World War. The technological advances that were brought about by the war were profound in terms of changing the nature of work, and the war brought about a significant change in the gender makeup of our labor force as millions of women entered the labor market to support the war effort. The combined effects of technology, a radical new value system, and a burgeoning economy changed everything.
