Program Management Leadership Jan 18 2022 This is not another how-to guide for program managers or another reiteration of the Project Management Institute's standards for program management. Instead, *Program Management Leadership: Creating Successful Team Dynamics* examines various leadership approaches and illustrates the value of effective leadership styles in Program Management for achieving program and project success. Identifying critical success factors specific to program management, the book focuses on effective leadership styles and the power of teamwork in exceeding expectations. It starts by examining various leadership styles and traits—providing helpful insights on the tough choices leaders are often forced to make. It describes effective methods to help leaders work with stakeholders and team members to set visions and objectives so that program goals are achieved with greater frequency. Next, the book further examines teams and explains how to bring people from various experience levels, geographic diversity, and cultural backgrounds together setting aside their own personal objectives and instead working towards a common goal and vision. Presenting recent research on leadership, it highlights the situational factors that leaders face and offers approaches enabling leaders to modify their style from one based on personal choice to one that can adapt to overcome the challenges that will arise. From there, the book describes how to build and maintain a High Performing Team (HPT). It also describes how to instill a competitive spirit and culture of cooperation and mutual respect in your team to make sure your team remains focused on the right things. This book is an ideal resource for anyone who understands the value of the tools provided by PMI® and is searching for the factors that separate good program and project managers from truly great ones. If you are focused on self-actualization and continuous improvement, then this is the book that can help drive your program initiatives to the highest possible standards.

Leadership Styles and Spiritual Traits of Catholic Priests Sep 02 2020 Aning Amoah's *Leadership Styles and Spiritual Traits of Catholic Priests* explore the relationship between leadership styles (transformational, transactional, and laissez-faire) and spiritual traits (self-directedness (SD), cooperativeness (CO), and self-transcendence (ST)). The quantitative correlational study sampled 93 catholic priests from Ghana in active ministry. The results showed a statistically significant correlation between transformational leadership and spiritual traits, a nonstatistical correlation between transactional leadership and spiritual trait variables, a

negative statistically significant correlation between laissez-faire leadership style with self-directedness and cooperativeness, and a positive statistically significant correlation between laissez-faire leadership style and self-transcendence. Thus, the more catholic priests provide guidance, counseling, teaching, and shepherding among congregation as a transformational leader, the more likely they will be reliable, mature, effective, helpful, compassionate, and spiritual. Contrary, the more catholic priests become laissez-faire leader, the more likely they will be weak, blaming, ineffective, emotionally unstable, lacking internal organizational principles (low SD), self-absorbed, intolerant, critical, revengeful and self-regarding (low CO), and absorbed in what they do, spiritual and capable of adapting to situation of pain and suffering (high ST).

Institutions and the Person Apr 28 2020 Everett C. Hughes had a great impact on the field of sociology as a whole and on an entire generation of sociologists. Some of Hughes' former students and colleagues honor him in this book. The essays address the main themes in his work over the years, and illustrate as well Hughes' impact on the contributors, many of whom are themselves senior figures in the field. The book as a whole provides a distinguished and representative sampling of a major stream of contemporary sociological thought. Each of the five main divisions in the book covers one aspect of Hughes' work. The first deals with the study of occupations and professions-a field in which Hughes was a leader. The second section deals with race relations and other situations in which peoples of differing cultures meet. Beginning with his own work in French Canada many years ago, Hughes interests spread, and the breadth of this interest is seen in chapters on India, Peru, and race relations in the United States. Problems of organizations-how they are put together and how they work-are contained in a third section. A fourth section reflects Hughes' interest in the impact of institutional experience on the people who participate in social institutions, and includes chapters on occupational socialization, status passage, and the use of drugs. A final section develops still another of Hughes' interests-social science method. Presenting some of the most important topics of contemporary theory and research, this book remains profitable reading for every member of the discipline

Marketing Aesthetics Nov 04 2020 There is no way to mistake the ubiquitous trademarked Coca-Cola bottle, or the stylish ads for Absolut Vodka with any of their competitors. How have these companies created this irresistible appeal for their brands? How have they sustained a competitive edge through aesthetics? Bernd Schmitt and Alex Simonson, two leading experts in the emerging field of identity management, offer clear guidelines for harnessing a company's total aesthetic output -- its "look and feel" -- to provide a vital competitive advantage. Going beyond standard traditional approaches on branding, this fascinating book is the first to combine branding, identity, and image and to show how aesthetics can be managed through logos, brochures, packages, and advertisements, as well as sounds, scents, and lighting, to sell "the memorable experience." The authors explore what makes a corporate or brand identity irresistible, what styles and themes are crucial for different contexts, and what meanings certain visual symbols convey. Any person in any organization in any industry can benefit from employing the tools of "marketing aesthetics." Schmitt and Simonson describe how a firm can use these tools strategically to create a variety of sensory experiences that will (1) ensure customer satisfaction and loyalty; (2) sustain lasting customer impressions about a brand's or organization's special personality; (3) permit premium pricing; (4) provide legal "trade dress" protection from competitive attacks; (5) lower costs and raise productivity; and (6) most importantly, create irresistible appeal. The authors show how to manage identity globally and how to develop aesthetically pleasing retail spaces and environments. They also address the newly emergent topic of how to manage corporate and brand identity on the Internet. Supporting their thesis with numerous real-world success stories such as Absolut Vodka, Nike, the Gap, Cathay Pacific Airlines, Starbucks, the New Beetle Website, and Lego, the authors explain how actual companies have developed, refined, and maintained distinct corporate identities that set them apart from competitors.

Intercultural Experience in Narrative Sep 21 2019 This book systematically investigates intercultural experiences of Polish managers and specialists delegated by their multinational company (MNC) on an international assignment to China. The book employs narrative inquiry to explore language, intercultural

communication, collaboration, learning, and expatriate adjustment in the MNC. This approach offers new insights into intercultural experiences, communication, and cultural challenges faced by an under-researched group of professionals exposed to intensive collaborations with the local managers and employees. The findings also illustrate how the expatriates learned to better navigate the multicultural and multilingual business context and what factors facilitated and inhibited their learning and adjustment. Encouraging the qualitative, context-sensitive examination of expatriate-local personnel interactions, the book will be an invaluable source for scholars and practitioners interested in, among others, novel approaches to investigating language and intercultural communication in international business, cross-cultural management, qualitative cross-cultural research, as well as for lecturers and students interested in Central Europe and China.
