**Vampire Stories** Jan 07 2021 Who would suspect that the same mind that created the most famous literary detective of all time also took on the eternally popular genre of vampires? Sir Arthur Conan Doyle, a contemporary of Bram Stoker, gave us some fascinating works of vampire fiction. From the bloodsucking plant in “The American’s Tale” to the bloodsucking wife in “The Adventure of the Sussex Vampire,” he reveled in the horror created by creatures who survived on the blood of men and women. As the bestselling Twilight series has dominated bookstores, it’s the perfect time to offer the first-ever compilation of Sir Arthur Conan Doyle’s vampire tales. Get ready to sink your teeth into this heart-stopping anthology. Each of these twelve short stories has been pulled from obscurity and hand selected for this collection. Conan Doyle’s famous friendship with vampire king Bram Stoker is thought to have influenced these many blood-sucking tales, including “The Captain of the Pole Star,” about a medical student on an arctic voyage haunted by a heat-draining Eskimo vampire and “The Three Gables,” in which vampirism is cunningly used as a metaphor for capitalism. Featuring an introduction by world-renowned vampire expert, Robert Eighteen-Bisang, this is a must-have anthology for all vampire lovers, and for any Arthur Conan Doyle enthusiast.

**Heroes to the End** Feb 08 2021 Jim Smith might be one of the few people that tried extending his tour in Vietnam and was actually forced to leave. As a correspondent for Stars and Stripes, the Defense Departments daily newspaper, he saw every major city in Vietnam from the Delta to the Demilitarized Zone from 1971 to 1972. Drawing on dozens of his stories that were published and dozens that were not, he looks back at the war through the eyes of a 23-year-old who was technically a specialist fourth class in the Army but who acted like a civilian, sporting long hair and wearing safari suits with no rank insignia. He laughed at Bob Hopes jokes, took cover during rocket attacks, pulled guard duty at night in the jungle, got in trouble with the brass, and was caught up in the adrenaline rush of war. Whether it was observing training of South Vietnamese troops by U.S. advisers, watching massive U.S. firepower take out enemy targets or reporting on other efforts to repel the North Vietnamese Easter Offensive, he was there to witness the events. With the keen observations of a young combat reporter, he reveals many acts of bravery and courage in Heroes to the End. Jim Smith, a graduate of Hofstra University, spent 1971-72 in Vietnam as a clerk and Army correspondent for the Stars and Stripes. He was a Newsday reporter and editor from 1966 to 2014, and is a veterans advocate and board member of United Veterans Beacon House. He lives in Williston Park, Long Island.

The Incredible Life of Hubert Wilkins Jun 19 2019 Sir Hubert Wilkins is one of the most remarkable Australians who ever lived. The son of pioneer pastoralists in South Australia, Hubert studied engineering before moving on to photography. In 1908 he sailed for England and a job producing films with the Gaumont Film Co. Brave and bold, he became a polar expeditioner, a brilliant war photographer, a spy in the Soviet Union, a pioneering aviator-navigator, a death-defying submariner - all while being an explorer and chronicler of the planet and its life forms that would do Vasco da Gama and Sir David Attenborough proud. As a WW1 photographer he was twice awarded the Military Cross for bravery under fire, the only Australian photographer in any war to be decorated. He explored the Antarctic with Sir Ernest Shackleton, led a groundbreaking ornithological study in Australia and was knighted in 1928 for his aviation exploits, but many more astounding achievements would follow. Wilkins' quest for knowledge and polar explorations were lifelong passions and his missions to polar regions aboard the submarine Nautilus the stuff of legend. With masterful storytelling skill, Peter FitzSimons illuminates the life of Hubert Wilkins and his incredible achievements. Thrills and spills, derring-do, new worlds discovered - this is the most unforgettable tale of the most extraordinary life lived by any Australian.

**Counters** May 11 2021 Warmones, hormones, and conscience compete for the souls of young pilots in the VietNam war. An air combat tale of whimsical intelligence and vivid realism. It’s 1967 in DaNang, Vietnam, as new pilot Steve Mylder reports for duty to his fighter squadron and meets fellow pilot Avery Aughton. Avery is cocky, unbearably patriotic, and outrageously successful with women -- everything Steve is not! Yet they become friends as they drink together at the DOOM Club bar and learn the ropes of air combat together. As they dogfight in the air, their mutual friend Sub-Lieutenant Sam the Collie -- who thinks he’s a fighter pilot too -- parallels their war by dogfighting on the ground against his rival Charlie, a junkyard mutt. Steve, unenthusiastic about the war, fights for his life in the skies over North Vietnam but battles for his soul against the Red Baron of his nightmares. Avery -- master of the art of combat seduction -- acquires a measure of humility as he thunders fifty feet over a North Vietnamese beach, looks down and locks eyes with an improbable bikini-clad woman ... and falls into hopeless love. Both pilots seem on-track to survive their tours of duty when Avery is shot down and Steve has to face himself -- balancing imagination against reality -- in the aftermath of a rescue attempt. In Counters, former air force pilot Tony Taylor weaves whimsical humor and authentic details of air combat into a brooding yet fanciful tapestry, illuminating the hormones and warmones that impel young men to war and stupidity.

*The Semantics of Media* Jan 19 2022 Media are objects with content and character that we describe using in- phrases: in the story, in the picture, in the movie, in the dream... Like the propositional attitudes, these objects present a variety of hard problems for semantic and philosophical analysis. The Semantics of Media is an organized exploration of fundamental questions in the semantics of media. The first three chapters set out a straightforward model within the possible-worlds framework, and consider how it might account for a range of notions applying to media generally: implicit vs. explicit content, propositional vs. individual content, causal vs. intentional content and the idea of a single World of the Medium. The final three chapters examine ways of elaborating the model to cover a range of phenomena keyed to the functionality of particular forms of media. Chapter Four is a discussion of fiction and our apparent reference to fictional characters. Chapter Five deals with the phenomenon of viewpoint in pictorial media. Chapter Six is a study of interactions between users and characters of media centering on the puzzling case of seeing in films. The Semantics of Media will be of interest to specialists in the fields of linguistics, philosophy and communications.

**City of Manchester in the Great War** Jul 13 2021 The war touched almost every aspect of life on the Home Front, and those who were left behind suffered terribly. This book meticulously explores the problems, hardships and grief faced by Manchester's people and takes a detailed look at the unfortunate areas that were hit the hardest. Throughout Britain, industry declined and wages suffered; prices of food and fuel rose sharply; essential foodstuffs and coal were hoarded for the black market; soldiers' families doubled up with others, which caused severe overcrowding; housing and sanitation improvements ceased; there were epidemics of measles, chicken pox, influenza and TB; German U-boats tried to prevent supplies reaching Britain; and Zeppelin airships attempted to destroy British trade and industry. Manchester City suffered greatly because of its cotton trade, its industrial output, and its proximity to Liverpool, but its citizens were determined not to let the Kaiser win. This book documents how they fought back by living in a twilight world of black outs so that enemy airships would miss their targets; how they accepted emergency rationing of food and coal, and restrictions; and how they worked tirelessly in the nearby cotton mills and munitions factories, and dug for victory on their allotments. Overall, the people of Manchester were united in their grief over the sad loss of life on the fronts. This grief broke across class barriers and saw debutantes and mill girls, alike, take comfort in each other. City of Manchester in the Great War tells the remarkable story of the spirit of a city whose citizens refused to give in, who strived to fight the odds that were stacked against them.

**The Professionals** May 31 2020 To swing the tide of the war, he must take to the air once again. It was 1916. The First World War had still two years to run. Martin Falconer, at eighteen an experienced pilot with service in France to his credit, was kicking his heels in England, awaiting another posting to the Front. Throughout the spring he watched the progress of the war, especially the war in the air, acknowledging to himself the German's superiority. Their machines were better, and they had produced the war's best-known hero of the air, the Red Baron. British machines were poor, morale was low, and the odds were stacked against them. Finally, at the beginning of April, Martin was sent again to France – but this was the month that became known as Bloody April, when a pilot's life-expectancy was two weeks, and Martin found himself in a unit demoralised and ill-managed. John Harris's sombre picture of Britain at war is as compelling as only the truth can be, perfect for fans of W. E. Johns, Alexander Fullerton and David Black.

**Imagine Math 8** Mar 09 2021 This eighth volume of Imagine Math is different from all the previous ones. The reason is very clear: in the last two years, the world changed, and we still do not know what the world of tomorrow will look like. Difficult to make predictions. This volume has a subtitle Dreaming Venice. Venice, the dream city of dreams, that miraculous image of a city on water that resisted for hundreds of years, has become in the last two years truly unreachable. Many things tie this book to the previous ones. Once again, this volume also starts like Imagine Math 7, with a homage to the Italian artist Mimmo Paladino who created exclusively for the Imagine Math 8 volume a new series of ten original and unique works of art dedicated to Piero della Francesca. Many artists, art historians, designers and musicians are involved in the new book, including Linda D. Henderson and Marco Pierini, Claudio Ambrosini and Davide Amodio. Space also for comics and mathematics in a Disney key. Many applications, from Origami to mathematical models for world hunger. Particular attention to classical and modern architecture, with Tullia Iori. As usual, the topics are treated in a way that is rigorous but captivating, detailed and full of evocations. This is an all-embracing look at the world of mathematics and culture.

*Peanuts and Philosophy* Nov 05 2020 In Peanuts and Philosophy, twenty philosophers, from a diverse range of perspectives, look at different aspects of the Peanuts canon. How can the thoughts of children, who have yet to become grown-up, help us to become more grown up ourselves? Do we get good results from believing in something like the Great Pumpkin, even though we're disappointed every time? What can Linus's reactions to the leukemia of his friend Janice tell us about the stages of grief? Why don't we settle what's right and what's wrong by the simple method of asking Lucy? Is true happiness attainable without a warm puppy? Do some people's kites have a natural affinity for trees? Is Sally an anarchist, a nihilist, or just a contrarian? Does Linus's reliance on his blanket help him or hurt him? Is Charlie Brown's philosophy of life pathetic or inspirational? Other topics include: how the way children think carries general lessons about transcending our limitations; the Utopian quest as illustrated by Charlie's devotion to the Little Red-Haired Girl; Snoopy's Red Baron and history as selective memory; the Head Beagle as Big Brother. The book provides original readings of canonical Gothic literary and film texts including The Castle of Otranto, The Monk, Frankenstein, Dracula and Nosferatu. This collection of fictionalised dangerous bodies is traced back to the effects of the English Reformation, Spanish Inquisition, French Revolution, Caribbean slavery, Victorian medical malpractice, European anti-Semitism and finally warfare, ranging from the Crimean up to the Vietnam War.
