The Last Command: Star Wars Legends (The Thrawn Trilogy) Jul 13 2021 The epic story that began with Heir to the Empire reaches its dramatic conclusion in this essential Star Wars Legends novel. The embattled Republic reels from the attacks of Grand Admiral Thrawn, who has marshaled the remnants of the Imperial forces and driven the Rebels back with an abominable technology recovered from the Emperor's secret fortress: clone soldiers. As Thrawn mounts his final siege, Han Solo and Chewbacca struggle to form a coalition of smugglers for a last-ditch attack, while Princess Leia holds the Alliance together and prepares for the birth of her Jedi twins. The Republic has one last hope—sending a small force into the very stronghold that houses Thrawn's terrible cloning machines. There a final danger awaits, as the Dark Jedi C'baoth directs the battle against the Rebels and builds his strength to finish what he already started: the destruction of Luke Skywalker.

Command in NATO After the Cold War Apr 10 2021 The publication of this compendium could not be more timely as a contribution to the debate which continues in NATO capitals. NATO is an alliance based on consensus. It is also the most effective military alliance in history; this is largely due to the existence of its integrated and multinational command structure. That command structure, the cement of the Alliance as it were, derives from the mutual obligations contained in Article V of the North Atlantic Treaty. This contractual obligation, which does not exist for the other missions which have arisen since 1990, means that the defence of NATO territory must be the basis of any restructuring. If we were to move away from this and thus weaken the command structure, even with the best intentions, then it is my firm conviction that we would do serious harm to the Alliance and its future. On the other hand, a modified command structure, still based on the Article V contractual obligation, provides a firm basis, as well as flexibility, versatility, and availability for any non- contractual, namely out-of-area, requirement. Command structures do not exist of their own accord. They come into being, change, and develop, to permit commanders at the appropriate level, from top to bottom, to orchestrate the application of military force at sea, in the air, and on land. There is, however, a limit to which one can impose responsibilities on commanders, who after all are personally responsible for the conduct of operations, and a limit to the amount of specialisation and detail with which they can cope. This is why we have hierarchical command structures with each commander dealing with the appropriate level of competence. It is why at certain levels command should be joint and at others purely functional. How many levels of command are needed will be dictated by the operations factors of time, forces, and space.

Command Decision Jan 19 2022 With the Vatta's War series, award-winning author Elizabeth Moon has claimed a place alongside such preeminent writers of military science fiction as David Weber and Lois McMaster Bujold. Now Moon is back–and so is her butt-kicking, take-no-prisoners heroine, Kylara Vatta. Once the black-sheep scion of a prosperous merchant family, Kylara now leads a motley space force dedicated to the defeat of a rapacious pirate empire led by the mysterious Gammis Turek. After orchestrating a galaxy-wide failure of the communications network owned and maintained by the powerful ISC corporation, Turek and his marauders strike swiftly and without mercy. First they shatter Vatta Transport. Then they overrun entire star systems, growing stronger and bolder. No one is safe from the pirate fleet. But while they continue to move forward with their diabolical plan, they have made two critical mistakes. Their first mistake was killing Kylara Vatta's family. Their second mistake was leaving her alive. Now Kylara is going to make them pay. But with a "fleet" consisting of only three ships–including her flagship, the Vanguard, a souped-up merchant cruiser–Kylara needs allies, and fast. Because even though she possesses the same coveted communication technology as the enemy, she has nowhere near their numbers or firepower. Meanwhile, as Kylara' s cousin Stella tries to bring together the shattered pieces of the family trading empire, new treachery is unfolding at ISC headquarters, where undercover agent Rafael Dunbarger, estranged son of the corporation's CEO, is trying to learn why the damaged network is not being repaired. What he discovers will send shock waves across the galaxy and crashing into Kylara's newly christened Space Defense Force at the worst possible moment.

Emotions in Command Dec 18 2021 This book is part of a quest for a general theory of organizations valid in all cultures. Central to Frank Salter's investigation is the question of social power: why people obey their superiors. His approach is to locate the nature of organizational power in the behavioral details of hierarchical interactions in the institutional settings in which they occur. Salter begins by noting the extensive research that points to hierarchy as being a necessary component of organization and proceeds to an analysis rendered in universals of primary emotions and behaviors of dominance and affiliation. The first five chapters are theoretical, the last seven empirical. He reviews the social science literature showing the place of ethological methods and concepts, then aspects of the evolution and physiology of dominance and affiliation. Salter then introduces the emotional underpinnings of dominance and affiliation, and applies these concepts in a summary of the literature on interpersonal signaling. He describes the methods used, drawing parallels with classical ethology, anthropology, and sociology. The empirical section begins with a short chapter examining the simple commands given in a military parade. Chapter 7 analyses nightclub doormen's use of dominance in dealing with troublesome patrons. Chapter 8 describes the giving and receiving of commands in artistic rehearsals, and finds generally soft, appeased commands. Chapters 9 and 10 analyze courts and meetings respectively, finding both blunt and softened commands. Chapter 11 reports preliminary observations of command in general government bureaucracy, a setting which combines many organizational techniques in a highly articulated infrastructure. The concluding chapter summarizes the data and adopts a comparative method in searching for relationships between structural variables of institutional dominance and behavioral variables of command aggression, subordinate submission and resistance, and task characteristics. Provocative and well written, Emotions in Command will appeal to students and researchers in sociology, anthropology, and social and organizational-industrial psychology. Frank Kemp Salter is an Australian political scientist who has been a researcher with the Max Planck Society, Andechs, Germany since 1991 and is author of On Genetic Interests which is published by Transaction.
