Federal Trade Commission Privacy Law and Policy May 28 2022 The Federal Trade Commission, a US agency created in 1914 to police the problem of 'bigness', has evolved into the most important regulator of information privacy - and thus innovation policy - in the world. Its policies profoundly affect business practices and serve to regulate most of the consumer economy. In short, it now regulates our technological future. Despite its stature, however, the agency is often poorly understood by observers and even those who practice before it. This volume by Chris Jay Hoofnagle - an internationally recognized scholar with more than fifteen years of experience interacting with the FTC - is designed to redress this confusion by explaining how the FTC arrived at its current position of power. It will be essential reading for lawyers, legal academics, political scientists, historians and anyone else interested in understanding the FTC's privacy activities and how they fit in the context of the agency's broader consumer protection mission.

The Cambridge Handbook of Disaster Law and Policy Nov 09 2020 This century's major disasters from Hurricane Katrina and the Fukushima nuclear meltdown to devastating Nepalese earthquakes and the recent crippling volcanic eruptions and tsunamis in Tonga have repeatedly taught that government institutions are ill-prepared for major disaster events, leaving the most vulnerable among us unprotected. These tragedies represent just the beginning of a new era of disaster - an era of floods, heatwaves, droughts, and pandemics fueled by climate change. Laws and government institutions have struggled to adapt to the scope of the challenge; old models of risk no longer apply. This Handbook provides timely guidance, taking stock of the field of disaster law and policy as it has developed since Hurricane Katrina. Experts from a wide range of academic and practical backgrounds address the root causes of disaster vulnerability and offer solutions to build more resilient communities to ensure that no one is left behind.

For the Public's Health Apr 14 2021 The Robert Wood Johnson Foundation asked the Institute of Medicine (IOM) to examine three topics in relation to public health: measurement, the law, and funding. IOM prepared a three book series-one book on each topic-that contain actionable recommendations for public health agencies and other stakeholders that have roles in the health of the U.S population. For the Public's Health: Revitalizing Law and Policy to Meet New Challenges is the second in the For the Public Health's Series, and reflects on legal and public policy reform on three levels: first, laws that establish the structure, duties, and

authorities of public health departments; second, the use of legal and policy tools to improve the public's health; and third, the health effects of laws and policies from other sectors in and outside government. The book recommends that states enact legislation with appropriate funding to ensure that all public health departments have the mandate and the capacity to effectively deliver the Ten Essential Public Health Services. The book also recommends that states revise their laws to require public health accreditation for state and local health departments through the Public Health Accreditation Board accreditation process. The book urges government agencies to familiarize themselves with the public health and policy interventions at their disposal that can influence behavior and more importantly change conditions-social, economic, and environmental-to improve health. Lastly, the IOM encourages government and private-sector stakeholders to consider health in a wide range of policies (a health in all policies approach) and to evaluate the health effects and costs of major legislation. This book, as well as the other two books in the series, is intended to inform and help federal, state, and local governments, public health agencies, clinical care organizations, the private sector, and community-based organizations.

Democracy, Rule of Law and Foreign Policy May 04 2020 This publication contains the reports presented at the UniDem Seminar in Skopje. Foreign policy unquestionably serves the national interest in the broadest sense but nowadays it is no longer left entirely to discretion of governments. The legal foundation of foreign policy are made up both of rules of international law and rules of domestic law, whilst remaining an under-regulated area of democracy and of the law. The seminar in Skopje was an initiative which permitted an exchange of views on this subject between representatives of different countries.

Routledge Handbook of Family Law and Policy Jul 26 2019 Changes in family structures, demographics, social attitudes and economic policies over the last sixty years have had a large impact on family lives and correspondingly on family law. The second edition of this Handbook draws upon recent developments to provide a comprehensive and up-to-date global perspective on the policy challenges facing family law and policy round the world. The chapters apply legal, sociological, demographic and social work research to explore the most significant issues that have been commanding the attention of family law policy-makers in recent years. Featuring contributions from a range of renowned global experts, the book draws on multiple jurisdictions and offers comparative analysis across a range of countries. The book addresses a range of issues including the role of the state in supporting families and protecting the vulnerable, children's rights and parental authority, sexual orientation, same-sex unions and gender in family law, the status of marriage and other forms of adult relationships. It also focuses on divorce and separation and their consequences, the relationship between civil law and the law of minority groups, refugees, migrants and movement of family members between jurisdictions along with assisted conception, surrogacy and adoption. This advanced level reference work will be essential reading for students, researchers and scholars of family law and social policy as well as policy makers in the field.

Lung-Chu Chen gives particular attention Taiwan's status under international law and the role of the U.S. Taiwan Relations Act (TRA) in the formulation and execution of U.S. policy toward Taiwan.

Environmental Law and Policy in India Aug 31 2022 Environmental law and policy in India affects all sections of society. Those most deeply affected by it are the poor. They are the first victims of poor sanitation, polluted air, and contaminated water. Since the 1970s, efforts to protect environmental quality have met with limited success, posing enduring challenges for policy designers and decision-makers entrusted with protecting and preserving natural resources. This edition of Environmental Law and Policy retains the familiar analytical structure of the second edition and includes all major developments since then. It focuses on Indian environmental law, policies, problems, and needs with the comprehensiveness of an American law case book, compiles all the leading cases in environmental law in India with concise extracts of landmark judgments and policy documents, and provides discussions on projects which could potentially degrade the environment. This volume also covers air and water pollution, forests, wildlife, noise pollution, common property resources and tribal communities, environmental impact assessment, coastal regulations, large projects, urban problems, the National Green Tribunal, hazardous substances, transnational environmental policies, and international environment law. It is interlaced with notes, comments, and questions intended to encourage critical thinking amongst lawyers and law students.

Natural Resources Law and Policy Jan 24 2022 This law school casebook presents the law and policy of

natural resource management in a user-friendly and engaging manner. The book covers a wide range of natural resources—from forests and wildlife to oceans and rivers—with problem exercises and case studies for students to sharpen their understanding of the issues. The book begins with an exploration of the economic, scientific, political and ethical considerations that drive natural resource policy as well as consideration of the natural resource management challenges presented by common pool resources, scientific uncertainty, mismatched scale, market failures and institutional adequacy. The book then explores these themes and explicates the basic legal regimes for a range of resources—wildlife, fisheries, whaling, water, protected lands, range, mining, and forests. The book also considers natural resource law and management on both public lands and private property, as well as in international settings. For more information and additional teaching materials, visit the companion site.

Sentencing Law and Policy Oct 09 2020 This casebook provides a broad overview of sentencing policy in the United States, examining both the specific legal rules and the wider implications of punishment on offenders and communities. Unlike the competing books, it adopts an institutional, social scientific perspective. A defining aspect of sentencing law in the US is that there isn't all that much "law". The various actors (police, prosecutors, judges, etc.) have wide discretion, and sentencing outcomes are frequently driven by the often competing interests of these agencies. This casebook puts these institutional interactions at the forefront, and it pushes students to think carefully about the critical role they play in shaping outcomes. It also takes advantage of the author's training as an empirical economist to incorporate (in plain English!) the latest cutting-edge social scientific evidence on why we punish, and on the effects of these policies.

Eu Agricultural Law and Policy Jun 28 2022 This comprehensive yet accessible book offers an in-depth overview of the law relating to the Common Agricultural Policy (CAP). It explores both the initial objectives set out in the Treaty on the Functioning of the EU, and also those policies that have emerged as a result of the growth of competencies within the EU. Examining the four regulations that currently govern the CAP in the areas of direct payments, rural development, finance, and the common organisation of the markets, the author considers their interpretation in the case-law of the Court of Justice of the EU and the General Court. Throughout this insightful book, the European Commission's proposals for CAP reform are discussed and an astute assessment of their National Strategic Plans concludes that Member States would benefit from greater discretion in fine-tuning the principles of the policy established at European level to the particular characteristics of their national agricultural sector. Students and scholars of European law and agricultural law more specifically will find this book a structured and nuanced guide to existing and future policy at both EU and WTO levels. Policy makers and practitioners will also find its up to date treatment of the law a valuable reference.

Competition Law and Policy in Japan and the EU Oct 21 2021 This exciting new book embarks on a comparative analysis of competition law and policy in Japan and the EU. It provides a clear and carefully researched exposition of the differences between the relevant rules, systems and underlying ideas of the two jurisdictions, together with the relevant historical backgrounds. The author chooses to discuss the main areas of competition law in these jurisdictions, with particular focus placed on the gaps between the written law and practice, including analysis of the current debates that suggest future directions in competition and policy will aim towards harmonization of both systems. Competition Law and Policy in Japan and EU will strongly appeal to academics, researchers, public enforcers, practitioners, in-house counsel and students.

Inclusive Sustainability Jul 30 2022 In light of the third-generation concept of inclusive sustainability, the volume explores the architecture of global disability governance and its degree of harmonisation. The book integrates socio-cultural, economic, political and legal analyses from an international and comparative perspective. The first part of the volume outlines a tripartite systematisation of disability rights for States and non-state persons. In light of essential economic considerations, the second part explores the relationship between disability and specific fundamental rights and regimes, particularly the rights to life, health, education, work and participation. The third part takes an institutional approach and focuses on the way in which the UN and regional organisations regulate disability (rectius, different ability).

Disability Rights Law and Policy: International and National Perspectives Jan 12 2021 This volume describes the extraordinary success of the international political movement of people with disabilities to include disability as a human rights issue. The authors are renowned disability rights attorneys, university professors, and activists who practice, teach and work internationally. Published under the Transnational Publishers imprint.

International Investment Law and Policy in Africa Dec 11 2020 This book studies the international investment law regime in Africa and provides a comprehensive analysis of the current treaty practices in Africa from global, regional and domestic perspectives. It develops a public interest regulation theory to highlight the role of investment regulation in sustainable development and the protection of human rights. In doing so, the book identifies seven factors that should be considered by arbitrators in resolving international investment disputes that affect the public interest. It considers how corporations can be held accountable through investment treaties in the absence of a global treaty on business and human rights while protecting the rights of investors and their investments. Furthermore, the book explores the current objectives and features of investor-state dispute settlement (ISDS) as well as the deficiencies and its intersection with the rule of law. It identifies alternatives for ISDS and the extent to which these alternatives address the objectives of attracting investment, depoliticise investment disputes, promote the rule of law and offer remedies to investors. These solutions are offered in relation to the protection of human rights, the promotion of sustainable development and the right of states to introduce domestic public interest regulation. Finally, the book takes a prospective stance and discusses future trends for dispute settlement and investment rulemaking in Africa.

Foreign Policy Objectives in European Constitutional Law Sep 27 2019 Presenting the first comprehensive account of foreign policy objectives as a growing part of European constitutional law, Joris Larik confronts the growing trend of enshrining international ambitions in the highest laws of states and the European Union. Closely examining the provisions of foreign policy objectives, Larik differentiates their legal force and functions, situating them into the overall legal order of the state, the EU, and the composite 'European constitutional space'. He argues that the codification of foreign policy objectives suggests a progression in the evolution of the role of the constitution: from limiting public authority to guiding it towards certain goals, both at home and in the wider world. Advancing a comparative constitutional perspective for the study of EU external relations, this volume contributes a constitutional dimension to the 'normative power' debate in the study of EU foreign policy. Drawing on established national doctrines on constitutional objectives from Germany, France, and India, the book provides a common vocabulary for coming to terms with foreign policy objectives as legal norms across different jurisdictions. In the pluralist context and closely intertwined legal orders of the EU and its Member States, it shows how objectives help to channel the individual ambitions of

the Member States through the Union framework towards a more coherent external action. Furthermore, the book connects its legal findings with the debate on the EU as an actor in international relations, exploring the role of these norms in inter-institutional struggles and processes of identity-shaping, legitimation, and socialization.

EU Energy Law and Policy Jul 18 2021 Providing a critical examination of EU energy law and policy in its wider context, this book takes into account international energy markets and international energy policies, the economics of energy market regulation, geopolitical aspects of energy policy, and international developments that affect EU energy policy.

Outer Space - Future for Humankind Aug 26 2019 Inspired by the vision of the future of humankind in outer space, an international team of technical experts, lawyers and political scientists examined topical issues of law and policy under the leadership of the editors - not only with respect to international space flight and space exploration, but also in view of the safe and sustainable use of space technology for the benefit of our planet. After all, our original habitat should not be sacrificed on our way to Moon and Mars! In this regard, *Outer Space - Future for Humankind* examines fundamental questions like the problem of space debris, the safe use of nuclear power sources in outer space, the protection of the ozone layer during space launches, the issue of light pollution and the protection of the marine environment during the guided re-entry of space craft into the High Seas. In addition to these problems of technical nature, questions relating to the peaceful, equitable and responsible use of outer space are explored also with regard to issues as space traffic management which must be solved by scientists, lawyers and politicians on an international scale, and supported by an again increasingly interested general public.

Marine Policy Feb 10 2021 This book provides readers with a foundation in policy development and analysis, describing how policy, including legal mechanisms, are applied to the marine environment. It presents a systematic treatment of all aspects of marine policy, including climate change, energy, environmental protection, fisheries, mining and transportation. The health of marine environments worldwide is steadily declining, and these trends have been widely reported. *Marine Policy* summarizes the importance of the ocean governance nexus, discussing current and anticipated challenges facing marine ecosystems, human activities, and efforts to address these threats. This new, fully revised edition has been updated throughout, including content to reflect the recent advances in ocean management and international law. Chapters on shipping, energy/mining and integrated approaches to ocean management have been significantly reworked, plus completely new chapters on the United Nations Convention on the Law of the Sea, and the impacts of climate change have been added. Pedagogical features for students are included throughout. Aligned with current course offerings, this book is an ideal introduction for undergraduates and graduate students taking marine affairs, science and policy courses.

Making Policy, Making Law Feb 22 2022 This volume proposes a new way of understanding the policymaking process in the United States by examining the complex interactions among the three branches of government, executive, legislative, and judicial. Collectively across the chapters a central theme emerges, that the U.S. Constitution has created a policymaking process characterized by ongoing interaction among competing institutions with overlapping responsibilities and different constituencies, one in which no branch plays a single static part. At different times and under various conditions, all governing institutions have a distinct role in making policy, as well as in enforcing and legitimizing it. This concept overthrows the classic theories of the separation of powers and of policymaking and implementation (specifically the principal-agent theory, in which Congress and the presidency are the principals who create laws, and the bureaucracy and the courts are the agents who implement the laws, if they are constitutional). The book opens by introducing the concept of adversarial legalism, which proposes that the American mindset of frequent legal challenges to legislation by political opponents and special interests creates a policymaking process different from and more complicated than other parliamentary democracies. The chapters then examine in depth the dynamics among the branches, primarily at the national level but also considering state and local policymaking. Originally conceived of as a textbook, because no book exists that looks at the interplay of all three branches, it should also have significant impact on scholarship about national lawmaking, national politics, and constitutional law. Intro., conclusion, and Dodd's review all give good summaries.

Encyclopedia of Ocean Law and Policy in Asia-Pacific Dec 31 2019 "This timely encyclopedia addresses

the underrepresented scholarly state practice of the Asia-Pacific region in negotiating and implementing the United Nations Convention on the Law of the Sea (UNCLOS) - a continuing cornerstone of focus for regional and non-regional states alike. Further highlights for each represented state include ocean treaty accessions, domestic implementation, maritime zones, maritime disputes, exploring and exploiting living and non-living resources, marine environment protection, marine scientific research, dispute settlement, and contributions to the development of the law of the sea. The law of the sea is brought to life in the domestic laws, policies and institutions of states discussed"--

Financial Regulation Dec 23 2021 The Third Edition of Financial Regulation: Law and Policy continues to offer students and faculty an innovative and accessible introduction to the field. Financial regulation has long been at the intersection of technological innovation, market forces, and the political economy, punctuated from time to time by financial and economic crises. Since the turn of the millennium, we have seen these pressures intensify and multiply. We have lived through the most systemic Financial Crisis in 70 years, a major shift in regulatory design, the digital transformation of the economy, including the financial sector, and a worldwide Pandemic with still uncertain economic impact, playing out against an increasingly divided and shifting political landscape. The Third Edition has been updated to keep pace with all of these changes. You will find extensive discussions of fintech, climate change, and racial equality across the Third Edition, as these topics move from the periphery to the center of the regulatory agenda. The Third Edition also adds a stand-alone Chapter on supervision, an important topic that we expect will be receiving more academic research and attention, as well as an expanded Chapter on enforcement. Like the Second Edition, the Third Edition analyzes and compares the market and regulatory architecture of the entire U.S. financial sector, from banks, insurance companies, and broker-dealers, to asset managers, fintech companies of many types, complex financial conglomerates, and government-sponsored enterprises. The Third Edition explores a range of financial activities, including consumer finance and investment, digital and traditional payment systems, securitization, short-term wholesale funding, money markets, and derivatives. Throughout the book, the authors note the cross-border implications of U.S. rules, and compare, where appropriate, the U.S. financial regulatory framework and policy choices to those in other places around the globe, especially the UK and the European Union.
