Neo-Victorian Gothic fictions like Penny Dreadful represent masculinity at its darkest, Poldark and Outlander have refashioned the romantic hero and anti-heritage series like Peaky Blinders portray masculinity in crisis, at moments when the patriarchy was being bombarded by forces like World War I, the rise of first wave feminism and the breakdown of Empire. Scholars of film, media, literature and history explore the very different types of maleness offered by contemporary television and show how the intersection of class, race, history and masculinity in period dramas has come to hold such broad appeal to twenty-first-century audiences.

Authority and Authorship in Medieval and Seventeenth Century Women's Visionary Writings Aug 19 2021 In medieval and early modern times, female visionary writers used the mode of prophecy to voice their concerns and ideas, against the backdrop of cultural restrictions and negative stereotypes. In this book, Deborah Frick analyses medieval visionary writings by Julian of Norwich and Margery Kempe in comparison to seventeenth-century visionary writings by authors such as Anna Trapnel, Mary Carey, Anne Wentworth and Katherine Chidley, in order to investigate how these women authorised themselves in their writings and what topoi they use to find a voice and place of their own. This comparison, furthermore, and the strikingly similar topoi that are used by the female visionaries not only allows to question and examine topics such as authority, authorship, images of voice and body; it also breaks down preconceived and artificial boundaries and definitions.

International GAAP 2017 Jul 18 2021 IFRSs, the standards set by the International Accounting Standards Board (IASB), are complex and sometimes obscure. Understanding their implications and applying them appropriately requires something special; and that is why International GAAP® 2017 is the essential tool for anyone applying, auditing, interpreting, regulating, studying and teaching international financial reporting. It provides expert interpretation and practical guidance for busy professionals, and includes, in every chapter, detailed

analysis of how complex financial reporting problems can be resolved appropriately and effectively. The International Financial Reporting Group of Ernst & Young includes financial reporting specialists from throughout the world. Complex technical accounting issues are explained clearly in a practical working context that enables immediate understanding of the point at issue. International GAAP® 2017 is the only globally focused work on IFRSs. It is not constrained by any individual country's legislation or financial reporting regulations, and it ensures an international consistency of approach unavailable elsewhere. It shows how difficult practical issues should be approached in the complex, global world of international financial reporting, where IFRSs have become the accepted financial reporting system in more than 100 countries. This integrated approach provides a unique level of authoritative material for anyone involved in preparing, interpreting or auditing company accounts, for regulators, academic researchers and for all students of accountancy. All aspects of the detailed requirements of IFRS are dealt with on a topic-by-topic basis. Each chapter of International GAAP® 2017 deals with a key area of IFRS and has a common structure for ease of use: an introduction to the background issues; an explanation of relevant principles; a clear exposition of the requirements of IFRS; a discussion of the implications in practice and possible alternative solutions available; worked examples; extracts from real company accounts; a full listing of the required disclosures. "... an important part to play in the process of promoting consistent, comparable and high quality financial reporting under IFRSs ... a book that not only provides an analysis of the requirements of the standards and the principles that they expound, but also presents a unique explanation of how the standards should be interpreted and applied in practice." - the Chairman of Trustees of the IASC Foundation "A standard reference work" - Financial Times "The definitive guide to financial reporting" - The Times

Mid-2016 DOL regulations make millions more white-collar employees eligible for overtime pay, by greatly increasing the salary threshold for the white-collar exemption. Updates on the PATH Act (Protecting Americans From Tax Hikes; Pub. L. No. 114-113. The DOL published the "fiduciary rule" in final form in April 2016, with full compliance scheduled for January 1, 2018. Future History Apr 26 2022 Future History traces the ways that English and American writers oriented themselves along an East-West axis to fantasize their place in the world. The book builds on new transoceanic scholarship and recent calls to approach early American studies from a global perspective. Such scholarship has largely focused on the early national period; Bross's work begins earlier and considers the intertwined identities of America, other English colonial sites and metropolitan England during a period before nation-state identities were hardened into the forms we know them today, when an English empire was nascent, not realized, and when a global perspective such as we might recognize it was just coming into focus for early modern Europeans. The author examines works that imagine England on a global stage in the Americas and East Indies just as--and in some cases even before--England occupied such spaces in force. Future History considers works written from the 1620s to the 1670s, but the center of gravity of Future History is writing at the mid-century, that is, writings coincident with the Interregnum, a time when England plotted and launched ambitious, often violent schemes to conquer, colonize or otherwise appropriate other lands, driven by both mercantile and religious desires.

The Politics of Regional Cooperation and the Impact on the European Union Dec 31 2019 This unique book explores what subregions are in a European context and what roles they fulfil in relation to the European integration process, exploring how subregional cooperation and integration in Europe largely take place in the shadow of the European integration process.

India Jun 16 2021 The Indian economy has recorded strong growth in recent years, helped by a large terms of trade gain, positive policy actions including implementation of key structural reforms, a return to normal monsoon rainfall, and reduced external vulnerabilities. Inflation has remained low after the collapse in global commodity prices, a range of supply-side measures, and a relatively tight monetary stance. Key macroeconomic challenges include persistently-high household inflation expectations and large fiscal deficits, which limit policy space for supporting growth through demand measures. Supply bottlenecks and structural impediments are the main constraints to medium-term growth and job creation.

Extreme Particle Acceleration in Microquasar Jets and Pulsar Wind Nebulae with the MAGIC Telescopes Feb 10 2021 This exhaustive work sheds new light on unsolved questions in gamma-ray astrophysics. It presents not only a complete introduction to the non-thermal Universe, but also a description of the Imaging Atmospheric Cherenkov technique and the MAGIC telescopes. The Fermi-LAT satellite and the HAWC Observatory are also described, as results from both are included. The physics section of the book is divided into microquasars and pulsar wind nebulae (PWNe), and includes extended overviews of both. In turn, the book discusses constraints on particle acceleration and gamma-ray production in microquasar jets, based on the analyses of MAGIC data on Cygnus X-1, Cygnus X-3 and V404 Cygni. Moreover, it presents the discovery of high-energy gamma-ray emissions from Cygnus X-1, using Fermi-LAT data. The book includes the first joint work between MAGIC, Fermi-LAT and HAWC, and discusses

the hypothetical PWN nature of the targets in depth. It reports on a PWN population study that discusses, for the first time, the importance of the surrounding medium for gamma-ray production, and in closing presents technical work on the first Large-Size-Telescope (LST; CTA Collaboration), along with a complete description of the camera.

Gods and Rollercoasters May 04 2020 This worldwide study examines how religion gets into theme parks – as mission, as an aspect of culture, as fable, and by chance. *Gods and Rollercoasters* analyses religion in theme parks, looking at how it relates to modernism, popular culture, right-wing politics, nationalism, and the rise of the global middle class. Crispin Paine argues that religion has discovered a major new means of expression through theme parks. From the reconstruction of Biblical Jerusalem at the Holy Land Experience in Orlando, through the world of Chinese mythology at Haw Par Villa in Singapore, to the great temple/theme park Akshardham in New Delhi, this book shows how people are encountering and experiencing religion in the context of fun, thrills and leisure time. Drawing on examples from six of the seven continents, and exploring religious traditions including Christianity, Daoism, Buddhism, Hinduism and Islam, *Gods and Rollercoasters* provides a significant contribution to the study of religion, sociology, anthropology, and popular culture.

Ukraine Jan 12 2021 This 2016 Article IV Consultation shows that following a severe crisis in 2014–15, the economy of Ukraine is growing again. The flexible exchange rate and tight fiscal and monetary policies have greatly reduced internal and external imbalances. The current account deficit fell sharply, from more than 9 percent of GDP in 2013 to 3.6 percent of GDP in 2016. The overall fiscal deficit declined to 2.3 percent of GDP in 2016. Growth will remain at 2 percent in 2017 due to the impact of the blockade in the eastern part of Ukraine, but is expected to reach 3 percent in 2018 as the economy adjusts and about 3.5–4.0 percent over the medium term.

Ghana Sep 07 2020 This 2017 Article IV Consultation highlights that Ghana has shown mixed macroeconomic performance in recent years, with significant shocks being amplified by policy slippages and resulting external and domestic imbalances. Growth in 2016 was 3.5 percent, the lowest level in two decades. A recovery of growth is expected in 2017–18, owing to an increase in oil production, declining inflation, and lower imbalances with the right policy implementation. Inflation has continued to decline and the exchange rate has been broadly stable. The external position has continued to improve, supported by strong foreign investors' participation in the domestic debt market. Over the medium term, both the fiscal deficit and the current account deficit are projected to decline gradually.
