Getting Started with Amazon SageMaker Studio Mar 25 2022 Build production-grade machine learning models with Amazon SageMaker Studio, the first integrated development environment in the cloud, using real-life machine learning examples and code Key Features Understand the ML lifecycle in the cloud and its development on Amazon SageMaker Studio Learn to apply SageMaker features in SageMaker Studio for ML use cases Scale and operationalize the ML lifecycle effectively using SageMaker Studio Book Description Amazon SageMaker Studio is the first integrated development environment (IDE) for machine learning (ML) and is designed to integrate ML workflows: data preparation, feature engineering, statistical bias detection, automated machine learning (AutoML), training, hosting, ML explainability, monitoring, and MLOps in one environment. In this book, you'll start by exploring the features available in Amazon SageMaker Studio to analyze data, develop ML models, and productionize models to meet your goals. As you progress, you will learn how these features work together to address common challenges when building ML models

in production. After that, you'll understand how to effectively scale and operationalize the ML life cycle using SageMaker Studio. By the end of this book, you'll have learned ML best practices regarding Amazon SageMaker Studio, as well as being able to improve productivity in the ML development life cycle and build and deploy models easily for your ML use cases. What you will learn

- Explore the ML development life cycle in the cloud
- Understand SageMaker Studio features and the user interface
- Build a dataset with clicks and host a feature store for ML
- Train ML models with ease and scale
- Create ML models and solutions with little code
- Host ML models in the cloud with optimal cloud resources
- Ensure optimal model performance with model monitoring
- Apply governance and operational excellence to ML projects

Who this book is for This book is for data scientists and machine learning engineers who are looking to become well-versed with Amazon SageMaker Studio and gain hands-on machine learning experience to handle every step in the ML lifecycle, including building data as well as training and hosting models. Although basic knowledge of machine learning and data science is necessary, no previous knowledge of SageMaker Studio and cloud experience is required.

Personal Development in Counsellor Training Sep 30 2022 This book provides the answers to that all-important question: what are personal and professional development and why are they necessary for counsellors? This new edition explores: @! the importance of personal development and the core concepts that underpin it @! the aims, commonalities and differences of personal development in different settings and levels of training @! the key differences in theoretical approaches and their implications for personal development @! communication and relationships between counsellors and professional organizations, society, and the 'virtual' world, with all its demands on identity, privacy and congruence. @! the trainee and trainer and the challenges of personal development. Packed full of vivid accounts of personal experiences, questions and points for reflection, this book will prove an essential

companion for anyone wishing to grow personally and professionally as a therapist. Hazel Johns is a Fellow of BACP, and has been for many years a trainer, supervisor and BACP-accredited counsellor.

ECCWS 2020 20th European Conference on Cyber Warfare and Security Jul 25 2019

These proceedings represent the work of contributors to the 19th European Conference on Cyber Warfare and Security (ECCWS 2020), supported by University of Chester, UK on 25-26 June 2020. The Conference Co-chairs are Dr Thaddeus Eze and Dr Lee Speakman, both from University of Chester and the Programme Chair is Dr Cyril Onwubiko from IEEE and Director, Cyber Security Intelligence at Research Series Limited. ECCWS is a well-established event on the academic research calendar and now in its 19th year the key aim remains the opportunity for participants to share ideas and meet. The conference was due to be held at University of Chester, UK, but due to the global Covid-19 pandemic it was moved online to be held as a virtual event. The scope of papers will ensure an interesting conference. The subjects covered illustrate the wide range of topics that fall into this important and ever-growing area of research.

Design Recommendations for Intelligent Tutoring Systems: Volume 9 -

Competency-Based Scenario Design Jun 27 2022 This book focuses on the topic of competency-based scenario design as it relates to Intelligent Tutoring Systems (ITSs). The current book is the ninth in a series of books that examine key topics in ITSs. The chapters in this book specifically relate the work presented to applications for the Generalized Intelligent Framework for Tutoring (GIFT) (Sottolare, Brawner, Goldberg, & Holden, 2012; Sottolare, Brawner, Sinatra, & Johnston, 2017). GIFT is an open-source, domain independent, service-oriented, modular architecture for ITSs. GIFT has specifically been designed to allow for reusability of the GIFT architecture, GIFT tools, and instructional content materials. Further, GIFT has been designed with the goals of reducing the amount of time necessary to author ITSs, and reducing the skill level required for the authoring process. GIFT can be used to create ITSs that can be distributed both locally on a computer and virtually in the Cloud. In addition to creating ITSs, GIFT can be used to examine instructional outcomes, and conduct research. The topic of this book, Competency-Based Scenario Design is highly relevant to the development of ITSs. Scenarios are information-rich task/problem contexts that are closely aligned with real-world situations that professionals face in their jobs. The

tasks/problems exhibit ecological validity rather than stripped-down abstract simplifications. Developers of ITSs and other adaptive instructional systems need to have principled guidance on how to design these scenarios. An example scenario may be a close match to a particular situation in the past, but not be representative of a large range of situations that professionals experience in their job. An example scenario may be very realistic, but not provide reliable and valid assessments of the learners' performance to guide assessments (summative, formative, or stealth). Research teams that build high quality scenarios need to include expertise in the targeted profession, assessment, learning science, and computer science. The current book brings together experts on ITSs to discuss their work as it applies to Competency-Based Scenario Design. We believe that this book can be used as a resource for those who have an interest in developing Scenarios for ITSs, and who want to learn more about how to do so.

Server+ Certification Feb 21 2022 If you're a candidate for Server+ certification, which measures essential competencies in advanced PC hardware issues such as RAID, SCSI, multiple CPUs, SANs, and much more, the Training Guide has what you need to pass. We have partnered with Elton Jernigan, a Subject Matter Expert (SME) of the

initial Focus Group for development of the Server+ exam. He brings you an excellent resource that not only will help you pass the exam, but will also prove to be a handy, concise reference for managers and technicians who must select and implement hardware for network servers. You will benefit from Elton's insight as a 27-year veteran of the IT industry, including his experience as Director of Technology for the College of Business at Florida State University and as a senior computer trainer for the Beacon Institute for Learning. We make the most of your Server+ Certification study time by providing:

- Content that is organized according to each job dimension and exam objective
- Exam objectives that are clearly detailed and explained
- Study strategies to optimize your learning
- Exam tips that provide specific exam-related advice
- Step-by-step instructions that walk you through a task and help you learn faster
- Additional content sections with in-depth reference material
- Chapter summaries that review key concepts
- Key terms you'll need to understand
- Resource URLs that list web sites you can access for additional information on topics in each chapter
- Exercises that provide concrete experiences to reinforce learning
- Review questions and answers to assess your comprehension
- Sample exam questions that include answers and detailed explanations

Power System Restoration Oct 27 2019 "At a time when bulk power systems operate close to their design limits, the restructuring of the electric power industry has created

vulnerability to potential blackouts. Prompt and effective power system restoration is essential for the minimization of downtime and costs to the utility and its customers, which mount rapidly after a system blackout. Power System Restoration meets the complex challenges that arise from the dynamic capabilities of new technology in areas such as large-scale system analysis, communication and control, data management, artificial intelligence, and allied disciplines. It provides an up-to-date description of the restoration methodologies and implementation strategies practiced internationally. The book opens with a general overview of the restoration process and then covers: *

- * Techniques used in restoration planning and training
- * Knowledge-based systems as operational aids in restoration
- * Issues associated with hydro and thermal power plants
- * High and extra-high voltage transmission systems
- * Restoration of distribution systems

Power System Restoration is essential reading for all power system planners and operating engineers in the power industry. It is also a valuable reference for researchers, practicing power engineers, and engineering students." Sponsored by: IEEE Power Engineering Society

Working with Text Apr 01 2020 What is text mining, and how can it be used? What relevance do these methods have to everyday work in information science and the

digital humanities? How does one develop competences in text mining? Working with Text provides a series of cross-disciplinary perspectives on text mining and its applications. As text mining raises legal and ethical issues, the legal background of text mining and the responsibilities of the engineer are discussed in this book. Chapters provide an introduction to the use of the popular GATE text mining package with data drawn from social media, the use of text mining to support semantic search, the development of an authority system to support content tagging, and recent techniques in automatic language evaluation. Focused studies describe text mining on historical texts, automated indexing using constrained vocabularies, and the use of natural language processing to explore the climate science literature. Interviews are included that offer a glimpse into the real-life experience of working within commercial and academic text mining. Introduces text analysis and text mining tools Provides a comprehensive overview of costs and benefits Introduces the topic, making it accessible to a general audience in a variety of fields, including examples from biology, chemistry, sociology, and criminology

Francophone Perspectives of Learning Through Work May 15 2021 This book

generates a comprehensive account of ways in which practice-based learning has been conceptualized in the Francophone context. Learning for occupations, and the educational and practice-based experiences supporting it are the subject of increased interest and attention globally. Governments, professional bodies, workplaces and workers are now looking for experiences that support the initial and ongoing development of occupational capacities. Consequently, more attention is being given to workplaces as sites for this learning. This focus on learning through work has long been emphasised in the Francophone world, which has developed distinct traditions and conceptions of associations between work and learning. These include ergonomics and professional didactics. Yet, whilst being accepted and of long standing in the Francophone world, these conceptions and traditions, and the practices supporting them are little known about or understood in the Anglophone world, which is the dominant medium for scientific and educational discussion. This book addresses this problem through drawing on accounts from France, Switzerland and Canada that make accessible and elaborate these traditions, conceptions and practices through examples of their applications to occupationally related learning. These accounts offer variations and culturally-specific developments of these traditions, but collectively emphasize a preoccupation with how both work and learning need to be understood through situated

considerations of persons enacting their work practice. In this way, they offer noteworthy and worthwhile contributions to contemporary global considerations of learning through work.

Primary Prevention Practices Aug 25 2019 What are the most effective ways to prevent predictable behavioral problems, protect current states of health, and promote desired behaviors? Intended for use by students in the helping professions and by practitioners and researchers in the field, *Primary Prevention Practices* offers step-by-step procedures on how to conduct over 50 techniques of prevention practice. Through the use of an organizational framework, the configural equation, author Martin Bloom identifies the classes of factors that are to be considered in any thorough analysis of a given situation and provides a check list for accessing the full range of forces acting on events so the reader can better select which preventive action to apply. In addition, the book covers a wide range of prevention practices, including problem-solving methods, anticipatory instructions, social skills training, life-long exercises, perceived self-efficacy, assertiveness training, cognitive reframing, and peer tutoring. By using a technique that is friendly to practitioners and students, *Primary Prevention Practices* is a perfect resource for those in the fields of psychology, clinical psychology, social

work, and public health.

Return to Play in Football Apr 13 2021 In this book, leading experts employ an evidence-based approach to provide clear practical guidance on the important question of when and how to facilitate return to play after some of the most common injuries

encountered in football. Detailed attention is paid to biomechanics, the female athlete, risk factors, injury prevention, current strategies and criteria for safe return to play, and future developments. Specific topics discussed in depth include concussion, anterior cruciate ligament and other knee injuries, back pathology, rotator cuff tears, shoulder instability, hip arthroscopy, and foot and ankle injuries. The chapter authors include renowned clinicians and scientists from across the world who work in the field of orthopaedics and sports medicine. Furthermore, experiences from team physicians involved in the Olympics, National Football League (NFL), Union of European Football Associations (UEFA), and Fédération Internationale de Football Association (FIFA) are shared with the reader. All who are involved in the care of injured footballers will find this book, published in cooperation with ESSKA, to be an invaluable, comprehensive, and up-to-date reference that casts light on a range of controversial issues.

Advances in Artificial Intelligence: Theories, Models, and Applications Jun 23 2019

This volume constitutes the refereed proceedings of the 6th Hellenic Conference on Artificial Intelligence, SETN 2010, held in Athens, Greece, in May 2010. The 28

revised full papers and 22 revised short papers presented were carefully reviewed and selected from 83 submissions. The topics include but are not restricted to adaptive systems; AI and creativity; AI architectures; artificial life; autonomous systems; data mining and knowledge discovery; hybrid intelligent systems & methods; intelligent agents, multi-agent systems; intelligent distributed systems; intelligent information retrieval; intelligent/natural interactivity, intelligent virtual environments; knowledge representation and reasoning, logic programming; knowledge-based systems; machine learning, neural nets, genetic algorithms; natural language processing; planning and scheduling; problem solving, constraint satisfaction; robotics, machine vision, machine sensing.

Complete Guide to CISM Certification Feb 09 2021 The Certified Information Security Manager®(CISM®) certification program was developed by the Information Systems Audit and Controls Association (ISACA®). It has been designed specifically for experienced information security managers and those who have information security management responsibilities. The Complete Guide to CISM® Certification examines five functional areas—security governance, risk management, information security program management, information security management, and response management. Presenting definitions of roles and responsibilities throughout the

organization, this practical guide identifies information security risks. It deals with processes and technical solutions that implement the information security governance framework, focuses on the tasks necessary for the information security manager to effectively manage information security within an organization, and provides a description of various techniques the information security manager can use. The book also covers steps and solutions for responding to an incident. At the end of each key area, a quiz is offered on the materials just presented. Also included is a workbook to a thirty-question final exam. Complete Guide to CISM® Certification describes the tasks performed by information security managers and contains the necessary knowledge to manage, design, and oversee an information security program. With definitions and practical examples, this text is ideal for information security managers, IT auditors, and network and system administrators.

SAP ERP Financial Accounting and Controlling Jan 11 2021 SAP ERP modules are notoriously hard to configure and use effectively without a lot of practice and experience. But as *SAP ERP Financial Accounting and Controlling: Configuration and Use Management* shows, it doesn't have to be so difficult. The book takes a systematic approach that leads SAP Financial Accounting and Controlling (FICO) users step by step through configuring and using all the program's facets. This approach makes

configuration complexities manageable. The book's author—SAP expert, trainer, and accountant Andrew Okungbowa—ensures that both you and your end users are up and running quickly and confidently with FICO. He also provides sound and tested procedures that ensure your implementation works without error. SAP ERP Financial Accounting and Controlling: Configuration and Use Management is in fact the most comprehensive and easy-to-follow SAP FICO configuration book in the market. It incorporates a hands-on approach, with hundreds of screen shots and practical examples, that allows a person without prior configuration training to make SAP FICO ready for use in the enterprise. You'll find that you don't need to be a rocket scientist to grasp the concepts explained and apply them to your work—even when the finances are complicated, such as with the ins and outs of taxes, currency conversions, or special general ledger entries such as down payments or bills of exchange. Providing an in-depth coverage of both configuration and end user procedures, the book covers most aspects of the SAP FICO certification syllabus—SAP's view of the module's key tasks and procedures—including: Configuring and using the general ledger and accounts payable and receivable screens Configuring and completing closing procedures, asset accounting, and financial reporting Configuring global settings and enterprise variables Accounting for both profit and cost centers Creating a house bank Integrating FICO

with other SAP modules Taking a jargon-free tone and providing an abundance of examples, Andrew Okungbowa provides a clear understanding of configuration techniques and the breadth of functionalities encompassed by SAP FICO. And as an accountant, Okungbowa understands the needs of end users as well as of those answering to the CIO.
